

## VORTRAGSREIHE „Ökonomie der Energiewende“

March 28  
18:00-19:30  
20.21 (SCC), R217

Prof. Ph.D. Jonn Axsen, Simon Fraser University  
**Making electric mobility happen: Reflexive insights from interviews, surveys and models**

April 18  
18:00-19:30  
20.21 (SCC), R217

Prof. Dr. Frank Trentmann, Birkbeck, University of London  
**Putting use and users back in: Historical insight into the evolution of energy demand in the twentieth century**

May 09  
17:30-19:00  
20.21 (SCC), R217

Prof. Dr. Christoph Weber, University of Duisburg-Essen  
**Optimale Investitions- und Betriebsentscheidungen für Energiespeicher bei hohen Anteilen erneuerbarer Energien**

May 14  
18:00-19:30  
20.40 Jordan Hörsaal

Dr. Matthew Lockwood, University of Exeter  
**Innovation and governance in the British energy transition**

June 06  
16.30-18:00  
20.21 (SCC), R217

Prof. Dr. Felix Müsgens, Brandenburg University of Technology Cottbus–Senftenberg  
**How to estimate wind-turbine infeed with incomplete stock data: A general framework with an application to turbine-specific market values in Germany**

June 20  
18:00-19:30  
20.21 (SCC), R217

Prof. Dr. Srinivasan Keshav, University of Waterloo  
**Solar + Storage + LED + IoT = \$30 Trillion – About technological disruptions in energy systems**

KIT-FAKULTÄT FÜR WIRTSCHAFTSWISSENSCHAFTEN
