

Module Handbook Economathematics (M.Sc.)

SPO 2009/2016
Winter term 17/18
Date: 11/17/2017

KIT Department of Economics and Management / KIT Department of Mathematics

For informational use only. For legally binding information please refer to the german version of the handbook.

Table of Contents

I About this handbook	10
1 New Wiwi-modules	10
2 Notes and rules	11
3 Online Version	12
4 Contact	12
II The Master's degree program in Economathematics	14
1 Study plan according to SPO 2016	14
2 Study plan according to SPO 2009	20
III Field structure	27
1 Master Thesis	27
2 Mathematical Methods	27
2.1 Stochastics	27
2.2 Analysis or Applied and Numerical Mathematics, Optimization	27
2.2.1 Analysis	27
2.2.2 Applied and Numerical Mathematics, Optimization	28
2.3 Elective Field Mathematical Methods	29
2.3.1 Algebra and Geometry	29
2.3.2 Analysis	29
2.3.3 Applied and Numerical Mathematics, Optimization	30
2.3.4 Stochastics	31
3 Finance - Risk Management - Managerial Economics	31
4 Operations Management - Data Analysis - Informatics	32
5	32
6 Mathematical Seminar	33
7 Elective Field	33
8 Additional Examinations	35
IV Modules	39
The Riemann Zeta Function - M-MATH-102960	39
Adaptive Finite Elemente Methods - M-MATH-102900	40
Advanced Inverse Problems: Nonlinearity and Banach Spaces - M-MATH-102955	41
Algebra - M-MATH-101315	42
Algebraic Geometry - M-MATH-101724	43
Algebraic Number Theory - M-MATH-101725	44
Algebraic Topology - M-MATH-102948	45
Algebraic Topology II - M-MATH-102953	46

Asymptotic Stochastics - M-MATH-102902	47
Bifurcation Theory - M-MATH-103259	48
Boundary and Eigenvalue Problems - M-MATH-102871	49
Brownian Motion - M-MATH-102904	50
Calculus of Variations - M-MATH-102882	51
Classical Methods for Partial Differential Equations - M-MATH-102870	52
Combinatorics - M-MATH-102950	53
Comparison Geometry - M-MATH-102940	54
Complex Analysis - M-MATH-102878	55
Compressive Sensing - M-MATH-102935	56
Computer-Assisted Analytical Methods for Boundary and Eigenvalue Problems - M-MATH-102883	57
Continuous Time Finance - M-MATH-102860	58
Control Theory - M-MATH-102941	59
Convex Geometry - M-MATH-102864	60
Differential Geometry - M-MATH-101317	61
Discrete Time Finance - M-MATH-102919	62
Dynamical Systems - M-MATH-103080	63
Evolution Equations - M-MATH-102872	64
Extremal Graph Theory - M-MATH-102957	65
Extreme Value Theory - M-MATH-102939	66
Finite Element Methods - M-MATH-102891	67
Finite group schemes - M-MATH-103258	68
Forecasting: Theory and Practice - M-MATH-102956	69
Fourier Analysis - M-MATH-102873	70
Functional Analysis - M-MATH-101320	71
Functions of Matrices - M-MATH-102937	72
Functions of Operators - M-MATH-102936	73
Generalized Regression Models - M-MATH-102906	74
Geometric Group Theory - M-MATH-102867	75
Geometric Numerical Integration - M-MATH-102921	76
Geometry of Schemes - M-MATH-102866	77
Global Differential Geometry - M-MATH-102912	78
Graph Theory - M-MATH-101336	79
Group Actions in Riemannian Geometry - M-MATH-102954	80
Homotopy Theory - M-MATH-102959	81
Integral Equations - M-MATH-102874	82
Introduction into Particulate Flows - M-MATH-102943	83
Introduction to Geometric Measure Theory - M-MATH-102949	84
Introduction to Matlab and Numerical Algorithms - M-MATH-102945	85
Introduction to Scientific Computing - M-MATH-102889	86
Inverse Problems - M-MATH-102890	87
L2-Invariants - M-MATH-102952	88
Markov Decision Processes - M-MATH-102907	89
Master Thesis - M-MATH-102917	90
Mathematical Methods in Signal and Image Processing - M-MATH-102897	91
Mathematical Methods of Imaging - M-MATH-103260	92
Mathematical Modelling and Simulation in Practise - M-MATH-102929	93
Mathematical Statistics - M-MATH-102909	94
Maxwell's Equations - M-MATH-102885	95
Medical Imaging - M-MATH-102896	96
Nonlinear Maxwell Equations - M-MATH-103257	97
Nonparametric Statistics - M-MATH-102910	98
Numerical Continuation Methods - M-MATH-102944	99
Numerical Methods for Differential Equations - M-MATH-102888	100
Numerical Methods for Hyperbolic Equations - M-MATH-102915	101
Numerical Methods for Integral Equations - M-MATH-102930	102
Numerical Methods for Maxwell's Equations - M-MATH-102931	103
Numerical Methods for Time-Dependent Partial Differential Equations - M-MATH-102928	104

Numerical Methods in Computational Electrodynamics - M-MATH-102894	105
Numerical Methods in Fluid Mechanics - M-MATH-102932	106
Numerical Methods in Mathematical Finance - M-MATH-102901	107
Numerical Methods in Mathematical Finance II - M-MATH-102914	108
Numerical Optimisation Methods - M-MATH-102892	109
Optimisation and Optimal Control for Differential Equations - M-MATH-102899	110
Optimization in Banach Spaces - M-MATH-102924	111
Percolation - M-MATH-102905	112
Poisson Processes - M-MATH-102922	113
Potential Theory - M-MATH-102879	114
Probability Theory and Combinatorial Optimization - M-MATH-102947	115
Project Centered Software-Lab - M-MATH-102938	116
Random Graphs - M-MATH-102951	117
Rational Homotopy Theory - M-MATH-103256	118
Seminar - M-MATH-102730	119
Sobolev Spaces - M-MATH-102926	120
Spatial Stochastics - M-MATH-102903	121
Special Functions and Applications in Potential Theory - M-MATH-101335	122
Special Topics of Numerical Linear Algebra - M-MATH-102920	123
Spectral Theory - M-MATH-101768	124
Spin Manifolds, Alpha Invariant and Positive Scalar Curvature - M-MATH-102958	125
Stein's Method - M-MATH-102946	126
Stochastic Control - M-MATH-102908	127
Stochastic Differential Equations - M-MATH-102881	128
Stochastic Evolution Equations - M-MATH-102942	129
Stochastic Geometry - M-MATH-102865	130
Time Series Analysis - M-MATH-102911	131
Traveling Waves - M-MATH-102927	132
Wavelets - M-MATH-102895	133
Advanced Topics in Strategy and Management - M-WIWI-103119	134
Analytics and Statistics - M-WIWI-101637	136
Applications of Operations Research - M-WIWI-101413	138
Collective Decision Making - M-WIWI-101504	140
Decision and Game Theory - M-WIWI-102970	141
Disruptive FinTech Innovations - M-WIWI-103261	142
Econometrics and Statistics I - M-WIWI-101638	143
Econometrics and Statistics II - M-WIWI-101639	144
Economic Theory and its Application in Finance - M-WIWI-101502	146
eEnergy: Markets, Services and Systems - M-WIWI-103720	148
Energy Economics and Technology - M-WIWI-101452	149
Experimental Economics - M-WIWI-101505	151
Finance 1 - M-WIWI-101482	153
Finance 2 - M-WIWI-101483	154
Finance 3 - M-WIWI-101480	156
Growth and Agglomeration - M-WIWI-101496	158
Informatics - M-WIWI-101472	159
Innovation and growth - M-WIWI-101478	161
Insurance Management I - M-WIWI-101469	163
Intelligent Risk and Investment Advisory - M-WIWI-103247	165
Marketing Management - M-WIWI-101490	166
Mathematical Programming - M-WIWI-101473	168
Methodical Foundations of OR - M-WIWI-101414	170
Microeconomic Theory - M-WIWI-101500	172
Operations Research in Supply Chain Management - M-WIWI-102832	173
Seminar - M-WIWI-102971	175
Seminar - M-WIWI-102973	177
Seminar - M-WIWI-102972	178
Seminar - M-WIWI-102974	180

Service Operations - M-WIWI-102805	181
Stochastic Methods and Simulation - M-WIWI-101400	183
Stochastic Modelling and Optimization - M-WIWI-101454	185
Stochastic Optimization - M-WIWI-103289	187

V Courses	189
Spin Manifolds, Alpha Invariant and Positive Scalar Curvature - T-MATH-105932	189
Adaptive Finite Element Methods - T-MATH-105898	190
Advanced Game Theory - T-WIWI-102861	191
Advanced Inverse Problems: Nonlinearity and Banach Spaces - T-MATH-105927	192
Advanced Lab Informatics - T-WIWI-103523	193
Advanced Statistics - T-WIWI-103123	196
Advanced Stochastic Optimization - T-WIWI-106548	197
Advanced Topics in Economic Theory - T-WIWI-102609	198
Algebra - T-MATH-102253	199
Algebraic Geometry - T-MATH-103340	200
Algebraic Number Theory - T-MATH-103346	201
Algebraic Topology - T-MATH-105915	202
Algebraic Topology II - T-MATH-105926	203
Applied Econometrics - T-WIWI-103125	204
Applied Informatics II - IT Systems for eCommerce - T-WIWI-102651	205
Asset Pricing - T-WIWI-102647	206
Asymptotic Stochastics - T-MATH-105866	207
Auction Theory - T-WIWI-102613	208
Automated Financial Advisory - T-WIWI-106495	209
Bifurcation Theory - T-MATH-106487	210
Boundary and Eigenvalue Problems - T-MATH-105833	211
Brownian Motion - T-MATH-105868	212
Building Intelligent and Robo-Advised Portfolios - T-WIWI-106442	213
Business Process Modelling - T-WIWI-102697	215
Business Strategies of Banks - T-WIWI-102626	217
Calculus of Variations - T-MATH-105853	218
Challenges in Supply Chain Management - T-WIWI-102872	219
Classical Methods for Partial Differential Equations - T-MATH-105832	221
Combinatorics - T-MATH-105916	222
Comparison Geometry - T-MATH-105917	223
Complex Analysis - T-MATH-105849	224
Compressive Sensing - T-MATH-105894	225
Computational Economics - T-WIWI-102680	226
Computational FinTech with Python and C++ - T-WIWI-106496	228
Computational Risk and Asset Management I - T-WIWI-107032	229
Computational Risk and Asset Management II - T-WIWI-106494	230
Computer-Assisted Analytical Methods for Boundary and Eigenvalue Problems - T-MATH-105854	231
Consumer Behavior - T-WIWI-106569	232
Continuous Time Finance - T-MATH-105930	233
Control Theory - T-MATH-105909	234
Convex Analysis - T-WIWI-102856	235
Convex Geometry - T-MATH-105831	237
Corporate Financial Policy - T-WIWI-102622	238
Credit Risk - T-WIWI-102645	239
Current Issues in the Insurance Industry - T-WIWI-102637	241
Data Mining and Applications - T-WIWI-103066	242
Database Systems and XML - T-WIWI-102661	244
Derivatives - T-WIWI-102643	246
Differential Geometry - T-MATH-102275	247
Discrete Time Finance - T-MATH-105839	248
Discrete-Event Simulation in Production and Logistics - T-WIWI-102718	249

Document Management and Groupware Systems - T-WIWI-102663	251
Dynamical Systems - T-MATH-106114	252
Efficient Energy Systems and Electric Mobility - T-WIWI-102793	253
eFinance: Information Engineering and Management for Securities Trading - T-WIWI-102600	254
Energy and Environment - T-WIWI-102650	256
Energy Market Engineering - T-WIWI-107501	257
Energy Networks and Regulation - T-WIWI-107503	259
Energy Systems Analysis - T-WIWI-102830	260
Engineering FinTech Solutions - T-WIWI-106193	261
Enterprise Architecture Management - T-WIWI-102668	262
Evolution Equations - T-MATH-105844	263
Exchanges - T-WIWI-102625	264
Experimental Economics - T-WIWI-102614	265
Extremal Graph Theory - T-MATH-105931	266
Extreme Value Theory - T-MATH-105908	267
Facility Location and Strategic Supply Chain Management - T-WIWI-102704	268
Financial Analysis - T-WIWI-102900	270
Financial Econometrics - T-WIWI-103064	271
Financial Intermediation - T-WIWI-102623	272
Finite Element Methods - T-MATH-105857	273
Finite group schemes - T-MATH-106486	274
Fixed Income Securities - T-WIWI-102644	275
Forecasting: Theory and Practice - T-MATH-105928	276
Fourier Analysis - T-MATH-105845	277
Functional Analysis - T-MATH-102255	278
Functions of Matrices - T-MATH-105906	279
Functions of Operators - T-MATH-105905	280
Generalized Regression Models - T-MATH-105870	281
Geometric Group Theory - T-MATH-105842	282
Geometric Numerical Integration - T-MATH-105919	283
Geometry of Schemes - T-MATH-105841	284
Global Differential Geometry - T-MATH-105885	285
Global optimization I - T-WIWI-102726	286
Global optimization I and II - T-WIWI-103638	288
Global optimization II - T-WIWI-102727	289
Graph Theory - T-MATH-102273	291
Graph Theory and Advanced Location Models - T-WIWI-102723	292
Group Actions in Riemannian Geometry - T-MATH-105925	293
Heat Economy - T-WIWI-102695	294
Homotopy Theory - T-MATH-105933	295
Incentives in Organizations - T-WIWI-105781	296
Information Service Engineering - T-WIWI-106423	298
Innovationtheory and -Policy - T-WIWI-102840	300
Insurance Marketing - T-WIWI-102601	302
Insurance Production - T-WIWI-102648	303
Insurance Risk Management - T-WIWI-102636	304
Integral Equations - T-MATH-105834	305
International Finance - T-WIWI-102646	306
Introduction into Particulate Flows - T-MATH-105911	307
Introduction to Geometric Measure Theory - T-MATH-105918	308
Introduction to Matlab and Numerical Algorithms - T-MATH-105913	309
Introduction to Scientific Computing - T-MATH-105837	310
Introduction to Stochastic Optimization - T-WIWI-106546	311
Inverse Problems - T-MATH-105835	312
Knowledge Discovery - T-WIWI-102666	313
L2-Invariants - T-MATH-105924	314
Large-scale Optimization - T-WIWI-106549	315
Machine Learning 1 - Basic Methods - T-WIWI-106340	316

Machine Learning 2 – Advanced Methods - T-WIWI-106341	317
Management of IT-Projects - T-WIWI-102667	319
Market Research - T-WIWI-107720	321
Marketing Communication - T-WIWI-102902	322
Marketing Strategy Business Game - T-WIWI-102835	323
Markov Decision Models I - T-WIWI-102710	324
Markov Decision Models II - T-WIWI-102711	325
Markov Decision Processes - T-MATH-105921	326
Master Thesis - T-MATH-105878	327
Mathematical Methods in Signal and Image Processing - T-MATH-105862	328
Mathematical Methods of Imaging - T-MATH-106488	329
Mathematical Modelling and Simulation in Practise - T-MATH-105889	330
Mathematical Statistics - T-MATH-105872	331
Maxwell's Equations - T-MATH-105856	332
Medical Imaging - T-MATH-105861	333
Mixed Integer Programming I - T-WIWI-102719	334
Mixed Integer Programming I and II - T-WIWI-102733	336
Mixed Integer Programming II - T-WIWI-102720	338
Modeling and OR-Software: Advanced Topics - T-WIWI-106200	339
Modeling and OR-Software: Introduction - T-WIWI-106199	340
Modelling, Measuring and Managing of Extreme Risks - T-WIWI-102841	341
Multivariate Statistical Methods - T-WIWI-103124	343
Nature-Inspired Optimisation Methods - T-WIWI-102679	344
Non- and Semiparametrics - T-WIWI-103126	345
Nonlinear Maxwell Equations - T-MATH-106484	346
Nonlinear Optimization I - T-WIWI-102724	347
Nonlinear Optimization I and II - T-WIWI-103637	349
Nonlinear Optimization II - T-WIWI-102725	351
Nonparametric Statistics - T-MATH-105873	353
Numerical Continuation Methods - T-MATH-105912	354
Numerical Methods for Differential Equations - T-MATH-105836	355
Numerical Methods for Hyperbolic Equations - T-MATH-105900	356
Numerical Methods for Integral Equations - T-MATH-105901	357
Numerical Methods for Maxwell's Equations - T-MATH-105920	358
Numerical Methods for Time-Dependent Partial Differential Equations - T-MATH-105899	359
Numerical Methods in Computational Electrodynamics - T-MATH-105860	360
Numerical Methods in Fluid Mechanics - T-MATH-105902	361
Numerical Methods in Mathematical Finance - T-MATH-105865	362
Numerical Methods in Mathematical Finance II - T-MATH-105880	363
Numerical Optimisation Methods - T-MATH-105858	364
Open Innovation - Concepts, Methods and Best Practices - T-WIWI-102901	365
Operations Research in Health Care Management - T-WIWI-102884	367
Operations Research in Supply Chain Management - T-WIWI-102715	368
Optimisation and Optimal Control for Differential Equations - T-MATH-105864	369
Optimization in a Random Environment - T-WIWI-102628	370
Optimization in Banach Spaces - T-MATH-105893	371
Optimization under uncertainty - T-WIWI-106545	372
OR-Oriented Modeling and Analysis of Real Problems (Project) - T-WIWI-102730	373
P&C Insurance Simulation Game - T-WIWI-102797	374
Panel Data - T-WIWI-103127	375
Parametric Optimization - T-WIWI-102855	376
Percolation - T-MATH-105869	377
Poisson Processes - T-MATH-105922	378
Portfolio and Asset Liability Management - T-WIWI-103128	379
Potential Theory - T-MATH-105850	380
Practical Seminar: Health Care Management (with Case Studies) - T-WIWI-102716	381
Predictive Mechanism and Market Design - T-WIWI-102862	382
Principles of Insurance Management - T-WIWI-102603	383

Probability Theory and Combinatorial Optimization - T-MATH-105923	384
Product and Innovation Management - T-WIWI-102812	385
Project Centered Software-Lab - T-MATH-105907	386
Public Management - T-WIWI-102740	387
Quality Control I - T-WIWI-102728	388
Quality Control II - T-WIWI-102729	389
Random Graphs - T-MATH-105929	390
Rational Homotopy Theory - T-MATH-106483	391
Requirements Analysis and Requirements Management - T-WIWI-102759	392
Risk Communication - T-WIWI-102649	393
Semantic Web Technologies - T-WIWI-102874	394
Seminar in Business Administration A (Master) - T-WIWI-103474	396
Seminar in Business Administration B (Master) - T-WIWI-103476	404
Seminar in Economics A (Master) - T-WIWI-103478	412
Seminar in Economics B (Master) - T-WIWI-103477	414
Seminar in Informatics A (Master) - T-WIWI-103479	416
Seminar in Informatics B (Master) - T-WIWI-103480	422
Seminar in Operations Research A (Master) - T-WIWI-103481	427
Seminar in Operations Research B (Master) - T-WIWI-103482	429
Seminar in Statistics A (Master) - T-WIWI-103483	431
Seminar in Statistics B (Master) - T-WIWI-103484	432
Seminar Mathematics - T-MATH-105686	433
Service Oriented Computing - T-WIWI-105801	434
Simulation I - T-WIWI-102627	435
Simulation II - T-WIWI-102703	436
Simulation of Stochastic Systems - T-WIWI-106552	437
Smart Energy Infrastructure - T-WIWI-107464	438
Smart Grid Applications - T-WIWI-107504	439
Sobolev Spaces - T-MATH-105896	440
Social Choice Theory - T-WIWI-102859	441
Software Quality Management - T-WIWI-102895	442
Spatial Economics - T-WIWI-103107	444
Spatial Stochastics - T-MATH-105867	445
Special Functions and Applications in Potential Theory - T-MATH-102274	446
Special Topics of Efficient Algorithms - T-WIWI-102657	447
Special Topics of Enterprise Information Systems - T-WIWI-102676	448
Special Topics of Knowledge Management - T-WIWI-102671	449
Special Topics of Numerical Linear Algebra - T-MATH-105891	450
Special Topics of Software- and Systemsengineering - T-WIWI-102678	451
Spectral Theory - Exam - T-MATH-103414	452
Statistical Modeling of generalized regression models - T-WIWI-103065	453
Stein's Method - T-MATH-105914	454
Stochastic Calculus and Finance - T-WIWI-103129	455
Stochastic Control - T-MATH-105871	457
Stochastic Differential Equations - T-MATH-105852	458
Stochastic Evolution Equations - T-MATH-105910	459
Stochastic Geometry - T-MATH-105840	460
Strategic Brand Management - T-WIWI-102842	461
Strategic Management of Information Technology - T-WIWI-102669	462
Strategy and Management Theory: Developments and "Classics" - T-WIWI-106190	463
Supply Chain Management in the Process Industry - T-WIWI-102860	464
Tactical and Operational Supply Chain Management - T-WIWI-102714	466
Technological Change in Energy Economics - T-WIWI-102694	467
The Riemann Zeta Function - T-MATH-105934	468
Theory of Endogenous Growth - T-WIWI-102785	469
Time Series Analysis - T-MATH-105874	471
Topics in Experimental Economics - T-WIWI-102863	472
Traveling Waves - T-MATH-105897	473

Valuation - T-WIWI-102621	474
Wavelets - T-MATH-105838	475
Web Science - T-WIWI-103112	476
Workflow-Management - T-WIWI-102662	477
Workshop Business Wargaming – Analyzing Strategic Interactions - T-WIWI-106189	479
Workshop Current Topics in Strategy and Management - T-WIWI-106188	480
 VI Anhang: Studien- und Prüfungsordnung SPO 2009	 481
 VII Anhang: Studien- und Prüfungsordnung SPO 2016	 495

About this handbook

1 New Wiwi-modules

M-WIWI-103119 Advanced Topics in Strategy and Management

Responsible: Hagen Lindstädt

Credits: 9

Part of:

- Industrial Engineering and Management Master: Business Administration, Compulsory Elective Modules/Compulsory Modules 1+2/Business Administration
- Economics Engineering Master: Business Administration, Compulsory Elective Modules 1+2/Compulsory Modules/Business Administration
- Information Engineering and Management Master: Economics and Management/Elective Modules in Economics and Management, Economics and Management/Elective Modules in Business Administration
- Economathematics Master: Finance - Risk Management - Managerial Economics, Elective Field

Courses:

- *New:* T-WIWI-106188 Workshop Current Topics in Strategy and Management (3 ECTS)
- *New:* T-WIWI-106189 Workshop Business Wargaming – Analyzing Strategic Interactions (3 ECTS)
- *New:* T-WIWI-106190 Strategy and Management Theory: Developments and “Classics” (3 ECTS)

Prerequisites: None

M-WIWI-103720 eEnergy: Markets, Services and Systems

Responsible: Christof Weinhardt

Credits: 9

Part of:

- Industrial Engineering and Management Master: Business Administration, Compulsory Elective Modules/Compulsory Modules 1+2/Business Administration
- Economics Engineering Master: Business Administration, Compulsory Elective Modules 1+2/Compulsory Modules/Business Administration
- Information Engineering and Management Master: Economics and Management/Elective Modules in Economics and Management, Economics and Management/Elective Modules in Business Administration
- Economathematics Master: Finance - Risk Management - Managerial Economics, Elective Field

Courses:

- *New:* T-WIWI-107501 - Energy Market Engineering (4.5 ECTS)
- *New:* T-WIWI-107503 - Energy Networks and Regulation (4.5 ECTS)
- *New in WS18/19:* T-WIWI-107504 - Smart Grid Applications (4.5 ECTS)

Prerequisites: None

2 Notes and rules

The program exists of several **subjects** (e.g. business administration, economics, operations research). Every subject is split into **modules** and every module itself consists of one or more interrelated **module component exams**. The extent of every module is indicated by credit points (CP), which will be credited after the successful completion of the module. Some of the modules are **obligatory**. According to the interdisciplinary character of the program, a great variety of **individual specialization and deepening possibilities** exists for a large number of modules. This enables the student to customize content and time schedule of the program according to personal needs, interest and job perspective. The **module handbook** describes the modules belonging to the program. It describes particularly:

- the structure of the modules
- the extent (in CP),
- the dependencies of the modules,
- the learning outcomes,
- the assessment and examinations.

The module handbook serves as a necessary orientation and as a helpful guide throughout the studies. The module handbook does not replace the **course catalog**, which provides important information concerning each semester and variable course details (e.g. time and location of the course).

Begin and completion of a module

Each module and each examination can only be selected once. The decision on the assignment of an examination to a module (if, for example, an examination in several modules is selectable) is made by the student at the moment when he / she is registered for the appropriate examination. A module is completed or passed when the module examination is passed (grade 4.0 or better). For modules in which the module examination is carried out over several partial examinations, the following applies: The module is completed when all necessary module partial examinations have been passed. In the case of modules which offer alternative partial examinations, the module examination is concluded with the examination with which the required total credit points are reached or exceeded. The module grade, however, is combined with the weight of the predefined credit points for the module in the overall grade calculation.

Module versions

It is not uncommon for modules to be revised due to, for example, new courses or cancelled examinations. As a rule, a new module version is created, which applies to all students who are new to the module. On the other hand, students who have already started the module enjoy confidence and remain in the old module version. These students can complete the module on the same conditions as at the beginning of the module (exceptions are regulated by the examination committee). The date of the student's "binding declaration" on the choice of the module in the sense of §5(2) of the Study and Examination Regulation is decisive. This binding declaration is made by registering for the first examination in this module.

In the module handbook, all modules are presented in their current version. The version number is given in the module description. Older module versions can be accessed via the previous module handbooks in the archive at http://www.wiwi.kit.edu/Archiv_MHB.php.

General and partial examinations

Module examinations can be either taken in a general examination or in partial examinations. If the module examination is offered as a general examination, the entire learning content of the module will be examined in a single examination. If the module examination is subdivided into partial examinations, the content of each course will be examined in corresponding partial examinations. Registration for examinations can be done online at the campus management portal. The following functions can be accessed on

<https://campus.studium.kit.edu/exams/index.php>:

- Register/unregister for examinations
- Check for examination results
- Create transcript of records

For further and more detailed information, see <https://studium.kit.edu/Seiten/FAQ.aspx>.

Types of exams

Following **SPO 2015** exams are split into written exams, oral exams and alternative exam assessments. Exams are always graded. Non exam assessments can be repeated several times and are not graded. According to **SPO 2007/2009** exams are split into written exams, oral exams and non exam assessments. Non exam assessments are graded or not.

Repeating exams

Principally, a failed written exam, oral exam or alternative exam assessment can be repeated only once. If the repeat examination (including an eventually provided verbal repeat examination) will be failed as well, the examination claim is lost. A request for a second repetition has to be made in written form to the examination committee two months after losing the examination claim. A counseling interview is mandatory.

For further information see <http://www.wiwi.kit.edu/hinweiseZweitwdh.php>.

Additional accomplishments

Additional accomplishments are voluntarily taken exams, which have no impact on the overall grade of the student and can take place on the level of single courses or on entire modules. It is also mandatory to declare an additional accomplishment as such at the time of registration for an exam. Additional accomplishments with at most 30 CP may appear additionally in the certificate.

Further information

More detailed information about the legal and general conditions of the program can be found in the examination regulation of the program (<http://www.sle.kit.edu/amtlicheBekanntmachungen.php>).

3 Online Version

A new webbased version of the module handbook is now available. This online handbook offers more comfort in browsing modules and courses and allows a smart switching between the english and german version. Try it out!

4 Contact

If you have any questions about modules or exams with **WIWI-ID**, please contact the examination office of the KIT Department of Economics and Management:

Ralf Hilser
Anabela Relvas
Phone +49 721 608-43768
E-Mail: pruefungssekretariat@wiwi.kit.edu

If you have any questions about modules or exams with **MATH-ID**, please contact at the KIT Department of Mathematics:

Dr. Bernhard Klar
Telefon +49 721 608-42047
E-Mail: Bernhard.Klar@kit.edu

The screenshot shows a modular structure for the 'Informatik' (Informatics) and 'Smart Energy Distribution' modules.

Informatik (M-WIWI-101472, WI4INFO1):

- Bestandteil in den Fächern:**
 - Informatik
 - Zusatzaufgaben
- Wahlpflichtangebot:** Es müssen zwischen 9 und 10 LP belegt werden.
- Vorläufige Verteilung:**

Kennung	Teilleistung	LP
T-WIWI-102651	Angewandte Informatik II - Informatiksysteme für eCommerce	5
T-WIWI-102655	Effiziente Algorithmen	5
T-WIWI-102657	Spezialvorlesung Effiziente Algorithmen	5
T-WIWI-102658	Algorithms for Internet Applications	5
T-WIWI-102659	Organic Computing	5
T-WIWI-102661	Datenbanksysteme und XML	5
T-WIWI-102662	Workflow-Management	5
T-WIWI-102663	Dokumentenmanagement und Groupwaresysteme	4
T-WIWI-102664	Knowledge Discovery	5
T-WIWI-102667	Management von Informatik-Projekten	5
T-WIWI-102668	Enterprise Architecture Management	5
T-WIWI-102670	Zusatzleis.	5
[Alle Mod]	[Alle Teil]	5
T-WIWI-102671	Spezialvorlesung Wissensmanagement	5
T-WIWI-102676	Spezialvorlesung Betriebliche Informationssysteme	5
T-WIWI-102678	Spezialvorlesung Software- und Systemengineering	5
T-WIWI-102679	Naturinspirierte Optimierungsverfahren	5
T-WIWI-102680	Computational Economics	5
T-WIWI-102759	Anforderungsanalyse und -management	4
T-WIWI-102845	Smart Energy Distribution	4
T-WIWI-102895	Software-Qualitätsmanagement	5
- Hinweise zum Modul:** Eine neue Verwalt. Ende der Nachprüfung soll auch die Veröffentlichung unverzichtbares Platz stehen sollte, hat jedoch Einschränkungen.

Smart Energy Distribution (T-WIWI-102845):

- Bestandteil von:**

Kennung	Modul	LP
M-WIWI-101472	Informatik	9
M-WIWI-101630	Wahlpflicht Informatik	9
M-WIWI-101628	Vertiefung Informatik	9
- Erfolgskontrollen:** Die Prüfung wird für Erstschreiber letztmals im Sommersemester 2016 angeboten. In letztmalige Wiederholungsprüfung wird es im Wintersemester 2016/2017 geben (nur Nachschreiber). In der Regel schriftliche Prüfung, bei zu geringer Zahl an Prüfungsanmeldungen stattdessen eine mündliche Prüfung.
- Empfehlungen:** Informatikkenntnisse sind hilfreich, aber nicht Voraussetzung.
- Anmerkungen:** Diese Vorlesung wird speziell für Studierende des MSc Studiengangs Energietechnik Fakultät für Maschinenbau angeboten. Sie ist aber auch von Studierenden der Masterstudiengänge Wirtschaftsingenieurwesen, TVWL, Informationswirtschaft und Wirtschaftsmathematik wählbar.

Part II

The Master's degree program in Economathematics

1 Study plan according to SPO 2016

Preface

This study plan is intended to supplement and explain the study and examination regulations of the Master's degree program in Economathematics, and to provide students with concrete examples of the organization of their studies.

1. Qualification objectives and profile of the degree program

The interdisciplinary Master's degree program in Economathematics provides the qualification for a professional activity in the areas of industry, banking, insurance, logistics, software development and research. Through the research-oriented training, the graduates are prepared especially for lifelong learning.

Professional key qualifications

Graduates have a broad knowledge of mathematical and economic sciences, including specific methods and techniques in the fields of analysis / numerics / optimization, stochastics, finance / risk management / managerial economics and operations management / data analysis / Informatics. They are able to analyze and explain current, complex questions in these fields. They can use methods from economics and mathematics, combine them and work interdisciplinarily. Based on these methods, they are able to handle practical and research-relevant questions. Graduates have trained analytical thinking and can work independently and reflectively. They are also able to acquire additional knowledge for further questions themselves.

Interdisciplinary qualifications

Graduates can analyze, evaluate and solve problems in new and unfamiliar situations in a multidisciplinary context. They are able to integrate their knowledge independently, deal with high complexity, and they have endurance in solving difficult problems. Graduates are capable of documenting, illustrating and interpreting results which have been obtained. They always take into account social, scientific and ethical conditions. They can argue and defend a position with experts as well as with laymen, on problems and solutions at a scientific level. In addition, they have the ability to work in a team and are able to use their knowledge effectively.

Learning outcomes

The graduates can name, explain and apply deepening mathematical methods in economics. They are also able to identify the application of these methods. The graduates have an understanding of economic processes and can comment on economic issues. They will gain an in-depth understanding of mathematical methods in the fields of analysis / numerics / optimization and stochastics.

2. Structure of the degree program

The courses are held in the form of modules, with most modules consisting of at least one course (with or without an exercise) or a seminar. Each module closes with a learning control. The average workload is measured in credit points (CP). In general, modules are graded. The grade is included in the final score. The master thesis consists of a separate module with 30 CP. In total, 120 credits must be earned in the Master's degree, approximately evenly distributed over four semesters.

The Master's degree in Economathematics is based on the two disciplines *mathematics* and *economics*, which are offered by the department of Mathematics and the department of Economics and Management. Modules from both disciplines must be selected as follows.

1. Subject: Mathematical Methods

There are the following four mathematical fields:

1. Stochastics
2. Applied and Numerical Mathematics / Optimization
3. Analysis
4. Algebra and Geometry

A minimum of 36 credits must be earned, with 8 credits from the field of Stochastics and 8 credits from one of the fields of Analysis or Applied and Numerical Mathematics / Optimization. The remaining credits must be obtained by any examination from the four mathematical fields. The modules belonging to these fields can be found in the module handbook.

2. Subject: Finance - Risk Management - Managerial Economics

18 CP must be acquired. The modules belonging to the three fields can be found in the module handbook.

3. Subject: Operations Management - Data Analysis - Informatics

18 CP must be acquired. The modules belonging to the three fields can be found in the module handbook.

Seminars

Furthermore, two seminar modules with 3 CP have to be taken. Precisely each one has to be chosen from the two disciplines mathematics and economics.

Elective subject

A further 12 credits are to be earned flexibly from the above-mentioned mathematical or economics modules or as a maximum of one seminar in economics. In particular, this gives the possibility of professional deepening in preparation for the Master Thesis. All modules in the elective subject must be graded.

Master Thesis

The master's thesis is usually written in the fourth semester and has 30 credits. Prerequisite for admission to the master's thesis module is that the student successfully completed module examinations of 70 credits. The master's thesis can be supervised in both participating departments and should, as far as possible, deal with a topic relevant to content and methodology for business mathematics / econometrics. A prerequisite is an appropriate deepening in the subject field of the work.

3. Key qualifications

Part of the degree program is also the acquisition of key and interdisciplinary qualifications. This field includes over-arching events on social topics, complementary scientific programs, the application of specialist knowledge in the field of work, competence training for the targeted training of soft skills as well as foreign language training in the scientific context. The master's degree program in Econometrics at the Departments for Mathematics and Economics and Management is characterized by an exceptionally high degree of interdisciplinarity. With the combination of mathematical and economics subjects, the acquisition of knowledge from different disciplines is an integral part of the course. Interdisciplinary thinking in connections is thereby naturally promoted. In addition, the seminars of the Master's degree program contribute significantly to the promotion of the soft skills by the training of scientifically highly qualified editing and presentation of special topics.

The key competences integrally shared within the degree program can be assigned to the following fields:

Basic skills (soft skills)

1. Teamwork, social communication and creativity techniques (for example, working in small groups, working together on the homework and reworking the course material)
2. Presentation creation and techniques
3. Logical and systematic argumentation and writing (for example, in exercises, seminars, courses and writing homework)
4. Structured problem solving and communication

Practice orientation (enabling skills)

1. Empowerment in a professional context
2. Competences in project management
3. Business basic knowledge
4. English as a technical language

Orientation knowledge

1. Mediation of interdisciplinary knowledge
2. Institutional knowledge about economic and legal systems
3. Knowledge about international organizations
4. Media, technology and innovation

Courses that provide the necessary competencies are summarized in the module for key qualifications and are regularly updated in the relevant module description of the module handbook. This list is coordinated with the House of Competence.

4. Exemplary study courses

The following versions are just a few of the many options of available study courses.

Version 1

Semester 1: 30 CP, 5 examinations

Subject 1: Analysis 8 CP, Stochastics 8 CP, choice 5 CP = 21 CP
Subject 2: Finance 1 9 CP (SS) and Insurance Management I 9 CP (WS)

Semester 2: 28 CP, 6 examinations

Subject 1: Choice 6 CP + Choice 4 CP (or 5 + 5 or 7 + 5) = 10 CP
Subject 2: Finance 2 9 CP (WS) or Finance 1 (SS)
Subject 3: Informatics 9 CP

Semester 3: 32 CP, 6 examinations, 1 non exam assessment

Subject 1: choice 5 CP
Subject 3: Stochastic Methods and Simulation 9 CP
Subject 4: 3 CP (Seminar WiWi)
Subject 5: 3 CP (Seminar Math)
Optional compulsory: 8 CP + 4 CP (or other partitioning) = 12 CP

Semester 4: 30 CP

Master Thesis

Version 2

Semester 1: 33 CP, 5 examinations

Subject 1: Analysis 8 CP, Stochastics 8 CP, choice 8 CP = 24 CP

Subject 2: Finance 1 9 CP (SS) and Insurance Management I 9 CP (WS)

Semester 2: 30 CP, 6 examinations

Subject 1: Option 8 CP + choice 4 CP (or other partitioning like 6 + 6 or 7 + 5) = 12 CP

Subject 2: Finance 2 9 CP (WS) or Finance 1 (SS)

Subject 3: Informatics 9 CP

Semester 3: 27 CP, 5 examinations, 1 non exam assessment

Subject 3: Stochastic Methods and Simulation 9 CP

Subject 4: 3 CP (Seminar WiWi)

Subject 5: 3 CP (Seminar Math)

Optional: 8 CP + 4 CP (or other partitioning such as 6 + 6 or 7 + 5) = 12 CP

Semester 4: 30 CP

Master Thesis

Version 3

Semester 1: 30 CP, 5 examinations

Subject 1: Analysis 8 CP, Stochastics 8 CP, choice 5 CP = 21 CP

Subject 2: Finance 1 9 CP

Semester 2: 30 CP, 6 examinations, 1 non exam assessment

Subject 2: Finance 2 9 CP

Subject 3: Informatics 9 CP, Stochastic Methods and Simulation 9 CP = 18 CP

Subject 5: 3 CP (Seminar Math)

semester 3: 30 credits, 5 - 6 examinations (depending on denomination)

Subject 1: Option 15 CP (conceivable in various forms, for example 5 + 5 + 5, 8 + 7, 6 + 4 + 5)

Optional compulsory: 12 CP (e.g., 8 + 4 CP or 9 + 3 CP)

Subject 4: 3 CP (Seminar WiWi)

Semester 4: 30 CP

Master Thesis

Version 4: Start in summer term (with specific possible choices)

Semester 1: 29 CP, 5 examinations

Subject 1: Introduction to Scientific Computing (Numerics and Applied Mathematics) 8 CP, Financial Mathematics in Continuous Time (Stochastics) 8 CP, Time Series (Stochastics) 4 CP = 20 CP

Subject 2: Finance 1: Derivatives 4.5 CP, Asset Pricing 4.5 CP = 9 CP

Semester 2: 30 CP, 5 examinations

Subject 1: Functional Analysis (Analysis) 8 CP, Spatial Stochastics (Stochastics) (8 CP) = 16 CP

Subject 2: Finance 2: Fixed-income securities 4.5 CP, Credit Risks 4.5 CP = 9 CP

Subject 3: Informatics: Algorithms for Internet Applications 5 CP

Semester 3: 31 CP, 6 examinations, 1 non exam assessment

Subject 3: Informatics: Smart Energy Distribution 4 CP

Subject 3: Operations Research in Supply Chain Management and Healthcare Management: Tactical and Operational Supply Chain Management 4.5 CP + Event Discrete Simulation in Production and Logistics 4.5 CP = 9 CP

Subject 4: Seminar WiWi 3 CP (examination)

Subject 5: Seminar Math 3 CP (study performance)

Optional subject: Stochastic Geometry (Stochastics) 8 CP, Generalized Regression Models (Stochastics) 4 CP = 12 CP

Semester 4: 30 CP

Master Thesis

Version 5: Start in summer term (with specific possible choices)

Semester 1: 29 CP, 5 examinations

Subject 1: Introduction to Scientific Computing (Numerics and Applied Mathematics) 8 CP, Financial Mathematics in Continuous Time (Stochastics) 8 CP, Time Series (Stochastics) 4 CP = 20 CP

Subject 2: Finance 1: Derivatives 4.5 CP, Asset Pricing 4.5 CP = 9 CP

Semester 2: 33 CP, 5 examinations, 1 non exam assessment

Subject 1: Functional analysis (analysis) 8 CP, asymptotic stochastics (stochastics) 8 CP = 16 CP

Subject 2: Finance 2: Fixed-income securities 4.5 CP, credit risks 4.5 CP = 9 CP

Subject 3: Informatics: Algorithms for Internet Applications 5 CP

Subject 5: 3 CP (Seminar math) 3 CP (Study performance)

Semester 3: 28 CP, 6 examinations

Subject 3: Informatics: Smart Energy Distribution 4 CP

Subject 3: Operations Research in Supply Chain Management and Health Care Management: Tactical and Operational Supply Chain Management 4.5 CP + Event Discrete Simulation in Production and Logistics 4.5 CP = 9CP

Subject 4: Seminar WiWi 3 CP (examination)

Optional subject: boundary and eigenvalue problems (analysis) 8 CP, generalized regression models (stochastics) 4 CP = 12 CP

Semester 4: 30 CP

Master Thesis

Version 6: Start in winter term (with specific possible choices)

Semester 1: 31.5 CP, 5 examinations

Subject 1: Functional Analysis (Analysis) 8 CP, Financial Mathematics in Discrete Time (Stochastics) 8 CP, Algebra 8 CP = 24 CP

Subject 2: Finance 1: Valuation 4.5 CP

Subject 4: Seminar WiWi 3 CP

Semester 2: 32.5 CP, 6 examinations

Subject 1: Financial Mathematics in Continuous Time (Stochastics) 8 CP, Time Series (Stochastics) 4 CP = 12 CP

Subject 2: Finance 1: Derivatives 4.5 CP

Subject 3: Informatics: Document Management and Groupware Systems 4 CP

Scope: Boundary and eigenvalue problems 8 CP, Generalized regression models (stochastics) 4 CP = 12 CP

semester 3: 26 CP, 5 examination credits, 1 non exam assessment

Subject 2: Finance 2: Financial Intermediation 4.5 CP + eFinance: Information Management for Securities Trading 4.5 CP = 9 CP

Subject 3: Informatics: Algorithms for Internet Applications 5 CP

Subject 3: Operations Research in Supply Chain Management and Healthcare Management: Location Planning and Strategic Supply Chain Management 4.5 CP + Supply Chain Management in the Process Industry 4.5 CP = 9 CP

Subject 5: Seminar Math 3 CP

Semester 4: 30 CP

Master Thesis

Version 7: Start in winter term (with specific possible choices)

Semester 1: 31.5 CP, 5 examinations

Subject 1: Functional Analysis (Analysis) 8 CP, Financial Mathematics in Discrete Time (Stochastics) 8 CP, Algebra 8 CP = 24 CP

Subject 2: Finance 1: Valuation 4.5 CP

Subject 4: Seminar WiWi 3 CP

Semester 2: 32.5 CP, 6 examinations

Subject 1: Financial Mathematics in Continuous Time (Stochastics) 8 CP, Time Series (Stochastics) 4 CP = 12 CP

Subject 2: Finance 1: Derivatives 4.5 CP

Subject 3: Informatics: Document Management and Groupware Systems 4 CP

Compulsory subject: Introduction to scientific computing (numerics and applied mathematics) 8 CP, Generalized Regression Models (Stochastics) 4 CP = 12 CP

Semester 3: 26.5 CP, 5 examinations, 1 non exam assessment

Subject 2: Finance 2: Financial Intermediation 4.5 CP + eFinance: Information Management for Securities Trading 4.5 CP = 9 CP

Subject 3: Informatics: Algorithms for Internet Applications 5 CP

Subject 3: Operations Research in Supply Chain Management and Healthcare Management: Location Planning and Strategic Supply Chain Management 4.5 CP + Supply Chain Management in the Process Industry 4.5 CP = 9 CP

Subject 5: Seminar Math 3 CP

Semester 4: 30 CP

Master Thesis

Version 8: Start in winter term (with specific possible choices)

Semester 1: 31.5 CP, 5 examinations

Subject 1: Functional Analysis (Analysis) 8 CP, Financial Mathematics in Discrete Time (Stochastics) 8 CP, Algebra 8 CP = 24 CP

Subject 2: Finance 1: Valuation 4.5 CP

Subject 4: Seminar WiWi 3 CP

Semester 2: 29.5 CP, 6 examinations

Subject 1: Financial Mathematics in Continuous Time (Stochastics) 8 CP, Time Series (Stochastics) 4 CP = 12 CP

Subject 2: Finance 1: Derivatives 4.5 CP

Subject 3: Informatics: Document Management and Groupware Systems 4 CP + Efficient Algorithms 5 CP = 9 CP

Compulsory subject: Generalized regression models (stochastics) 4 CP

Semester 3: 29 CP, 5 examinations, 1 non exam assessment

Subject 2: Finance 2: Financial Intermediation 4.5 CP + eFinance: Information Management for Securities Trading 4.5 CP = 9 CP

Subject 3: Operations Research in Supply Chain Management: Graph Theory and Advanced Location Models 4.5 CP, Site Planning and Strategic Supply Chain Management 4.5 CP = 9 CP

Subject 5: Seminar Math 3 CP

Required field: differential geometry (algebra and geometry) 8 CP

Semester 4: 30 CP

Master Thesis

Version 9: Start in winter term (with specific possible choices)

Semester 1: 31.5 CP, 5 examinations

Subject 1: Functional Analysis (Analysis) 8 CP, Financial Mathematics in Discrete Time (Stochastics) 8 CP, Algebra 8 CP = 24 CP

Subject 2: Insurance Management I: Insurance Production 4.5 CP

Subject 4: Seminar WiWi 3 CP

Semester 2: 29.5 CP, 6 examinations

Subject 1: Financial Mathematics in Continuous Time (Stochastics) 8 CP, Time Series (Stochastics) 4 CP = 12 CP

Subject 2: Insurance Management I: Insurance Marketing 4.5 CP

Subject 3: Stochastic modeling and optimization: Simulation I 4,5 CP + Simulation II 4,5 CP = 9 CP

Required field: Computer science: Smart Energy Distribution 4 CP

Semester 3: 29 CP, 6 examinations, 1 non exam assessment

Subject 2: Decision-making and game theory: auction theory 4.5 CP + experimental economic research 4,5 CP = 9 CP

Subject 3: Operations Research in Supply Chain Management: Graph Theory and Advanced Location Models 4.5 CP, Site Planning and Strategic Supply Chain Management 4.5 CP = 9 CP

Subject 5: Seminar Math 3 CP

Required field: Informatics: Knowledge Discovery 5 CP + Seminar Informatik B (Master) 3 CP = 8 CP

Semester 4: 30 CP

Master Thesis

2 Study plan according to SPO 2009

Preface

This study plan is intended to supplement and explain the study and examination regulations of the Master's degree program in Economathematics, and to provide students with concrete examples of the organization of their studies.

1. Qualification objectives and profile of the degree program

The interdisciplinary Master's degree program in Economathematics provides the qualification for a professional activity in the fields of industry, banking, insurance, logistics, software development and research. Through the research-oriented training, the graduates are prepared especially for lifelong learning.

Professional key qualifications

Graduates have a broad knowledge of mathematical and economic sciences, including specific methods and techniques in the fields of analysis / numerics / optimization, stochastics, finance / risk management / managerial economics and operations management / data analysis / Informatics. They are able to analyze and explain current, complex questions in these fields. They can use methods from economics and mathematics, combine them and work interdisciplinarily. Based on these methods, they are able to handle practical and research-relevant questions. Graduates have trained analytical thinking and can work independently and reflectively. They are also able to acquire additional knowledge for further questions themselves.

Interdisciplinary qualifications

Graduates can analyze, evaluate and solve problems in new and unfamiliar situations in a multidisciplinary context. They are able to integrate their knowledge independently, deal with high complexity, and they have endurance in solving difficult problems. Graduates are capable of documenting, illustrating and interpreting results which have been obtained. They always take into account social, scientific and ethical conditions. They can argue and defend a position with experts as well as with laymen, on problems and solutions at a scientific level. In addition, they have the ability to work in a team and are able to use their knowledge effectively.

Learning outcomes

The graduates can name, explain and apply deepening mathematical methods in economics. They are also able to identify the application of these methods. The graduates have an understanding of economic processes and can comment on economic topics. They will gain an in-depth understanding of mathematical methods in the fields of analysis / numerics / optimization and stochastics.

In the profile *Financial Engineering*, graduates have a broad knowledge of financial mathematical models and methods as well as financial concepts and concepts. This enables them to analyze complex and innovative tasks in this field and to assess the results.

In the Profile *Operations Research*, graduates acquire a broad knowledge of mathematical and economic models and methods of corporate management. This enables them to analyze complex and innovative tasks in this field and to assess the results.

2. Structure of the degree program

The courses are held in the form of modules, with most modules consisting of at least one course (with or without an exercise) or a seminar. Each module closes with a learning control. The average workload is measured in credit points (CP). In general, modules are graded. The grade is included in the final score. The master thesis consists of a separate module with 30 CP. In total, 120 credits must be gained in the Master's degree, approximately evenly distributed over four semesters.

The Master's degree in Econometrics is based on the two disciplines mathematics and economics, which are offered by the department of Mathematics and the department of Economics and Management. Modules from both disciplines must be selected as follows. Modules from both disciplines must be selected as follows.

Subject Mathematics

There are the following four mathematical fields:

1. Stochastics
2. Applied and Numerical Mathematics / Optimization
3. Analysis
4. Algebra and Geometry

A minimum of 36 credits must be gained, with 8 credits from the field of Stochastics and 8 credits from one of the fields of Analysis or Applied and Numerical Mathematics / Optimization. In the Financial Engineering study profile, there must be a minimum of 8 additional points in the field of Stochastics. The remaining 20 credits (or 12 credits in the study profile of Financial Engineering) must be obtained by any examination from the four mathematical fields.

Subject Business economics

18 CP from each of the two fields must be acquired:

1. Finance - Risk Management - Managerial Economics
2. Operations Management - Data Analysis - Informatics

Seminars

Furthermore, two seminar modules with 3 CP have to be taken. Precisely each one has to be chosen from the two disciplines mathematics and economics.

Elective subject and key qualifications

A further 12 CP are flexible. In particular, this gives the possibility of professional deepening in preparation for the master thesis. At least 8 of the 12 credits have to come from the above-mentioned mathematical or economics modules or from a vocational internship. At least 3 credits must be provided by key qualifications.

Master Thesis

The master's thesis is usually written in the fourth semester and has 30 credits. It can be supervised in both participating departments and should, as far as possible, deal with a topic relevant to content and methodology for econometrics. A prerequisite is an appropriate deepening in the subject field of the work.

3. Definition of the study profile

One of the three possible study profiles *Financial Engineering* or *Operations Research* or *Classical Economic Mathematics* is chosen in the Master's degree in Econometrics. While the last profile offers maximum flexibility in assembling the modules, the two other study profiles are focused on the choice of modules from specific fields. The scope and content for the individual study profiles are specified below. In the field of Mathematics, the module names correspond to the course names, while in Economics and Management usually different courses can be combined into one module. The combinations are described in the module handbook.

Study Profile Financial Engineering

In the study profile *Financial Engineering*, courses from modern Stochastics and Analysis of the Department of Mathematics are combined with method-oriented courses from the financial services offered by the Department of Economics and Management. The special role of stochastics in this course is emphasized by the binding choice of 16 credits from this field from the list below. The compulsory 8 credits in Applied and Numerical Mathematics / Optimization or Analysis should also be taken from the list below. The following lists are also available for the 18 credits from the fields of Finance-Risk Management-Managerial Economics and Operations Management-Data Analysis-Informatics.

Additional modules may be approved upon request to the "Prüfungsausschuss". For the remaining 12 credits from Mathematics, modules can be selected from the entire mathematical offer of the module handbook.

Stochastics (16 CP)

Applied and Numerical Mathematics / Optimization or Analysis (8 CP)

Finance - Risk Management - Managerial Economics (18 CP)

Operations Management - Data Analysis - Informatics (18 CP)

Study Profile Operations Research

In the profile *Operations Research*, courses of modern optimization and high-performance calculations from the Department of Mathematics are combined with method-oriented courses in Operations Research and Data Analysis from the Department of Economics and Management.

The following modules are intended for compulsory 8 credits in Stochastics and / or Applied and Numerical Mathematics / Optimization or Analysis. The following lists are also available for the 18 credits from the fields of Finance-Risk Management-Managerial Economics and Operations Management-Data Analysis-Informatics.

Financial Mathematics in Discrete Time	8 CP
Financial Mathematics in Continuous Time (Stochastics)	8 CP
Statistics	8 CP
Mathematical Statistics	4 CP
Asymptotic Stochastic	8 CP
Nonparametric Statistics	8 CP
Brownian Movement	4 CP
Generalized Regression Models	4 CP
Control of stochastic processes	4 CP
Time series analysis	4 CP
Financial Statistics	4 CP
Lévy Processes	4 CP

Optimization and optimal control for differential equations	4 CP
Numerical Methods for Differential Equations	8 CP
Control of stochastic processes	4 CP
Numerical Methods in Financial Mathematics	8 CP
Numerical Methods in Financial Mathematics II	8 CP
Functional analysis	8 CP
Stochastic differential equations	8 CP
Classical Methods for Partial Differential Equations	8 CP
Control theory	4 CP

Finance 1	9 CP
Finance 2	9 CP
Finance 3	9 CP
Insurance Management I	9 CP
Mathematical and Empirical Finance	9 CP
Economic theory and its application in Finance	9 CP

Informatics	9 CP
Methodical foundations of the OR	9 CP
Mathematical Optimization	9 CP
Stochastic Methods and Simulation	9 CP
Stochastic modeling and optimization	9 CP
Energy industry and technology	9 CP

Additional modules may be approved upon request to the "Prüfungsausschuss". For the remaining 20 credits from Mathematics, modules can be chosen from the entire mathematical offer of the module handbook.

Stochastics (8 CP)

Applied and Numerical Mathematics / Optimization or Analysis (8 CP)

Finance - Risk Management - Managerial Economics (18 CP)

Operations Management - Data Analysis - Informatics (18 CP)

Study profile Classical Econometrics

In the study profile *Classical Econometrics*, the greatest flexibility exists in the choice of modules. Details of the offer can be found in the module handbook.

4. Module Overlaps and Duties

For certain modules, the content overlap is very large. Therefore, the following exclusion rules apply:

- If the module *Markov-Chains* is integrated from the bachelor's mathematics, none of the courses *Stochastic decision models I and II* in the modules *Stochastic Methods and Simulation* and *Stochastic Modeling and Optimization* can be selected.
- If the module *Numerical Optimization Methods* is integrated, none of the courses *Nonlinear Optimization I and II* can be selected in the modules *Methodical Principles of OR* and *Mathematical Optimization*.
- If the module *Game Theory* is integrated into the subject Mathematics, the course *Introduction to the game theory* within the modules *Decision and Game Theory*, *Mathematical Optimization*, *OR in Supply Chain Management* and *Health Care Management* and *Stochastic Modeling and Optimization* may not be selected.

For the module *Energy Economy and Technology*, the assignment of the course *Energy System Analysis* is mandatory for the study program of Econometrics. For the module *Marketing Management*, the assignment of the courses *Product and Innovation Management* and *Market Research* is obligatory for the degree program in Econometrics.

5. Key qualifications

Part of the degree program is also the acquisition of key and interdisciplinary qualifications. This field includes over-arching events on social topics, complementary scientific programs, the application of specialist knowledge in the field of work, competence training for the targeted training of soft skills as well as foreign language training in the scientific context. The master's degree program in Econometrics at the Departments for Mathematics and Economics and Management is characterized by an exceptionally high degree of interdisciplinarity. With the combination of mathematical and economics subjects, the acquisition of knowledge from different disciplines is an integral part of the course. Interdisciplinary thinking in connections is thereby naturally promoted. In addition, the seminars of the Master's degree program contribute significantly to the promotion of the soft skills by the training of scientifically highly qualified editing and presentation of special topics.

The key competences integrally shared within the degree program can be assigned to the following fields:

Basic skills (soft skills)

1. Teamwork, social communication and creativity techniques (for example, working in small groups, working together on the homework and reworking the course material)
2. Presentation creation and techniques
3. Logical and systematic argumentation and writing (for example, in exercises, seminars, courses and writing homework)
4. Structured problem solving and communication

Statistics	8 CP
Mathematical Statistics	4 CP
Asymptotic Stochastic	8 CP
Nonparametric Statistics	8 CP
Brownian Movement	4 CP
Generalized Regression Models	4 CP
Percolation	4 CP
Control of stochastic processes	4 CP
Time series analysis	4 CP

Optimization and optimal control for differential equations	4 CP
Parallel Calculation	5 CP
Numerical optimization methods	8 CP
Control of stochastic processes	4 CP
Functional analysis	8 CP
Variations calculation	8 CP
Classical Methods for Partial Differential Equations	8 CP
Control theory	4 CP
Optimization in Banach spaces	8 CP
Game Theory	4 CP
Graph theory	8 CP
Modeling and numerical simulation in practice	4 CP

Finance 1	9 CP
Finance 2	9 CP
Finance 3	9 CP
Insurance Management I	9 CP
Mathematical and Empirical Finance	9 CP
Decision-making and game theory	9 CP
Innovation and Growth	9 CP
Growth and agglomeration	9 CP
Strategic Management and Organization	9 CP
Microeconomic Theory	9 CP

Informatics	9 CP
Methodical foundations of the OR	9 CP
Mathematical Optimization	9 CP
Applications of the OR	9 CP
OR in Supply Chain Management and Health Care Management	9 CP
Stochastic Methods	Simulation
9 CP	
Stochastic modeling and optimization	9 CP
Energy industry and technology	9 CP
Marketing Management	9 CP

Practice orientation (enabling skills)

1. Empowerment in a professional context
2. Competences in project management
3. Business basic knowledge
4. English as a technical language

Orientation knowledge

1. Mediation of interdisciplinary knowledge
2. Institutional knowledge about economic and legal systems
3. Knowledge about international organizations
4. Media, technology and innovation

In addition to the integrative placement of key qualifications, the additional acquisition of key qualifications with a minimum of 3 credit points is envisaged. Courses that provide the necessary competencies are summarized in the module for key qualifications and are regularly updated in the relevant module description of the module handbook. This list is coordinated with the House of Competence.

3 Finance - Risk Management - Managerial Economics

Identifier	Module	ECTS	Responsibility
M-WIWI-103119	Advanced Topics in Strategy and Management (S. 134)	9	Hagen Lindstädt

M-WIWI-101637	Analytics and Statistics (S. 136)	9	Oliver Grothe
M-WIWI-101504	Collective Decision Making (S. 140)	9	Clemens Puppe
M-WIWI-102970	Decision and Game Theory (S. 141)	9	Clemens Puppe
M-WIWI-103261	Disruptive FinTech Innovations (S. 142)	9	Maxim Ulrich
M-WIWI-101638	Econometrics and Statistics I (S. 143)	9	Melanie Schienle
M-WIWI-101639	Econometrics and Statistics II (S. 144)	9	Melanie Schienle
M-WIWI-101502	Economic Theory and its Application in Finance (S. 146)	9	Kay Mitusch
M-WIWI-103720	eEnergy: Markets, Services and Systems (S. 148)	9	Christof Weinhardt
M-WIWI-101505	Experimental Economics (S. 151)	9	Johannes Philipp Reiß
M-WIWI-101482	Finance 1 (S. 153)	9	Martin Ruckes,Marliese Uhrig-Homburg
M-WIWI-101483	Finance 2 (S. 154)	9	Martin Ruckes,Marliese Uhrig-Homburg
M-WIWI-101480	Finance 3 (S. 156)	9	Martin Ruckes,Marliese Uhrig-Homburg
M-WIWI-101496	Growth and Agglomeration (S. 158)	9	Ingrid Ott
M-WIWI-101478	Innovation and growth (S. 161)	9	Ingrid Ott
M-WIWI-101469	Insurance Management I (S. 163)	9	Ute Werner
M-WIWI-103247	Intelligent Risk and Investment Advisory (S. 165)	9	Maxim Ulrich
M-WIWI-101500	Microeconomic Theory (S. 172)	9	Clemens Puppe

4 Operations Management - Data Analysis - Informatics

Identifier	Module	ECTS	Responsibility
M-WIWI-101413	Applications of Operations Research (S. 138)	9	Stefan Nickel
M-WIWI-101452	Energy Economics and Technology (S. 149)	9	Wolf Fichtner
M-WIWI-101472	Informatics (S. 159)	9	Andreas Oberweis,Harald Sack,York Sure-Vetter,Johann Marius Zöllner
M-WIWI-101490	Marketing Management (S. 166)	9	Martin Klarmann
M-WIWI-101473	Mathematical Programming (S. 168)	9	Oliver Stein
M-WIWI-101414	Methodical Foundations of OR (S. 170)	9	Oliver Stein
M-WIWI-102832	Operations Research in Supply Chain Management (S. 173)	9	Stefan Nickel
M-WIWI-102805	Service Operations (S. 181)	9	Stefan Nickel
M-WIWI-101400	Stochastic Methods and Simulation (S. 183)	9	Karl-Heinz Waldmann
M-WIWI-101454	Stochastic Modelling and Optimization (S. 185)	9	Karl-Heinz Waldmann
M-WIWI-103289	Stochastic Optimization (S. 187)	9	Steffen Rebennack

5

Identifier	Module	ECTS	Responsibility
M-WIWI-102971	Seminar (S. 175)	3	Hagen Lindstädt,Oliver Stein
M-WIWI-102973	Seminar (S. 177)	3	Hagen Lindstädt,Oliver Stein

6 Mathematical Seminar

Identifier	Module	ECTS Responsibility
M-MATH-102730	Seminar (S. 119)	3 Stefan Kühnlein

7 Elective Field

Identifier	Module	ECTS Responsibility
M-MATH-102960	The Riemann Zeta Function (S. 39)	4 Fabian Januszewski
M-MATH-102900	Adaptive Finite Elemente Methods (S. 40)	6 Willy Dörfler
M-MATH-102955	Advanced Inverse Problems: Nonlinearity and Banach Spaces (S. 41)	5 Andreas Rieder
M-MATH-101315	Algebra (S. 42)	8 Frank Herrlich
M-MATH-101724	Algebraic Geometry (S. 43)	8 Frank Herrlich
M-MATH-101725	Algebraic Number Theory (S. 44)	8 Claus-Günther Schmidt
M-MATH-102948	Algebraic Topology (S. 45)	8 Roman Sauer
M-MATH-102953	Algebraic Topology II (S. 46)	8 Roman Sauer
M-MATH-102902	Asymptotic Stochastics (S. 47)	8 Norbert Henze
M-MATH-103259	Bifurcation Theory (S. 48)	5 Rainer Mandel
M-MATH-102871	Boundary and Eigenvalue Problems (S. 49)	8 Wolfgang Reichel
M-MATH-102904	Brownian Motion (S. 50)	4 Nicole Bäuerle
M-MATH-102882	Calculus of Variations (S. 51)	8 Wolfgang Reichel
M-MATH-102870	Classical Methods for Partial Differential Equations (S. 52)	8 Michael Plum
M-MATH-102950	Combinatorics (S. 53)	8 Maria Aksenovich
M-MATH-102940	Comparison Geometry (S. 54)	5 Wilderich Tuschmann
M-MATH-102878	Complex Analysis (S. 55)	8 Christoph Schmoeger
M-MATH-102935	Compressive Sensing (S. 56)	5 Andreas Rieder
M-MATH-102883	Computer-Assisted Analytical Methods for Boundary and Eigenvalue Problems (S. 57)	8 Michael Plum
M-MATH-102860	Continuous Time Finance (S. 58)	8 Nicole Bäuerle
M-MATH-102941	Control Theory (S. 59)	6 Roland Schnaubelt
M-MATH-102864	Convex Geometry (S. 60)	8 Daniel Hug
M-MATH-101317	Differential Geometry (S. 61)	8 Wilderich Tuschmann
M-MATH-102919	Discrete Time Finance (S. 62)	8 Nicole Bäuerle
M-MATH-103080	Dynamical Systems (S. 63)	8 Jens Rottmann-Matthes
M-MATH-102872	Evolution Equations (S. 64)	8 Roland Schnaubelt
M-MATH-102957	Extremal Graph Theory (S. 65)	8 Maria Aksenovich
M-MATH-102939	Extreme Value Theory (S. 66)	4 Vicky Fasen-Hartmann
M-MATH-102891	Finite Element Methods (S. 67)	8 Willy Dörfler, Christian Wieners
M-MATH-103258	Finite group schemes (S. 68)	4 Frank Herrlich, Fabian Januszewski
M-MATH-102956	Forecasting: Theory and Practice (S. 69)	8 Tilmann Gneiting
M-MATH-102873	Fourier Analysis (S. 70)	8 Lutz Weis
M-MATH-101320	Functional Analysis (S. 71)	8 Roland Schnaubelt
M-MATH-102937	Functions of Matrices (S. 72)	8 Volker Grimm
M-MATH-102936	Functions of Operators (S. 73)	6 Volker Grimm
M-MATH-102906	Generalized Regression Models (S. 74)	4 Bernhard Klar
M-MATH-102867	Geometric Group Theory (S. 75)	8 Roman Sauer
M-MATH-102921	Geometric Numerical Integration (S. 76)	6 Tobias Jahnke
M-MATH-102866	Geometry of Schemes (S. 77)	8 Frank Herrlich
M-MATH-102912	Global Differential Geometry (S. 78)	8 Wilderich Tuschmann
M-MATH-101336	Graph Theory (S. 79)	8 Maria Aksenovich

M-MATH-102954	Group Actions in Riemannian Geometry (S. 80)	5	Wilderich Tuschmann
M-MATH-102959	Homotopy Theory (S. 81)	8	Roman Sauer
M-MATH-102874	Integral Equations (S. 82)	8	Frank Hettlich
M-MATH-102943	Introduction into Particulate Flows (S. 83)	3	Willy Dörfler
M-MATH-102949	Introduction to Geometric Measure Theory (S. 84)	6	Steffen Winter
M-MATH-102945	Introduction to Matlab and Numerical Algorithms (S. 85)	5	Daniel Weiß
M-MATH-102889	Introduction to Scientific Computing (S. 86)	8	Willy Dörfler, Tobias Jahnke
M-MATH-102890	Inverse Problems (S. 87)	8	Andreas Kirsch
M-MATH-102952	L2-Invariants (S. 88)	5	Holger Kammeyer
M-MATH-102907	Markov Decision Processes (S. 89)	5	Nicole Bäuerle
M-MATH-102897	Mathematical Methods in Signal and Image Processing (S. 91)	8	Andreas Rieder
M-MATH-103260	Mathematical Methods of Imaging (S. 92)	5	Andreas Rieder
M-MATH-102929	Mathematical Modelling and Simulation in Practise (S. 93)	4	Gudrun Thäter
M-MATH-102909	Mathematical Statistics (S. 94)	4	Bernhard Klar
M-MATH-102885	Maxwell's Equations (S. 95)	8	Andreas Kirsch
M-MATH-102896	Medical Imaging (S. 96)	8	Andreas Rieder
M-MATH-103257	Nonlinear Maxwell Equations (S. 97)	3	Roland Schnaubelt
M-MATH-102910	Nonparametric Statistics (S. 98)	4	Norbert Henze
M-MATH-102944	Numerical Continuation Methods (S. 99)	5	Jens Rottmann-Matthes
M-MATH-102888	Numerical Methods for Differential Equations (S. 100)	8	Willy Dörfler, Tobias Jahnke
M-MATH-102915	Numerical Methods for Hyperbolic Equations (S. 101)	6	Willy Dörfler
M-MATH-102930	Numerical Methods for Integral Equations (S. 102)	8	Tilo Arens
M-MATH-102931	Numerical Methods for Maxwell's Equations (S. 103)	6	Marlis Hochbruck, Tobias Jahnke
M-MATH-102928	Numerical Methods for Time-Dependent Partial Differential Equations (S. 104)	8	Marlis Hochbruck
M-MATH-102894	Numerical Methods in Computational Electrodynamics (S. 105)	6	Willy Dörfler
M-MATH-102932	Numerical Methods in Fluid Mechanics (S. 106)	4	Willy Dörfler, Gudrun Thäter
M-MATH-102901	Numerical Methods in Mathematical Finance (S. 107)	8	Tobias Jahnke
M-MATH-102914	Numerical Methods in Mathematical Finance II (S. 108)	8	Tobias Jahnke
M-MATH-102892	Numerical Optimisation Methods (S. 109)	8	Christian Wieners
M-MATH-102899	Optimisation and Optimal Control for Differential Equations (S. 110)	4	Christian Wieners
M-MATH-102924	Optimization in Banach Spaces (S. 111)	8	Andreas Kirsch
M-MATH-102905	Percolation (S. 112)	6	Günter Last
M-MATH-102922	Poisson Processes (S. 113)	5	Günter Last
M-MATH-102879	Potential Theory (S. 114)	8	Andreas Kirsch
M-MATH-102947	Probability Theory and Combinatorial Optimization (S. 115)	8	Daniel Hug
M-MATH-102938	Project Centered Software-Lab (S. 116)	4	Gudrun Thäter
M-MATH-102951	Random Graphs (S. 117)	6	Matthias Schulte
M-MATH-103256	Rational Homotopy Theory (S. 118)	4	Manuel Amann, Roman Sauer
M-MATH-102926	Sobolev Spaces (S. 120)	5	Andreas Kirsch
M-MATH-102903	Spatial Stochastics (S. 121)	8	Günter Last
M-MATH-101335	Special Functions and Applications in Potential Theory (S. 122)	5	Andreas Kirsch
M-MATH-102920	Special Topics of Numerical Linear Algebra (S. 123)	8	Marlis Hochbruck
M-MATH-101768	Spectral Theory (S. 124)	8	Lutz Weis
M-MATH-102958	Spin Manifolds, Alpha Invariant and Positive Scalar Curvature (S. 125)	5	Wilderich Tuschmann
M-MATH-102946	Stein's Method (S. 126)	5	Matthias Schulte
M-MATH-102908	Stochastic Control (S. 127)	4	Nicole Bäuerle
M-MATH-102881	Stochastic Differential Equations (S. 128)	8	Lutz Weis

8 ADDITIONAL EXAMINATIONS

M-MATH-102942	Stochastic Evolution Equations (S. 129)	8	Lutz Weis
M-MATH-102865	Stochastic Geometry (S. 130)	8	Daniel Hug
M-MATH-102911	Time Series Analysis (S. 131)	4	Bernhard Klar
M-MATH-102927	Traveling Waves (S. 132)	6	Jens Rottmann-Matthes
M-MATH-102895	Wavelets (S. 133)	8	Andreas Rieder
M-WIWI-103119	Advanced Topics in Strategy and Management (S. 134)	9	Hagen Lindstädt

Learning Control / Examinations

The final grade is given based on the written final exam (3h).

By successfully working on the problem sets, a bonus can be obtained. If the grade in the final written exam is between 4,0 and 1,3, then the bonus improves the grade by one step (0,3 or 0,4).

Conditions

none

Qualification Objectives

The students understand, describe, and use fundamental notions and techniques in combinatorics. They can analyze, structure, and formally describe typical combinatorial questions. The students can use the results and methods such as inclusion-exclusion, generating functions, Young tableaux, as well as the developed proof ideas, in solving combinatorial problems. In particular, they can analyze the existence and the number of ordered and unordered arrangements of a given size. The students understand and critically use the combinatorial methods. Moreover, the students can communicate using English technical terminology.

Content

The course is an introduction into combinatorics. Starting with counting problems and bijections, classical methods such as inclusion-exclusion principle and generating functions are discussed. Further topics include Catalan families, permutations, Young tableaux, partial orders, and combinatorial designs.

Remarks

- Regular cycle: every 2nd year, summer semester
- Course is held in English

Qualification Objectives

The students

- know fundamental combinatorial, geometric and analytic properties of convex sets and convex functions and apply these to related problems,
- are familiar with fundamental geometric and analytic inequalities for functionals of convex sets and their applications to geometric extremal problems and can present central ideas and techniques of proofs,
- know selected integral formulas for convex sets and the required results on invariant measures.
- know how to work self-organized and self-reflexive.

Content

1. Convex Sets
 - 1.1. Combinatorial Properties
 - 1.2. Support and Separation Properties
 - 1.3. Extremal Representations
2. Convex Functions
 - 2.1. Basic Properties
 - 2.2. Regularity
 - 2.3. Support Function
3. Brunn-Minkowski Theory
 - 3.1. Hausdorff Metric
 - 3.2. Volume and Surface Area
 - 3.3. Mixed Volumes
 - 3.4. Geometric Inequalities
 - 3.5. Surface Area Measures
 - 3.6. Projection Functions
4. Integralgeometric Formulas
 - 4.1. Invariant Measures
 - 4.2. Projection and Section Formulas

Learning Control / Examinations

The final grade is given based on an oral exam (approx. 30 min.).

Qualification Objectives

The students understand, describe, and use fundamental notions and techniques in extremal graph theory. They can analyze, structure, and formally describe typical combinatorial questions. The students understand and use Szemerédi's regularity lemma and Szemerédi's theorem, can use probabilistic techniques, such as dependent random choice and multistep random colorings, know the best bounds for the extremal numbers of complete graphs, cycles, complete bipartite graphs, and bipartite graphs with bounded maximum degree. They understand and can use the Ramsey theorem for graphs and hypergraphs, as well as stepping-up techniques for bounding Ramsey numbers. Moreover, the students know and understand the behavior of Ramsey numbers for graphs with bounded maximum degree. The students can communicate using English technical terminology.

Content

The course is concerned with advanced topics in graph theory. It focuses on the areas of extremal functions, regularity, and Ramsey theory for graphs and hypergraphs. Further topics include Turán's theorem, Erdős-Stone theorem, Szemerédi's lemma, graph colorings and probabilistic techniques.

Recommendations

Basic knowledge of linear algebra, analysis and graph theory is recommended.

Remarks

Course is held in English

Qualification Objectives

The students understand, describe and use fundamental notions and techniques in graph theory. They can represent the appropriate mathematical questions in terms of graphs and use the results such as Menger's theorem, Kuratowski's theorem, Turan's theorem, as well as the developed proof ideas, to solve these problems. The students can analyze graphs in terms of their characteristics such as connectivity, planarity, and chromatic number. They are well positioned to understand graph theoretic methods and use them critically. Moreover, the students can communicate using English technical terminology.

Content

The course Graph Theory treats the fundamental properties of graphs, starting with basic ones introduced by Euler and including the modern results obtained in the last decade. The following topics are covered: structure of trees, paths, cycles and walks in graphs, minors, unavoidable subgraphs in dense graphs, planar graphs, graph coloring, Ramsey theory, and regularity in graphs.

Remarks

- Regular cycle: every 2nd year, winter semester
- Course is held in English

Content

- Short introduction to nonlinear contraction semigroups in Hilbert spaces and to the spaces $H(\text{curl})$ and $H(\text{div})$.
- Semilinear case:
Maxwell's equations with linear material laws and nonlinear conductivity. Wellposedness by means of maximal monotone operators. Long-term behavior.
- Quasilinear case:
Maxwell's equations with nonlinear instantaneous material laws. Local wellposedness on the whole space via linearisation, apriori estimates and regularization. Blow-up examples. Outlook to results on domains.

Qualification Objectives

The students know about important properties of the Poisson process. The focus is on probabilistic methods and results which are independent of the specific phase space. The students understand the central role of the Poisson process as a specific point process and as a random measure.

Content

- Distributional properties of Poisson processes
- The Poisson process as a particular point process
- stationary Poisson and point processes
- Random measures and Cox processes
- Poisson cluster processes and compound Poisson processes
- The spatial Gale-Shapley algorithm

Qualification Objectives

The students are familiar with some basic spatial stochastic processes. They do not only understand how to deal with general properties of distributions, but also know how to describe and apply specific models (Poisson process, Gaussian random fields). They know how to work self-organised and self-reflexive.

Content

- Point processes
- Random measures
- Poisson processes
- Gibbs point processes
- Ralm distributions
- Spatial ergodic theorem
- Spectral Theory of random fields
- Gaussian fields

Qualification Objectives

The students

- know the fundamental geometric models and characteristics in stochastic geometry,
- are familiar with properties of Poisson processes of geometric objects,
- know examples of applications of models of stochastic geometry,
- know how to work self-organised and self-reflexive.

Content

- Random Sets
- Geometric Point Processes
- Stationarity and Isotropy
- Germ Grain Models
- Boolean Models
- Foundations of Integral Geometry
- Geometric densities and characteristics
- Random Tessellations

Recommendations

It is recommended to attend the module 'Spatial Stochastics' previously.

T-WIWI-106188	Workshop Current Topics in Strategy and Management (S. 480)	3	Hagen Lindstädt
T-WIWI-106189	Workshop Business Wargaming – Analyzing Strategic Interactions (S. 479)	3	Hagen Lindstädt
T-WIWI-106190	Strategy and Management Theory: Developments and "Classics" (S. 463)	3	Hagen Lindstädt

Learning Control / Examinations

The assessment is carried out as partial exams (according to Section 4 (2), 1-3 SPO) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

None

Qualification Objectives

Students

- are able to analyze business strategies and derive recommendations using appropriate frameworks
- learn to express their position through compelling reasoning in structured discussions
- are qualified to critically examine recent research topics in the field of strategic management
- can derive own conclusions from less structured information by using interdisciplinary knowledge

Content

The module is divided into three main topics:

The students

- analyze and discuss a wide range of business strategies on the basis of collectively selected case studies.
- participate in a business wargaming workshop and analyze strategic interactions.
- write a paper about current topics in the field of strategic management theory.

Recommendations

None

Remarks

This course is admission restricted. After being admitted to one course of this module, the participation at the other courses will be guaranteed.

Every course of this module will be at least offered every second term. Thus, it will be possible to complete the module within two terms.

This module will be offered for the first time in the winter term 2017/18.

M Module: Analytics and Statistics [M-WIWI-101637]

Responsibility: Oliver Grothe
Organisation: KIT-Fakultät für Wirtschaftswissenschaften
Curricular Anchorage: Compulsory Elective
Contained in: Finance - Risk Management - Managerial Economics
Elective Field
Additional Examinations

Learning Control / Examinations

The assessment is carried out as partial written exams (according to Section 4(2), 1 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The examinations are offered every semester. Re-examinations are offered at every ordinary examination date. The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

The course "Advanced Statistics" is compulsory.

Qualification Objectives

A Student

- Deepens the knowledge of descriptive and inferential statistics.
- Deals with simulation methods.
- Learns basic and advanced methods of statistical analysis of multivariate and high-dimensional data.

Content

- Deriving estimates and testing hypotheses
- Stochastic processes
- Multivariate statistics, copulas
- Dependence measures
- Dimension reduction
- High-dimensional methods
- Prediction

Remarks

New module starting winter term 2015/2016.

The planned lectures and courses for the next three years are announced online.

Workload

The total workload for this module is approximately 270 hours.

M Module: Applications of Operations Research [M-WIWI-101413]

T-WIWI-106545	Optimization under uncertainty (S. 372)	5	Steffen Rebennack

Learning Control / Examinations

The assessment is carried out as partial exams (according to § 4(2), 1 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module.

The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

At least one of the courses *Facility Location and strategic Supply Chain Management* and *Tactical and operational Supply Chain Management* has to be taken.

Qualification Objectives

The student

- is familiar with basic concepts and terms of Supply Chain Management,
- knows the different areas of Supply Chain Management and their respective optimization problems,
- is acquainted with classical location problem models (in the plane, on networks and discrete) as well as fundamental methods for distribution and transport planning, inventory planning and management,
- is able to model practical problems mathematically and estimate their complexity as well as choose and adapt appropriate solution methods.

Content

Supply Chain Management is concerned with the planning and optimization of the entire, inter-company procurement, production and distribution process for several products taking place between different business partners (suppliers, logistics

service providers, dealers). The main goal is to minimize the overall costs while taking into account several constraints including the satisfaction of customer demands.

This module considers several areas of Supply Chain Management. On the one hand, the determination of optimal locations within a supply chain is addressed. Strategic decisions concerning the location of facilities like production plants, distribution centers or warehouses are of high importance for the rentability of supply chains. Thoroughly carried out, location planning tasks allow an efficient flow of materials and lead to lower costs and increased customer service. On the other hand, the planning of material transport in the context of Supply Chain Management represents another focus of this module. By linking transport connections and different facilities, the material source (production plant) is connected with the material sink (customer). For given material flows or shipments, it is considered how to choose the optimal (in terms of minimal costs) distribution and transportation chain from the set of possible logistics chains, which asserts the compliance of delivery times and further constraints.

Furthermore, this module offers the possibility to learn about different aspects of the tactical and operational planning level in Supply Chain Management, including methods of scheduling as well as different approaches in procurement and distribution logistics. Finally, issues of warehousing and inventory management will be discussed.

Recommendations

The courses Introduction to Operations Research I and II are helpful.

Remarks

The examination Simulation I will be offered latest until winter term 2016/2017 (for beginners).

The planned lectures and courses for the next three years are announced online.

M Module: Collective Decision Making [M-WIWI-101504]

Responsibility: Clemens Puppe
Organisation: KIT-Fakultät für Wirtschaftswissenschaften

Learning Control / Examinations

The assessment is carried out as partial exams (according to Section 4(2), 1 or 2 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

None

Qualification Objectives

Students

- are able to model practical problems of the public sector and to analyze them with respect to positive and normative questions,
- understand individual incentives and social outcomes of different institutional designs,
- are familiar with the functioning and design of democratic elections and can analyze them with respect to their individual incentives.

Content

The focus of the module is on mechanisms of public decisions making, including voting and the aggregation of preferences and judgements.

Workload

The total workload for this module is approximately 270 hours. For further information see German version.

M Module: Decision and Game Theory [M-WIWI-102970]

Responsibility: Clemens Puppe
Organisation: KIT-Fakultät für Wirtschaftswissenschaften
Curricular Anchorage: Compulsory Elective
Contained in: Finance - Risk Management - Managerial Economics
Elective Field
Additional Examinations

T-WIWI-102861	Advanced Game Theory (S. 191)	4,5	Karl-Martin Ehrhart, Clemens Puppe, Johannes Philipp Reiß

Learning Control / Examinations

The assessment is carried out as partial exams (according to Section 4(2), 1 or 2 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

None

Qualification Objectives

The student learns the basics of individual and strategic decisions on an advanced and formal level.

He learns to analyze economic problems through abstract and method-based thinking and to design solution strategies. In the tutorials, the concepts and results of the lecture will be applied in case studies.

Content

See German version.

Workload

The total workload for this module is approximately 270 hours. For further information see German version.

M Module: Disruptive FinTech Innovations [M-WIWI-103261]

Responsibility: Maxim Ulrich
Organisation: KIT-Fakultät für Wirtschaftswissenschaften
Curricular Anchorage: Compulsory Elective
Contained in: Finance - Risk Management - Managerial Economics
Elective Field

ECTS	Recurrence	Duration	Language	Version
9	Each summer term	1 term	English	1

T-WIWI-106495	Automated Financial Advisory (S. 209)	3	Maxim Ulrich

Learning Control / Examinations

The assessment is carried out as partial exams (according to Section 4(2), 1 or 2 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The assessment procedures are described for each course of the module separately. The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

None.

Qualification Objectives

Students with a strong technological background and/or a strong interest for software development and investments will learn how to build a prototype that automates essential steps for a fully automated investment and risk management process. Students also learn to organize themselves efficiently in teams of several developers in order to complete a prototype in a limited amount of time. Moreover, students deepen their understanding of finance and technology and learn how to combine both in an effective way. Students will hence be well prepared to become leaders and pioneers for upcoming FinTech innovations (and beyond) to help society to better invest for the future and to better protect from adverse risks.

T-WIWI-103065	Statistical Modeling of generalized regression models (S. 453)	4,5	Wolf-Dieter Heller

Learning Control / Examinations

The assessment is carried out as partial written exams (according to Section 4(2), 1 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The examinations are offered every semester. Re-examinations are offered at every ordinary examination date. The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

The course "Advanced Statistics" [2520020] is compulsory and must be examined.

The course Financial Econometrics [2520022] can only be passed if the course Time Series Analysis in the module Time Series Analysis and the course Generalized Regression Models in the module Generalized Regression Models have not been passed.

Qualification Objectives

The student shows an in depth understanding of advanced Econometric techniques suitable for different types of data. He/She is able to apply his/her theoretical knowledge to real world problems with the help of statistical software and to evaluate performance of different approaches based on statistical criteria.

Content

The courses of this module offer students a broad range of advanced Econometric techniques for state-of-the art data analysis.

Workload

The total workload for this module is approximately 270 hours.

The examinations are offered every semester. Re-examinations are offered at every ordinary examination date. The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

This module can only be passed if the module "*Econometrics and Statistics I*" has been finished successfully before. The course Financial Econometrics [2520022] can only be passed if the course Time Series Analysis in the module Time Series Analysis and the course Generalized Regression Models in the module Generalized Regression Models have not been passed.

Modeled Conditions

The following conditions must be met:

- The module [M-WIWI-101638] *Econometrics and Statistics I* must have been started.

Qualification Objectives

The student shows an in depth understanding of advanced Econometric techniques suitable for different types of data. He/She is able to apply his/her theoretical knowledge to real world problems with the help of statistical software and to evaluate performance of different approaches based on statistical criteria.

Content

This modula builds on prerequisites acquired in Module "*Econometrics and Statistics I*". The courses of this module offer students a broad range of advanced Econometric techniques for state-of-the art data analysis.

Workload

The total workload for this module is approximately 270 hours.

M Module: Economic Theory and its Application in Finance [M-WIWI-101502]

T-WIWI-102861	Advanced Game Theory (S. 191)	4,5	Karl-Martin Ehrhart, Clemens Puppe, Johannes Philipp Reiß

Learning Control / Examinations

The assessment is carried out as partial exams (according to Section 4(2), 1 or 2 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The exams are offered at the beginning of the recess period about the subject matter of the latest held lecture. Re-examinations are offered at every ordinary examination date. The assessment procedures are described for each course of the module separately. The overall grade for the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

One of the courses T-WIWI-102861 "Advanced Game Theory" and T-WIWI-102609 "Advanced Topics in Economic Theory" is compulsory.

Qualification Objectives

The students

- have learnt the methods of formal economic modeling, particularly of General Equilibrium Theory and contract theory
- will be able to apply these methods to the topics in Finance, specifically the areas of financial markets and institutions and corporate finance
- have gained many useful insights into the relationship between firms and investors and the functioning of financial markets

Content

The mandatory course "Advanced Topics in Economic Theory" is devoted in equal parts to General Equilibrium Theory

and to contract theory. The course “Asset Pricing” will apply techniques of General Equilibrium Theory to valuation of financial assets. The courses “Corporate Financial Policy” and “Finanzintermediation” will apply the techniques of contract theory to issues of corporate finance and financial institutions.

Workload

The total workload for this module is approximately 270 hours. For further information see German version.

M Module: eEnergy: Markets, Services and Systems [M-WIWI-103720]

Learning Control / Examinations

The assessment is carried out as partial exams (according to Section 4 (2), 1-3 SPO) of single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The assessment procedures are described for each course of the module separately. The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

None.

Qualification Objectives

The student

- is aware of design options for energy and especially electricity markets and can derive implications for the market results from the market design,
- knows about current trends regarding the Smart Grid and understands affiliated modelling approaches,
- can evaluate business models of electricity grids according to the regulation regime
- is prepared for scientific contributions in the field of energy system analysis.

Content

The module conveys scientific and practical knowledge to analyse energy markets and according business models. To do so the scientific discussion on energy market designs is evaluated and analysed. Different energy market models are presented and their design implications are evaluated. Furthermore, the electricity system is analysed with regards to being a network industry and resulting regulation and business models are discussed. Besides these traditional areas of energy economics we will look at methods and models of digitalisation in the energy sector.

Remarks

The lecture Smart Grid Applications will be available starting in the winter term 2018/19.

Workload

The total workload for this module is approximately 270 hours. For further information see German version.

The assessment is carried out as partial written exams (according to Section 4(2), 1 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The examinations take place every semester. Re-examinations are offered at every ordinary examination date. The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal. Additional courses might be accredited upon request.

Conditions

To integrate the module "Energy Economics and Technology" in the degree programme "Wirtschaftsmathematik" it is compulsory to choose the course „Energy Systems Analysis“.

Qualification Objectives

The student

- gains detailed knowledge about present and future energy supply technologies (focus on final energy carriers electricity and heat),
- knows the techno-economic characteristics of plants for energy provision, for energy transport as well as for energy distribution and demand,
- is able to assess the environmental impact of these technologies.

Content

Strategical Aspects of Energy Economy: Long-term planning methods, generation technologies

Technological Change in Energy Economics: Future energy technologies, learning curves, energy demand

Heat Economy: district heating, heating technologies, reduction of heat demand, statutory provisions

Energy Systems Analysis: Interdependencies in energy economics, energy systems modelling approaches in energy economics

Energy and Environment: emission factors, emission reduction measures, environmental impact

Efficient Energy Systems and Electric Mobility: concepts and current trends in energy efficiency, Overview of and economical, ecological and social impacts through electric mobility

Workload

The total workload for this module is approximately 270 hours. For further information see German version.

M Module: Experimental Economics [M-WIWI-101505]

Responsibility: Johannes Philipp Reiß
Organisation: KIT-Fakultät für Wirtschaftswissenschaften
Curricular Anchorage: Compulsory Elective
Contained in: Finance - Risk Management - Managerial Economics
Elective Field
Additional Examinations

ECTS	Language	Version
9	German	3

Wahlpflichtangebot

Non-Compulsory Block; You must choose 2 courses.

Identifier	Course	ECTS	Responsibility
T-WIWI-102862	Predictive Mechanism and Market Design (S. 382)	4,5	Johannes Philipp Reiß
T-WIWI-102863	Topics in Experimental Economics (S. 472)	4,5	Johannes Philipp Reiß
T-WIWI-105781	Incentives in Organizations (S. 296)	4,5	Petra Nieken
T-WIWI-102614	Experimental Economics (S. 265)	4,5	Timm Teubner, Christof Weinhardt

Learning Control / Examinations

The assessment is carried out as partial exams (according to Section 4 (2), 1-3 SPO) of the core course and further single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

None.

Qualification Objectives

Students

- are acquainted with the methods of Experimental Economics along with its strengths and weaknesses;
- understand how theory-guided research in Experimental Economics interacts with the development of theory;
- are provided with foundations in data analysis;
- design an economic experiment and analyze its outcome.

Content

The module Experimental Economics offers an introduction into the methods and topics of Experimental Economics. It also fosters and extends knowledge in theory-guided experimental economics and its interaction with theory development. Throughout the module, readings of selected papers are required.

Recommendations

Basic knowledge in mathematics, statistics, and game theory is assumed.

Remarks

- The course *Advanced Game Theory* is not offered before Winter 2014/15.
- The course *Predictive Mechanism and Market Design* is not offered each year.

Workload

The total workload for this module is approximately 270 hours. For further information see German version.

M Module: Finance 1 [M-WIWI-101482]

Responsibility: Martin Ruckes, Marliese Uhrig-Homburg
Organisation: KIT-Fakultät für Wirtschaftswissenschaften
Curricular Anchorage: Compulsory Elective
Contained in: Finance - Risk Management - Managerial Economics
Elective Field
Additional Examinations

ECTS	Recurrence	Duration	Version
9	Each term	1 term	1

Wahlpflichtangebot

Non-Compulsory Block; You must choose 9 credits.

Identifier	Course	ECTS	Responsibility
T-WIWI-102643	Derivatives (S. 246)	4,5	Marliese Uhrig-Homburg
T-WIWI-102621	Valuation (S. 474)	4,5	Martin Ruckes
T-WIWI-102647	Asset Pricing (S. 206)	4,5	Martin Ruckes, Marliese Uhrig-Homburg

Learning Control / Examinations

The assessment is carried out as partial exams (according to Section 4(2), 1 or 2 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

None

Qualification Objectives

The student

- has core skills in economics and methodology in the field of finance
- assesses corporate investment projects from a financial perspective
- is able to make appropriate investment decisions on financial markets

Content

The courses of this module equip the students with core skills in economics and methodology in the field of modern finance. Securities which are traded on financial and derivative markets are presented, and frequently applied trading strategies are discussed. A further focus of this module is on the assessment of both profits and risks in security portfolios and corporate investment projects from a financial perspective.

Workload

The total workload for this module is approximately 270 hours. For further information see German version.

M Module: Finance 2 [M-WIWI-101483]

Responsibility: Martin Ruckes, Marliese Uhrig-Homburg
Organisation: KIT-Fakultät für Wirtschaftswissenschaften

Learning Control / Examinations

The assessment is carried out as partial exams (according to Section 4(2), 1 or 2 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

It is only possible to choose this module in combination with the module *Finance 1*. The module is passed only after the final partial exam of *Finance 1* is additionally passed.

Modeled Conditions

The following conditions must be met:

- The module [M-WIWI-101482] *Finance 1* must have been started.

Qualification Objectives

The student is in a position to discuss, analyze and provide answers to advanced economic and methodological issues in the field of modern finance.

Content

The module Finance 2 is based on the module Finance 1. The courses of this module equip the students with advanced skills in economics and methodology in the field of modern finance on a broad basis.

Remarks

The courses *eFinance: Information Engineering and Management for Securities Trading* [2540454] and *Financial Analysis* [2530205] can be chosen from summer term 2015 on.

Workload

The total workload for this module is approximately 270 hours. For further information see German version.

M Module: Growth and Agglomeration [M-WIWI-101496]

Responsibility: Ingrid Ott

Organisation: KIT-Fakultät für Wirtschaftswissenschaften

Curricular Anchorage: Compulsory Elective

Contained in: Finance - Risk Management - Managerial Economics

Elective Field

Additional Examinations

ECTS	Recurrence	Duration	Version
9	Each term	1 term	2

Wahlpflichtangebot

Non-Compulsory Block; You must choose 9 credits.

Identifier	Course	ECTS	Responsibility
T-WIWI-102785	Theory of Endogenous Growth (S. 469)	4,5	Ingrid Ott
T-WIWI-103107	Spatial Economics (S. 444)	4,5	Ingrid Ott

Learning Control / Examinations

The assessment is carried out as partial written exams (see the lectures descriptions).

The overall grade for the module is the average of the grades for each course weighted by the credits.

Conditions

None

Qualification Objectives

The student

- gains deepened knowledge of micro-based general equilibrium models
- understands how based on individual optimizing decisions aggregate phenomena like economic growth or agglomeration (cities / metropolises) result
- is able to understand and evaluate the contribution of these phenomena to the development of economic trends
- can derive policy recommendations based on theory

Content

The module includes the contents of the lectures *Endogenous Growth Theory* [2561503], *Spatial Economics* [2561260] and *International Economic Policy* [2560254]. While the first two lectures have a more formal-analytic focus, the third lecture approaches fundamental ideas and problems from the field of international economic policy from a more verbal perspective.

The common underlying principle of all three lectures in this module is that, based on different theoretical models, economic policy recommendations are derived.

Recommendations

Attendance of the course *Introduction Economic Policy* [2560280] is recommended.

Successful completion of the courses *Economics I: Microeconomics* and *Economics II: Macroeconomics* is required.

Workload

The total workload for this module is approximately 270 hours. For further information see German version.

M Module: Informatics [M-WIWI-101472]

Responsibility: Andreas Oberweis, Harald Sack, York Sure-Vetter, Johann Marius Zöllner

Learning Control / Examinations

The assessment is carried out as partial exams (according to Section 4(2) of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. For passing the module exam in every singled partial exam the respective minimum requirements has to be achieved.

The examinations are offered every semester. Re-examinations are offered at every ordinary examination date. The assessment procedures are described for each course of the module separately.

When every singled examination is passed, the overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Please note the following information about the module component exams of Prof. Dr. H. Schmeck:

The examinations in Algorithms for Internet Applications [T-WIWI-102658], Efficient Algorithms [T-WIWI-102655], Organic Computing [T-WIWI-102659] and Smart Energy Distribution [T-WIWI-102845] are offered latest until summer term 2017 (repeaters only).

Conditions

It is only allowed to choose one lab.

Qualification Objectives

The student

- has the ability to master methods and tools in a complex discipline and to demonstrate innovativeness regarding the methods used,
- knows the principles and methods in the context of their application in practice,
- is able to grasp and apply the rapid developments in the field of computer science, which are encountered in work life, quickly and correctly, based on a fundamental understanding of the concepts and methods of computer science,
- is capable of finding and defending arguments for solving problems.

Content

The thematic focus will be based on the choice of courses in the areas of Effiziente Algorithmen, Betriebliche Informations- und Kommunikationssysteme, Wissensmanagement, Komplexitätsmanagement and Software- und Systems Engineering.

Remarks

The course "Document Management and Groupware Systems" expires after summer term 2017. Last examination date is winter term 2017/2018 (only for repeaters).

Workload

The total workload for this module is approximately 270 hours. For further information see German version.

M Module: Innovation and growth [M-WIWI-101478]

Responsibility: Ingrid Ott
Organisation: KIT-Fakultät für Wirtschaftswissenschaften
Curricular Anchorage: Compulsory Elective
Contained in: Finance - Risk Management - Managerial Economics
Elective Field
Additional Examinations

ECTS	Recurrence	Duration	Version
9	Each term	1 term	2

Wahlpflichtangebot

Non-Compulsory Block; You must choose between 9 and 10 credits.

Identifier	Course	ECTS	Responsibility
T-WIWI-102840	Innovationtheory and -Policy (S. 300)	4,5	Ingrid Ott
T-WIWI-102785	Theory of Endogenous Growth (S. 469)	4,5	Ingrid Ott

Learning Control / Examinations

The assessment is carried out as partial written exams (according to Section 4(2), 1 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The exams are offered at the beginning of the recess period about the subject matter of the latest held lecture. Re-examinations are offered at every ordinary examination date. The assessment procedures are described for each course of the module separately.

The overall grade for the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

None

Qualification Objectives

Students shall be given the ability to

- know the basic techniques for analyzing static and dynamic optimization models that are applied in the context of micro-and macroeconomic theories
- understand the important role of innovation to the overall economic growth and welfare
- identify the importance of alternative incentive mechanisms for the emergence and dissemination of innovations
- explain, in which situations market interventions by the state, for example taxes and subsidies, can be legitimized, and evaluate them in the light of economic welfare

Content

The module includes courses that deal with issues of innovation and growth in the context of micro-and macroeconomic theories. The dynamic analysis makes it possible to analyze the consequences of individual decisions over time, and sheds light on the tension between static and dynamic efficiency in particular. In this context is also analyzed, which policy is appropriate to carry out corrective interventions in the market and thus increase welfare in the presence of market failure.

Recommendations

Basic knowledge of micro- and macroeconomics is assumed, as taught in the courses Economics I [2600012], and Economics II [2600014]. In addition, an interest in quantitative-mathematical modeling is required.

Workload

Total expenditure of time for 9 credits: 270 hours

Attendance time per lecture: 3x14h

Preparation and wrap-up time per lecture: 3x14h

Rest: Exam Preparation

The exact distribution is subject to the credits of the courses of the module.

M Module: Insurance Management I [M-WIWI-101469]

Responsibility: Ute Werner

Organisation: KIT-Fakultät für Wirtschaftswissenschaften

Curricular Anchorage: Compulsory Elective

Contained in: Finance - Risk Management - Managerial Economics

T-WIWI-106193	Engineering FinTech Solutions (S. 261)	4,5	Maxim Ulrich

Learning Control / Examinations

The assessment is carried out as partial exams (according to Section 4(2), 1 or 2 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The assessment procedures are described for each course of the module separately. The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

None.

Qualification Objectives

Students obtain a practical and yet research oriented introduction into the field of quantitative and computational risk and investment management. Students learn how to use concepts from computer science, statistics, OR and economics to build intelligent risk and investment systems. Based on personal preferences, students can specialize within the module on either more practical programming and statistical learning points or more on the economic and mathematical insights and intuition.

After successful completion of the module, students know the industry intuition as well as state-of-the-art academic 'financial engineering' methods necessary to successfully contribute to sustainable and value oriented innovations in the field of intelligent risk and investment advisory.

T-WIWI-102842	Strategic Brand Management (S. 461)	1,5	Joachim Blickhäuser, Martin Klarmann

Learning Control / Examinations

The assessment is carried out as partial exams (according to Section 4 (2), 1-3 SPO) of the courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

The course "Market Research" is obligatory.

Qualification Objectives

Students

- have an advanced knowledge about central marketing contents
- have a fundamental understanding of the marketing instruments
- know and understand several strategic concepts and how to implement them
- are able to implement their extensive marketing knowledge in a practical context
- know several qualitative and quantitative approaches to prepare decisions in Marketing
- have the theoretical knowledge to write a master thesis in Marketing
- have the theoretical knowledge to work in/together with the Marketing department

Content

The aim of this module is to deepen central marketing contents in different areas. Therefore the students can choose

between the following marketing courses:

- Product and Innovation Marketing
- Market Research – this course has to be completed successfully by students interested in seminar or master thesis positions at the chair of marketing
- Marketing Strategy Business Game
- Strategic Brand Management
- Open Innovation

Recommendations

None

Remarks

The course "Open Innovation – Concepts, Methods and Best Practices" [2571199] has been added summer 2015.

Please note that only one of the following courses can be chosen in the Marketing Management Module: Marketing Strategy Business Game, Strategic Brand Management, Open Innovation – Concepts, Methods and Best Practices or Business Plan Workshop.

For further information please contact Marketing & Sales Research Group (marketing.iism.kit.edu).

Workload

The total workload for this module is approximately 270 hours. For further information see German version.

Learning Control / Examinations

The assessment is carried out as partial exams (according to Section 4(2), 1 or 2 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

At least one of the courses "Mixed Integer Programming I", "Parametric Optimization" and "Convex Analysis" has to be taken.

Qualification Objectives

The student

-
- names and describes basic notions for advanced optimization methods, in particular from continuous and mixed integer programming,
 - knows the indispensable methods and models for quantitative analysis,
 - models and classifies optimization problems and chooses the appropriate solution methods to solve also challenging optimization problems independently and, if necessary, with the aid of a computer,
 - validates, illustrates and interprets the obtained solutions,
 - identifies drawbacks of the solution methods and, if necessary, is able to make suggestions to adapt them to practical problems.

Content

The modul focuses on theoretical foundations as well as solution algorithms for optimization problems with continuous and mixed integer decision variables.

Remarks

The lectures are partly offered irregularly. The curriculum of the next three years is available online (www.ior.kit.edu). For the lectures of Prof. Stein a grade of 30 % of the exercise course has to be fulfilled. The description of the particular lectures is more detailed.

Workload

The total workload for this module is approximately 270 hours. For further information see German version.

M Module: Methodical Foundations of OR [M-WIWI-101414]

Responsibility: Oliver Stein
Organisation: KIT-Fakultät für Wirtschaftswissenschaften
Curricular Anchorage: Compulsory Elective
Contained in: Operations Management - Data Analysis - Informatics
Elective Field
Additional Examinations

ECTS	Recurrence	Duration	Version
9	Each term	1 term	7

Wahlpflichtangebot

Non-Compulsory Block; You must choose at least 1 courses and between 4,5 and 9 credits.

T-WIWI-102725	Nonlinear Optimization II (S. 351)	4,5	Oliver Stein
T-WIWI-102704	Facility Location and Strategic Supply Chain Management (S. 268)	4,5	Stefan Nickel

Learning Control / Examinations

The assessment is carried out as partial written exams (according to Section 4(2), 1 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

At least one of the courses *Nonlinear Optimization I* and *Global Optimization I* has to be examined.

Qualification Objectives

The student

- names and describes basic notions for optimization methods, in particular from nonlinear and from global optimization,
- knows the indispensable methods and models for quantitative analysis,
- models and classifies optimization problems and chooses the appropriate solution methods to solve also challenging optimization problems independently and, if necessary, with the aid of a computer,
- validates, illustrates and interprets the obtained solutions.

Content

The modul focuses on theoretical foundations as well as solution algorithms for optimization problems with continuous

decision variables. The lectures on nonlinear programming deal with local solution concepts, whereas the lectures on global optimization treat approaches for global solutions.

Recommendations

The courses Introduction to Operations Research I and II are helpful.

Remarks

The planned lectures and courses for the next three years are announced online (<http://www.ior.kit.edu>).

Workload

The total workload for this module is approximately 270 hours. For further information see German version.

M Module: Microeconomic Theory [M-WIWI-101500]

Responsibility: Clemens Puppe
Organisation: KIT-Fakultät für Wirtschaftswissenschaften
Curricular Anchorage: Compulsory Elective
Contained in: Finance - Risk Management - Managerial Economics
Elective Field
Additional Examinations

ECTS	Recurrence	Duration	Language	Version
9	Each term	2 terms	German	2

Wahlpflichtangebot

Non-Compulsory Block; You must choose 9 credits.

Identifier	Course	ECTS	Responsibility
T-WIWI-102609	Advanced Topics in Economic Theory (S. 198)	4,5	Kay Mitusch
T-WIWI-102861	Advanced Game Theory (S. 191)	4,5	Karl-Martin Ehrhart, Clemens Puppe, Johannes Philipp Reiß
T-WIWI-102859	Social Choice Theory (S. 441)	4,5	Clemens Puppe

T-WIWI-105781	Incentives in Organizations (S. 296)	4,5	Petra Nieken

Learning Control / Examinations

The assessment is carried out as partial exams (according to Section 4(2), 1 or 2 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The assessment procedures are described for each course of the module separately.

The overall grade of the the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

None

Qualification Objectives

Students

- are able to model practical microeconomic problems mathematically and to analyze them with respect to positive and normative questions,
- understand individual incentives and social outcomes of different institutional designs.

An example of a positive question is: which regulation policy results in which firm decisions under imperfect competition?
An example of a normative question is: which voting rule has appealing properties?

Content

The student should gain an understanding of advanced topics in economic theory, game theory and welfare economics. Core topics are, among others, strategic interactions in markets, cooperative and non-cooperative bargaining (Advanced Game Theory), allocation under asymmetric information and general equilibrium over time (Advanced Topics in Economic Theory), voting and the aggregation of preferences and judgements (Social Choice Theory).

Workload

The total workload for this module is approximately 270 hours. For further information see German version.

M Module: Operations Research in Supply Chain Management [M-WIWI-102832]

Responsibility: Stefan Nickel

T-WIWI-102714	Tactical and Operational Supply Chain Management (S. 466)	4,5	Stefan Nickel

Learning Control / Examinations

The assessment is carried out as partial exams (according to § 4(2), 1 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module.

The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

At least one of the courses "Operations Research in Supply Chain Management", "Graph Theory and Advanced Location Models", "Modeling and OR-Software: Advanced Topics" and "Special Topics of Stochastic Optimization (elective)" has to be taken.

Qualification Objectives

The student

-
- is familiar with basic concepts and terms of Supply Chain Management,
 - knows the different areas of SCM and their respective optimization problems,
 - is acquainted with classical location problem models (in planes, in networks and discrete) as well as fundamental methods for distribution and transport planning, inventory planning and management,
 - is able to model practical problems mathematically and estimate their complexity as well as choose and adapt appropriate solution methods.

Content

Supply Chain Management is concerned with the planning and optimization of the entire, inter-company procurement, production and distribution process for several products taking place between different business partners (suppliers, logistics service providers, dealers). The main goal is to minimize the overall costs while taking into account several constraints including the satisfaction of customer demands.

This module considers several areas of SCM. On the one hand, the determination of optimal locations within a supply chain is addressed. Strategic decisions concerning the location of facilities as production plants, distribution centers or warehouses are of high importance for the rentability of Supply Chains. Thoroughly carried out, location planning tasks allow an efficient flow of materials and lead to lower costs and increased customer service. On the other hand, the planning of material transport in the context of supply chain management represents another focus of this module. By linking transport connections and different facilities, the material source (production plant) is connected with the material sink (customer). For given material flows or shipments, it is considered how to choose the optimal (in terms of minimal costs) distribution and transportation chain from the set of possible logistics chains, which asserts the compliance of delivery times and further constraints. Furthermore, this module offers the possibility to learn about different aspects of the tactical and operational planning level in Supply Chain Management, including methods of scheduling as well as different approaches in procurement and distribution logistics. Finally, issues of warehousing and inventory management will be discussed.

Recommendations

Basic knowledge as conveyed in the module *Introduction to Operations Research* [WI1OR] is assumed.

Remarks

Some lectures and courses are offered irregularly.

The planned lectures and courses for the next three years are announced online.

Workload

Total effort for 9 credits: ca. 270 hours

- Presence time: 84 hours
- Preparation/Wrap-up: 112 hours
- Examination and examination preparation: 74 hours

M Module: Seminar [M-WIWI-102971]

Responsibility: Hagen Lindstädt, Oliver Stein
Organisation: KIT-Fakultät für Wirtschaftswissenschaften
Curricular Anchorage: Compulsory Elective
Contained in: Elective Field

ECTS	Language	Version
3	German	1

Wahlpflichtangebot

Non-Compulsory Block; You must choose 3 credits.

Identifier	Course	ECTS	Responsibility
T-WIWI-103474	Seminar in Business Administration A (Master) (S. 396)	3	Wolf Fichtner, Hansjörg Fromm, Andreas Geyer-Schulz, Ju-Young Kim, Martin Klarmann, Peter Knauth, Hagen Lindstädt, David Lorenz, Torsten Luedcke, Thomas Lützkendorf, Alexander Mädche, Bruno Neibecker, Stefan Nickel, Petra Nieken, Martin Ruckes, Gerhard Satzger, Frank Schultmann, Thomas Setzer, Orestis Terzidis, Marliese Uhrig-Homburg, Maxim Ulrich, Christof Weinhardt, Marion Weissenberger-Eibl, Ute Werner, Marcus Wouters
T-WIWI-103478	Seminar in Economics A (Master) (S. 412)	3	Johannes Brumm, Jan Kowalski, Kay Mitusch, Ingrid Ott, Clemens Puppe, Johannes Philipp Reiß, Nora Szech, Berthold Wigger
T-WIWI-103483	Seminar in Statistics A (Master) (S. 431)	3	Oliver Grothe, Melanie Schienle

Learning Control / Examinations

The modul examination consists of one seminar (according to §4 (3), 3 of the examintaion regulation). A detailed description of the assessment is given in the specific course characerization.

The final mark for the module is the mark of the seminar.

Conditions

None.

Qualification Objectives

The students are in a position to independently handle current, research-based tasks according to scientific criteria.

- They are able to research, analyze, abstract and critically review the information.
- They can draw own conclusions using their interdisciplinary knowledge from the less structured information and selectively develop current research results.
- They can logically and systematically present the obtained results both orally and in written form in accordance with scientific guidelines (structuring, technical terminology, referencing). They can argue and defend the results professionally in the discussion.

Content

Competences which are gained in the seminar module especially prepare the student for composing the final thesis. Within the term paper and the presentation the student exercises himself in scientific working techniques supported by the supervisor.

Beside advancing skills in techniques of scientific working there are gained integrative key qualifications as well. A detailed description of these qualifications is given in the section "Key Qualifications" of the module handbook.

Furthermore, the module also includes additional key qualifications provided by the KQ-courses.

Recommendations

None.

Remarks

The listed seminar titles are placeholders. Currently offered seminars of each semester will be published on the websites of the institutes and in the course catalogue of the KIT. In general, the current seminar topics of each semester are already announced at the end of the previous semester. Furthermore for some seminars there is an application required. The available places are listed on the internet: <https://portal.wiwi.kit.edu>.

T-WIWI-102872	Challenges in Supply Chain Management (S. 219)	4,5	Robert Blackburn

Learning Control / Examinations

The assessment is carried out as partial exams (according to Section 4 (2), 1-3 SPO), whose sum of credits must meet the minimum requirement of credits of this module. The assessment procedures are described for each course of the module separately. The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

At least one of the three courses Operations Research in Supply Chain Management, Operations Research in Health Care Management or Practical seminar: Health Care Management has to be assigned.

The course Challenges in Supply Chain Management can only be assigned, if this module is assigned as an elective module.

Qualification Objectives

Students

- knows the theoretical bases and the key components of Business Intelligence systems,
- acquires the basic skills to make use of business intelligence and analytics software in the service context
- are introduced into various application scenarios of analytics in the service context
- are able to distinguish different analytics methods and apply them in context

-
- learn how to apply analytics software in the service context
 - are trained for the structured compilation and solution of practice relevant problems with the help of commercial business intelligence software packages as well as analytics methods and tools

Content

The importance of services in modern economies is most evident – nearly 70% of gross value added are achieved in the tertiary sector and a growing number of industrial enterprises add customer specific services to their material goods or transform their business models fundamentally. The growing availability of data “Big Data” and their intelligent processing by applying analytic methods and business intelligence systems plays a key role.

It is the goal of the module to give students a comprehensive overview on the subject Business Intelligence & Analytics focusing on service issues. Various scenarios illustrate how the methods and systems introduced help to improve existing services or create innovative data-based services.

Recommendations

The course Practical Seminar Health Care should be combined with the course OR in Health Care Management.

Remarks

This module is part of the KSRI teaching profile “Digital Service Systems”. Further information on a service-specific profiling is available under www.ksri.kit.edu/teaching.

Workload

The total workload for this module is approximately 270 hours. For further information see German version.

Learning Control / Examinations

The module is not offered from summer term 2017.

The assessment is carried out as partial written exams (according to Section 4(2), 1 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

At least one of the courses Markov Decision Models [2550679] or Simulation I [2550662] has to be attended.

Qualification Objectives

The student posses profound knowledge in modelling, analyzing and optimizing stochastic systems in economy and engineering.

Content

Markov Decision Models I: Markov Chains, Poisson Processes

Markov Decision Models II: Queuing Systems, Stochastic Decision Processes

Simulation I: Generation of random numbers, Monte Carlo integration, Discrete event simulation, Discrete and continuous random variables, Statistical analysis of simulated data.

Simulation II: Variance reduction techniques, Simulation of stochastic processes, Case studies.

Recommendations

The courses Introduction to Operations Research I and II are helpful.

Remarks

The examination

- T-WIWI-102627 Simulation I will be offered latest until winter term 2016/2017 (for beginners).
- T-WIWI-102703 Simulation II will be offered latest until summer term 2017 (for beginners).
- T-WIWI-102711 Markov Decision Models II will be offered latest until winter term 2016/2017 (for beginners).
- T-WIWI-102710 Markov Decision Models I will be offered latest until summer term 2017 (for beginners).

The planned lectures and courses for the next two years are announced online (<http://www.ior.kit.edu/>).

T-WIWI-102703	Simulation II (S. 436)	4,5	Karl-Heinz Waldmann
T-WIWI-102710	Markov Decision Models I (S. 324)	5	Karl-Heinz Waldmann
T-WIWI-102711	Markov Decision Models II (S. 325)	4,5	Karl-Heinz Waldmann

Learning Control / Examinations

The module is not offered from summer term 2017.

The assessment is carried out as partial written exams (according to Section 4(2), 1 or 2 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module. The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

None

Qualification Objectives

The student posses detailed knowledge in modelling, analyzing and optimizing stochastic systems in economy and engineering.

Content

Markov Decision Models I: Markov Chains, Poisson Processes.

Markov Decision Models II: Queuing Systems, Stochastic Decision Processes

Simulation I: Generation of random numbers, Monte Carlo integration, Discrete event simulation, Discrete and continuous random variables, Statistical analysis of simulated data.

Simulation II: Variance reduction techniques, Simulation of stochastic processes, Case studies.

Quality Control I: Statistical Process Control, Acceptance Sampling, Design of experiments

Quality Control II: Reliability of complexe systems with and without repair, Maintenance

OR-orientied modeling and analysis of real problems: project-based modelling and analysis

Remarks

The examination

-
- T-WIWI-102627 Simulation I will be offered latest until winter term 2016/2017 (for beginners).
 - T-WIWI-102703 Simulation II will be offered latest until summer term 2017 (for beginners).
 - T-WIWI-102710 Markov Decision Models I will be offered latest until summer term 2017 (for beginners).
 - T-WIWI-102711 Markov Decision Models II will be offered latest until winter term 2016/2017 (for beginners).

The planned lectures and courses for the next two years are announced online (<http://www.ior.kit.edu/>).

Workload

The total workload for this module is approximately 270 hours. For further information see German version.

M Module: Stochastic Optimization [M-WIWI-103289]

Responsibility: Steffen Rebennack
Organisation: KIT-Fakultät für Wirtschaftswissenschaften
Curricular Anchorage: Compulsory Elective
Contained in: Operations Management - Data Analysis - Informatics
Elective Field

ECTS	Recurrence	Duration	Version
9	Each term	1 term	2

Wahlpflichtangebot

Non-Compulsory Block; You must choose at most 2 courses.

Identifier	Course	ECTS	Responsibility
T-WIWI-106546	Introduction to Stochastic Optimization (S. 311)	4,5	Steffen Rebennack
T-WIWI-106548	Advanced Stochastic Optimization (S. 197)	4,5	Steffen Rebennack
T-WIWI-106549	Large-scale Optimization (S. 315)	4,5	Steffen Rebennack

Ergänzungssangebot

Non-Compulsory Block; You must choose at most 2 courses.

Identifier	Course	ECTS	Responsibility
T-WIWI-102723	Graph Theory and Advanced Location Models (S. 292)	4,5	Stefan Nickel
T-WIWI-102719	Mixed Integer Programming I (S. 334)	4,5	Oliver Stein
T-WIWI-102720	Mixed Integer Programming II (S. 338)	4,5	Oliver Stein
T-WIWI-103124	Multivariate Statistical Methods (S. 343)	4,5	Oliver Grothe
T-WIWI-102715	Operations Research in Supply Chain Management (S. 368)	4,5	Stefan Nickel
T-WIWI-106545	Optimization under uncertainty (S. 372)	5	Steffen Rebennack
T-WIWI-106552	Simulation of Stochastic Systems (S. 437)	4,5	Oliver Grothe, Steffen Rebennack

Learning Control / Examinations

The assessment is carried out as partial exams (according to § 4(2), 1 of the examination regulation) of the single courses of this module, whose sum of credits must meet the minimum requirement of credits of this module.

The assessment procedures are described for each course of the module separately.

The overall grade of the module is the average of the grades for each course weighted by the credits and truncated after the first decimal.

Conditions

At least one of the courses "Advanced Stochastic Optimization" and "Large-scale Optimization" has to be taken.

Qualification Objectives

The student

- names and describes basic notions for advanced stochastic optimization methods, in particular, ways to algorithmically exploit the special model structures,
- knows the indispensable methods and models for quantitative analysis of stochastic optimization problems,

-
- models and classifies stochastic optimization problems and chooses the appropriate solution methods to solve also challenging stochastic optimization problems independently and, if necessary, with the aid of a computer,
 - validates, illustrates and interprets the obtained solutions,
 - identifies drawbacks of the solution methods and, if necessary, is able to make suggestions to adapt them to practical problems.

Recommendations

It is recommended to listen to the lecture “Introduction to Stochastic Optimization” before the lecture “Advanced Stochastic Optimization” is visited.

Learning Control / Examinations

The assessment consists of a written exam (60 minutes) (following §4(2), 1 of the examination regulation). The exam takes place in every semester. Re-examinations are offered at every ordinary examination date.

Conditions

None

Recommendations

Basic knowledge of mathematics and statistics is assumed.

V Event excerpt: Advanced Game Theory (WS 17/18)

Aim

The student

- deepens and broadens his/her basic knowledge of Game Theory,
- develops a rigorous understanding of newer concepts in Game Theory,
- develops the capability to independently model and analyze complex systems of strategic decision-making, and to develop appropriate solutions.

Content

This course offers an advanced and rigorous treatment of game theory.

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

Learning Control / Examinations

The non examassessment (§4(2), 3 SPO 2007) or alternative exam assessment (§ 4(2), 3 SPO 2015)consists of:

- a practical work
- a presentation and
- a written seminar thesis

Practical work, presentation and written thesis are weighted according to the course.

Conditions

None

Remarks

The title of this course is a generic one. Specific titles and the topics of offered seminars will be announced before the start of a semester in the internet at <https://portal.wiwi.kit.edu>.

V Event excerpt: Smart Services and the IoT (WS 17/18)

Content

Domains of interest include, but are not limited to:

- Medicine
- Social Media
- Finance Market

V Event excerpt: (SS 2017)

Aim

Die Studierenden können Kenntnisse aus der Vorlesung Maschinelles Lernen auf einem ausgewählten Gebiet der aktuellen Forschung im Bereich Robotik oder kognitive Automobile praktisch anwenden.

Die Studierenden beherrschen die Analyse und Lösung entsprechender Problemstellungen im Team.

Die Studierenden können ihre Konzepte und Ergebnisse evaluieren, dokumentieren und präsentieren.

Content

Umsetzung einzelner, durch die Studenten ausgewählter Verfahren des Maschinellen Lernens an einer konkreten Aufgabenstellung entweder aus dem Bereich Robotik oder kognitive Automobile.

Die einzelnen Projekte erfordern die Analyse der gestellten Aufgabe, Auswahl geeigneter Lernverfahren, Spezifikation und Implementierung und Evaluierung eines Lösungsansatzes. Schließlich ist die gewählte Lösung zu dokumentieren und in einem Kurzvortrag vorzustellen.

Workload

Der Arbeitsaufwand von 4 SWS setzt sich zusammen aus Präsenzzeit am Versuchsort zur praktischen Umsetzung der gewählten Lösung, sowie der Zeit für Literaturrecherchen und Planung/Spezifikation der geplanten Lösung. Zusätzlich wird ein kurzer Bericht und eine Präsentation der durchgeführten Arbeit erstellt.

V Event excerpt: (SS 2017)

The successful completion of the compulsory exercises is prerequisite for the admission to the written exam.

The exam takes place in every semester. Re-examinations are offered at every ordinary examination date.

Conditions

None

Recommendations

Knowledge of content of the modules Foundations in Informatics [IW1INF1] and Algorithms I [IW2INF2] is expected.

V Event excerpt: Applied Informatics II: IT Systems for e-Commerce (SS 2017)

Aim

The student learns about concepts and technologies for designing big, distributed application architectures. Students apply industryrelevant technology to solve application-oriented problems in lab classes.

Content

The course Applied Informatics II [2511032] covers various facets of electronic commerce which have to be supported by adequate and efficient distributed information systems. Key topics are middleware technologies and distributed application architectures. Document description and exchange (incl. XML), Java EE, Web technologies, and Web services are additional topics.

Workload

The total workload for this course is approximately 150 hours. For further information see German version.

Literature

Learning Control / Examinations

See German version.

Conditions

None

Recommendations

We strongly recommend knowledge of the basic topics in investments (bachelor course), which will be necessary to be able to follow the course.

V Event excerpt: Asset Pricing (SS 2017)

Aim

Students are familiar with advanced concepts in asset pricing (in particular the stochastic discount factor model). They are able to apply their acquired skills to solve empirical questions related to securities.

Content

This lecture deals with the valuation of risky cash flows. A stochastic discount model and a central equation will be introduced, which form the basis of nearly every valuation model in finance. That includes the valuation of stocks, bonds and derivatives. The first part of the lecture will present the theory, the second part covers empirical questions related to this approach.

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

Learning Control / Examinations

The assessment of this course is a written examination (following §4(2), 1 SPO) of 60 mins.

The exam is offered each semester.

Conditions

None

V Event excerpt: (WS 17/18)

Aim

The student

- learns the game-theoretic modeling and analysis of auctions,
- learns about various auction formats and their specific characteristics,
- understands the challenge for participating in auctions as bidder,
- understands the challenge of designing auctions as auctioneer,
- gains insight into practice by case studies,
- participates in and analyzes demonstration experiments.

Content

This course deals with the analysis and modeling of auction which are based on game theory. This also includes aspects of applying and designing auctions as well as experiences with auctions. Main topics are:

- Single- and multi-unit auctions
- Selling and procurement auctions
- Electronic auctions (e.g. eBay, C2C, B2B)
- Multi-attributive auctions.

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

SS 2017	2530372	Automated Financial Advisory (Master)	Seminar (S)	2	Maxim Ulrich

Learning Control / Examinations

The grade consists of a written thesis and an oral presentation.

Conditions

There are two conditions for taking this course:

1. This course is only open for registered students of the module “Disruptive FinTech Innovations”.
2. Registered students do also attend in the same semester the lecture “Engineering FinTech Solutions” and the programming internship “Computational FinTech with Python and C++”.

Modeled Conditions

The following conditions must be met:

1. The course [\[T-WIWI-106193\] Engineering FinTech Solutions](#) must have been started.
2. The course [\[T-WIWI-106496\] Computational FinTech with Python and C++](#) must have been started.

V Event excerpt: Automated Financial Advisory (Master) (SS 2017)

Aim

In this seminar students work on issues related to the automatization of risk and investment management applications.

Content

At the beginning of the semester, a selection of seminar topics will be discussed with each student of the seminar.

Workload

The total workload for this course is approximately 90 hours.

Literature

Literature will be distributed during the first lecture.

T Course: Bifurcation Theory [T-MATH-106487]

SS 2017	2530367	Übung für Building Intelligent and Robo-Advised Portfolios	Übung (Ü)	2	Maxim Ulrich

Learning Control / Examinations

There are two grading schemes. The student will be graded with the scheme that gives him the highest score. Grading Scheme A: 70% of the grade is based on the exam, 30% is based on problem sets and quizzes. Grading Scheme B: 100% of the grade is based on the exam.

The exam tests the material of the current semester and takes place during the lecture-free period. Students who don't pass the exam are allowed to re-take the e

Conditions

None.

Recommendations

Good skills in applied math modeling (differential equations).

Remarks

New course starting summer term 2017.

V Event excerpt: Building Intelligent and Robo-Advised Portfolios (SS 2017)

Aim

Representatives of the FinTech industry (at least in Germany) often emphasize that engineering- and IT- oriented employees lack intuition and insights necessary for building improved automated (robo-advised) portfolios for a set of different clients. It is hence the goal of this course to teach the essential intuition and economic thinking of intelligent and robo-advised portfolio management.

Students learn

1. Decision making under uncertainty using utility functions
2. Construction of statically optimal portfolios (Markowitz)
3. Construction of dynamically optimal portfolios (Merton)
 - (a) Economic insights
 - (b) Mathematical solution using Ito-lemma and stochastic differential equations
 - (c) Strategic vs tactical asset allocation
4. Theory of factor risk premia
5. Predicting factor returns and constructing factor portfolios across different asset classes (equity, bonds, currency, vol)
6. Alpha and price anomalies

Content

This lecture offers a practical, yet rigorous, introduction to intelligent and automated portfolio management. We cover the following content

1. Optimal portfolios for CARA investors, applied to Gaussian and non-Gaussian asset returns
2. Building optimal short-term portfolios (Markowitz), applied to 'socially responsible investing'
3. Building optimal long-term portfolios (Merton), applied to the 2008 financial crisis
 - (a) Hands-on introduction to time continuous calculus (Ito) for solving stochastic differential equations
 - (b) Tactical vs strategic vs opportunity vs. hedging portfolio
 - (c) Optimal portfolio rebalancing
 - (d) Accounting for time-varying correlation
4. Life-cycle investing
5. Factor Theory
 - (a) Risk factors across asset classes
 - (b) Theory of the stochastic discount factor
6. Generating Alpha strategies on
 - (a) Equity
 - (b) Bond
 - (c) Currency
 - (d) Option markets.

Workload

The total workload for this course is approximately 270 hours. For further information see German version.

Aim

Students

- describe goals of business process modeling and apply different modeling languages,
- choose the appropriate modeling language according to a given context,
- use suitable tools for modeling business processes,
- apply methods for analysing and assessing process models to evaluate specific quality characteristics of the process model.

Content

The proper modeling of relevant aspects of business processes is essential for an efficient and effective design and implementation of processes. This lecture presents different classes of modeling languages and discusses the respective advantages and disadvantages of using actual application scenarios. For that simulative and analytical methods for process analysis are introduced. In the accompanying exercise the use of process modeling tools is practiced.

V Event excerpt: Business Strategies of Banks (WS 17/18)

Aim

Students are in a position to discuss the principles of commercial banking. They are familiar with fundamental concepts of bank management and are able to apply them.

Content

The management of a bank is in charge of the determination and implementation of business policy - taking into account all relevant endogenous and exogenous factors - that assures the bank's success in the long run. In this context, there exists a large body of banking models and theories which are helpful in describing the success and risk of a bank. This course is meant to be the bridging of banking theory and practical implementation. In the course of the lectures students will learn to take on the bank management's perspective.

The first chapter deals with the development of the banking sector. Making use of appropriate assumptions, a banking policy is developed in the second chapter. The design of bank services (ch. 3) and the adequate marketing plan (ch. 4) are then built on this framework. The operational business of banks must be guided by appropriate risk and earnings management (ch. 5 and 6), which are part of the overall (global) bank management (ch. 7). Chapter eight, at last, deals with the requirements and demands of bank supervision as they have significant impact on a bank's corporate policy.

Workload

The total workload for this course is approximately 90 hours. For further information see German version.

Literature

Elective literature:

Learning Control / Examinations

The assessment consists of a written paper and an oral exam (non exam assessment (§4 (2), 3 SPO 2007) respectively alternative exam assessments (§4(2), 3 SPO 2015)).

Conditions

None

Recommendations

Basic knowledge as conveyed in the module "Introduction to Operations Research [WI1OR]" is assumed.

Remarks

Please notice that this course can be attended only in the elective part of the course program.

The number of participants is restricted due to the execution of joint projects with BASF teams and the resulting examination effort. Due to these capacity restrictions, registration before course start is required. For further information see the webpage of the course.

The course is offered irregularly. The planned lectures and courses for the next three years are announced online.

V Event excerpt: Challenges in Supply Chain Management (SS 2017)

Aim

The student

- analyzes and evaluates current developments and approaches in the design and planning of supply chain strategis, especially with respect to future challenges in this area,
- explains and utilizes theoretical concepts and methods for the design and strategy of supply chains,
- - classifies and accounts for trend-setting theories in the SCM context such as Behavioral Supply Chain Management or Supply Chain Analytics.

Content

The course consists of case studies of BASF which cover future challenges of supply chain management. Thus, the course aims at a case-study based presentation, critical evaluation and exemplary discussion of recent questions in supply chain management. The focus lies on future challenges and trends, also with regard to their applicability in practical cases (especially in the chemical industry).

The main part of the course is working on a project together with BASF in Ludwigshafen. The students get in touch with scientific working: The in-depth work with a special scientific topic makes the students familiar with scientific literature research and argumentation methods. As a further aspect of scientific work, especially for Master students the emphasis is put on a critical discussion of the project topic.

This course will include working on cutting edge supply chain topics like Industry 4.0 / "Internet of Everything in production", supply chain analytics, risk management, procurement and production in SCM. The team essays / project reports will be linked to industry-related challenges as well as to upcoming theoretical concepts. The topics of the seminar will be announced at the beginning of the term in a preliminary meeting.

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

Literature

To be defined depending on the topic.

WS 17/18	2590459		Übung (Ü)	1	Pradyumn Kumar Shukla

Learning Control / Examinations

The assessment consists of a written exam (60 min) (according to §4(2), 1 of the examination regulation). By successful completion of the exercises (§4 (2), 3 SPO 2007 respectively §4 (3) SPO 2015) a bonus can be obtained. If the grade of the written exam is at least 4.0 and at most 1.3, the bonus will improve it by one grade level (i.e. by 0.3 or 0.4). The bonus only applies to the first and second exam of the semester in which it was obtained.

Conditions

None

Remarks

The credits have been changed to 5 starting summer term 2016.

V Event excerpt: Computational Economics (WS 17/18)

Aim

The student

- understands the methods of Computational Economics and applies them on practical issues,
- evaluates agent models considering bounded rational behaviour and learning algorithms,
- analyses agent models based on mathematical basics,
- knows the benefits and disadvantages of the different models and how to use them,
- examines and argues the results of a simulation with adequate statistical methods,
- is able to support the chosen solutions with arguments and can explain them.

Content

Examining complex economic problems with classic analytical methods usually requires making numerous simplifying assumptions, for example that agents behave rationally or homogeneously. Recently, widespread availability of computing power gave rise to a new field in economic research that allows the modeling of heterogeneity and forms of bounded rationality: Computational Economics. Within this new discipline, computer based simulation models are used for analyzing complex economic systems. In short, an artificial world is created which captures all relevant aspects of the problem under consideration. Given all exogenous and endogenous factors, the modelled economy evolves over time and different scenarios can be analyzed. Thus, the model can serve as a virtual testbed for hypothesis verification and falsification.

Learning Control / Examinations

The grade is based on a larger or several smaller programming exercises.

Conditions

There are two conditions for taking this course:

1. This course is only open for registered students of the module “Disruptive FinTech Innovations”.
2. Registered students do also attend in the same semester the lecture “Engineering FinTech Solutions” and the seminar “Automated Financial Advisory”.

Modeled Conditions

The following conditions must be met:

1. The course [\[T-WIWI-106193\] Engineering FinTech Solutions](#) must have been started.
2. The course [\[T-WIWI-106495\] Automated Financial Advisory](#) must have been started.

V Event excerpt: (SS 2017)

Aim

Implementation of different programming specific concepts and skills.

Content

At the beginning of the semester, each student receives a personalized set of programming tasks .

Workload

Roughly 45 hours.

T Course: Computational Risk and Asset Management I [T-WIWI-107032]

Learning Control / Examinations

The assessment of the lecture is a written examination (60 minutes) according to §4(2), 1 of the examination regulation. The examination is held in the semester of the lecture and in the following semester. Prerequisite for admission to the written examination is attaining at least 30% of the exercise points. Therefore the online-registration for the written examination is subject to fulfilling the prerequisite.

Conditions

None

Recommendations

It is strongly recommended to visit at least one lecture from the Bachelor program of this chair before attending this course.

Remarks

The lecture is offered irregularly. The curriculum of the next three years is available online (www.ior.kit.edu).

V Event excerpt: (SS 2017)

Aim

The student

- knows and understands the fundamentals of convex analysis,
- is able to choose, design and apply modern techniques of convex analysis in practice.

Content

Convex Analysis deals with properties of convex functions and convex sets, in particular with respect to the minimization of convex functions over convex sets. That the involved functions are not necessarily assumed to be differentiable allows a number of applications which are not covered by techniques from smooth optimization, e.g. approximation problems with respect to the Manhattan or maximum norms, classification problems or the theory of statistical estimates. The lecture develops along another, geometrically simple example, where a nonsmooth obstacle set is to be described by a single smooth convex constraint such that minimal and maximal distances to the obstacle can be computed. The lecture is structured as follows:

- Introductory examples and terminology
- Convex subdifferential, Lipschitz continuity and the safety margin
- Normal cones, error bounds and the maximal distance

Literature

Elective literature:

- J. Borwein, A. Lewis, Convex Analysis and Nonlinear Optimization: Theory and Examples (2 ed.), Springer, 2006.

Learning Control / Examinations

The assessment of this course is a written examination (following §4(2), 1 SPO) of 60 mins.

The exam is offered each semester.

Conditions

None

V Event excerpt: (SS 2017)

Aim

Students

- are in a position to explain the importance of informational frictions for the financing of firms,
- are able to evaluate financing contracts with respect to their incentive effects,
- are able to analyse financing contracts with respect to their information they provide to outsiders,
- are in a position to derive optimal financing contracts in prototypical situations,
- are able to discuss the financial determinants of corporate distribution policy.

Content

Students are told profound knowledge about appropriate financing of firms.

The course is concerned with the theory of corporate financing:

- Financing contracts
- Financing capacity
- Issuance of securities
- Capital structure
- Payout policy

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

V Event excerpt: Credit Risk (WS 17/18)

Aim

The objective of this course is to become familiar with the credit markets and the credit risk indicators like ratings, default probabilities and credit spreads. The students learn about the components of credit risk (e.g. default time and default rate) and quantify these in different theoretical models to price credit derivatives.

Content

The lecture deals with the diverse issues arising in the context of measuring and controlling credit risk. At first, the theoretical and empirical relations between ratings, probabilities of default, and credit spreads are analysed. After that, the focus is on the valuation of credit risk. Finally, the management of credit risk, e.g. using credit derivatives and credit portfolio analysis, is examined, and the legal framework and its implications are discussed.

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

V Event excerpt: Database Systems and XML (WS 17/18)

Aim

Students

- know the basics of XML and generate XML documents,
- are able to use XML database systems and to formulate queries to XML documents,
- know to assess the use of XML in operational practice in different application contexts.

Content

Databases are a proven technology for managing large amounts of data. The oldest database model, the hierarchical model, was replaced by different models such as the relational or the object-oriented data model. The hierarchical model became particularly more important with the emergence of the extensible Markup Language XML. XML is a data format for structured, semi-structured, and unstructured data. In order to store XML documents consistently and reliably, databases or extensions of existing data base systems are required. Among other things, this lecture covers the data model of XML, concepts of XML query languages, aspects of storage of XML documents, and XML-oriented database systems.

V Event excerpt: Derivatives (SS 2017)

Aim

The objective of the Derivatives lecture is to become familiar with financial markets, especially derivatives markets. Traded securities and frequently used trading strategies will be introduced. Furthermore the pricing of derivatives will be derived and their use in risk management will be discussed.

Content

The lecture deals with the application areas and valuation of financial derivatives. After an overview of the most important derivatives and their relevance, forwards and futures are analysed. Then, an introduction to the Option Pricing Theory follows. The main emphasis is on option valuation in discrete and continuous time models. Finally, construction and usage of derivatives are discussed, e.g. in the context of risk management.

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

Recommendations

Basic knowledge as conveyed in the module *Introduction to Operations Research* [WI1OR] is assumed.

Remarks

Due to capacity restrictions, registration before course start is required. For further information see the webpage of the course.

The course is planned to be held every summer term.

The planned lectures and courses for the next three years are announced online.

V Event excerpt: (SS 2017)

Aim

The student

- knows basic concepts of discrete event simulation models,
- applies computer-based simulation systems,
- structures and implements simulation studies according to specific process models,
- has an in-depth knowledge for logistics issues and discovers the importance of statistical methods in modeling and evaluation of simulation models,
- explains coupled systems of simulation and meta-heuristics, and characterizes simulation programs.

Content

Simulation of production and logistics systems is an interdisciplinary subject connecting expert knowledge from production management and operations research with mathematics/statistics as well as computer science and software engineering. With completion of this course, students know statistical foundations of discrete simulation, are able to classify and apply related software applications, and know the relation between simulation and optimization as well as a number of application examples. Furthermore, students are enabled to structure simulation studies and are aware of specific project scheduling issues.

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

Learning Control / Examinations

The course expires after summer term 2017. Last examination date is winter term 2017/2018 (only for repeaters).

The assessment consists of an 1h written exam in the first week after lecture period according to Section 4(2), 1 of the examination regulation).

Conditions

None

V Event excerpt: Document Management and Groupware Systems (SS 2017)

Aim

Students master the basics of integration and structure of document management systems (DMS) and know the complete DMS process - from document capture of the archiving until retrieval. Students know how to realize operative workflows. They know which activities are needed to carry out the conceptual design and installation of DMS and they are able to apply a DMS as an archive system, workflow system and retrieval system. Furthermore, they know groupware systems exemplarily and can use them for collaborative tasks.

Content

The lecture gives basics of document management and groupware systems. It covers different system categories, their interaction and their use areas and illustrates this with concrete examples. These include document management in the strict sense, scanning, Document Imaging (acquisition and visualization of scanned documents), indexing, electronic archiving, retrieval of relevant documents, workflow, groupware, and office communications.

V Event excerpt: Efficient Energy Systems and Electric Mobility (SS 2017)

Aim

- Understand the concept of energy efficiency as applied to specific systems
- Obtain an overview of the current trends in energy efficiency
- Be able to determine and evaluate alternative methods of energy efficiency improvement
- Overview of technical and economical stylized facts on electric mobility
- Judging economical, ecological and social impacts through electric mobility

Content

This lecture series combines two of the most central topics in the field of energy economics at present, namely energy efficiency and electric mobility. The objective of the lecture is to provide an introduction and overview to these two subject areas, including theoretical as well as practical aspects, such as the technologies, political framework conditions and broader implications of these for national and international energy systems.

The energy efficiency part of the lecture provides an introduction to the concept of energy efficiency, the means of affecting it and the relevant framework conditions. Further insights into economy-wide measurements of energy efficiency, and associated difficulties, are given with recourse to several practical examples. The problems associated with market failures in this area are also highlighted, including the Rebound Effect. Finally and by way of an outlook, perspectives for energy efficiency in diverse economic sectors are examined.

The electric mobility part of the lecture examines all relevant issues associated with an increased penetration of electric vehicles including their technology, their impact on the electricity system (power plants and grid), their environmental impact as well as their optimal integration in the future private electricity demand (i.e. smart grids and V2G). Besides technical aspects the user acceptance and behavioral aspects are also discussed.

Workload

The total workload for this course is approximately 105.0 hours. For further information see German version.

Literature

Will be announced in the lecture.

V Event excerpt: eFinance: Information Engineering and Management for Securities Trading (WS 17/18)

Aim

The students

- are able to understand the theoretical and practical aspects of securities trading,
- are able to handle the relevant electronic tools for the evaluation of financial data,
- are able to identify the incentives of the traders for participation in different market platforms,
- are able to analyse capital marketplaces concerning their efficiency, weaknesses and technical configuration,
- are able to apply theoretical methods of econometrics,
- are able to understand, criticize and present articles with a finance-scientific background,
- learn to elaborate solutions in a team.

Content

The theoretical part of the course examines the New Institutions Economics which provides a theoretically found explanation for the existence of markets and intermediaries. Building upon the foundations of the market micro structure, several key parameters and factors of electronic trading are examined. These insights gained along a structured securities trading process are complemented and verified by the analysis of prototypical trading systems developed at the institute as well as selected trading systems used by leading exchanges in the world. In the more practical-oriented second part of the lecture, speakers from practice will give talks about financial trading systems and link the theoretical findings to real-world systems and applications.

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

V Event excerpt: Energy and Environment (SS 2017)

Aim

The student should identify environmental problems of energy from fossil fuels. The student can identify appropriate technologies for pollution control. The student knows methods for assessing environmental problems and their ways of application.

Content

The focus of the lecture is put on environmental impacts of fossil fuel conversion and related assessment methods. The list of topics is given below.

- Fundamentals of energy conversion
- Air pollutant formation from fossil fuel combustion
- Control of air pollutant emissions from fossil-fuelled power plants.
- Measures to improve conversion efficiency of fossil fuelled power plants.
- External effects of energy supply (Life Cycle Assessment of selected energy systems)
- Integrated Assessment models supporting the European Thematic Strategy on Air
- Cost-effectiveness analyses and cost-benefit analyses of air pollution control measures
- Monetary evaluation of external effects of energy supply (external costs)

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

Remarks

Former course title until summer term 2017: T-WIWI-102794 "eEnergy: Markets, Services, Systems".

The lecture has also been added in the IIP Module *Basics of Liberalised Energy Markets*.

V Event excerpt: Energy Market Engineering (SS 2017)

Aim

The student

- know the scientifically discussed design options for energy markets.
- can evaluate and discuss advantages and disadvantages of different energy market design options.
- can judge which design is ideal in which environment.
- is able to understand and employ scientific methods to evaluate energy market designs

Content

This lecture discusses different design options for electricity markets. We will focus on different approaches of nodal and zonal pricing as well as single price mechanisms and capacity markets. After a short recap of German and European market designs, the different design options will be discussed scientifically and with the help of examples. Furthermore, we will evaluate alternative market design options like microgrids. Besides the fundamental functioning of those markets, we will introduce and discuss methodological knowledge to evaluate market design options.

Remarks

Former course title until summer term 2017: T-WIWI-103131 "Regulatory Management and Grid Management - Economic Efficiency of Network Operation"

V Event excerpt: Energy Networks and Regulation (WS 17/18)

Content

The lecture "Energy Networks and Regulation" provides insights into the regulatory framework of electricity and gas. It touches upon the way the grids are operated and how regulation affects almost all grid activities. The lecture also addresses approaches of grid companies to cope with regulation on a managerial level. We analyze how the system influences managerial decisions and strategies such as investment or maintenance. Furthermore, we discuss how the system affects the operator's abilities to deal with the massive challenges lying ahead ("Energiewende", redispatch, European grid integration, electric vehicles etc.). Finally, we look at current developments and major upcoming challenges, e.g., the smart meter rollout. Covered topics include:

- Grid operation as a heterogeneous landscape: big vs. small, urban vs. rural, TSO vs. DSO.
- Objectives of regulation: Fair price calculation and high standard access conditions.
- The functioning of incentive regulation
- Amendment to the incentive regulation: its merits, its flaws
- The revenue cap and how it is adjusted according to certain exogenous factors
- Grid tariffs: How are they calculated, what is the underlying rationale, do we need a reform (and which)?
- Exogenous costs shifted (arbitrarily) into the grid, e.g. feed-in tariffs for renewable energy or decentralized supply.

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

T Course: Energy Systems Analysis [T-WIWI-102830]

Learning Control / Examinations

The assessment consists of a written exam according to Section 4(2), 1 of the examination regulation.

Conditions

None

Recommendations

None

Remarks

Since 2011 the lecture is offered in winter term. Exams can still be taken in summer term.

V Event excerpt: Energy Systems Analysis (WS 17/18)

Aim

The student

- has the ability to understand and critically reflect the methods of energy system analysis, the possibilities of its application in the energy industry and the limits and weaknesses of this approach
- can use select methods of the energy system analysis by her-/himself

Content

1. Overview and classification of energy systems modelling approaches
2. Usage of scenario techniques for energy systems analysis
3. Unit commitment of power plants
4. Interdependencies in energy economics
5. Scenario-based decision making in the energy sector
6. Visualisation and GIS techniques for decision support in the energy sector

Workload

The total workload for this course is approximately 90 hours. For further information see German version.

Events

Term	Event-No.	Events	Type	SWS	Lecturers
SS 2017	2530357	Engineering FinTech Solutions	Vorlesung (V)		Maxim Ulrich

Learning Control / Examinations

The grade consists of a written part and an oral exam. In the written part, students solve an academic problem from the field of risk and asset management. This part counts for 30% of the grade. An oral exam at the end of the semester accounts for 70% of the final grade and gives the student a chance to present and defend his solution.

Conditions

There are two conditions for taking this course:

1. This course is only open for registered students of the module "Intelligent Risk and Investment Advisory" and "Disruptive FinTech Solutions".
2. Registered students have completed a Bachelor thesis with a grade of 1.3 or better on a topic that has had a significant exposure to IT- or software engineering content. Alternatively, students who completed at least one of the following lectures with a grade of 1.7 or better are also eligible to participate: Computational Risk and Asset Management, Bayesian Risk Analytics and Machine Learning.

Recommendations

None

Remarks

New course starting summer term 2017.

V Event excerpt: Engineering FinTech Solutions (SS 2017)

Aim

Students develop modern IT-technologies to solve financial problems.

Content

This project-oriented lecture invites students to work independently and yet, under close monitoring of researchers and the professor of the C-RAM research group, on a sub-problem of a larger FinTech research question. Students will in a personalized manner be introduced to the necessary concepts, tools and methods that are necessary to solve the question at hand. Students obtain the opportunity to connect newest research insights with modern information technology to move a step closer towards their own development of a prototype. Depending on the topic, students work alone or in groups. An essential part of the guided research mentoring is that students take part in weekly meetings to discuss open issues, to present their progress and to learn from their fellow students

Workload

The total workload for this course is approximately 135 hours. For further information see German version.

Literature

Literature will be distributed during the first lecture.

V Event excerpt: Exchanges (SS 2017)

Aim

Students are in a position to discuss and evaluate current developments regarding the organisation of exchanges and securities trading.

Content

- Organisation of exchanges: Changing Zeitgeist - Corporates instead of cooperative structures
- Market models: order driven vs. market maker - Liquidity provision for less frequently traded securities
- Trading systems: The end of an era? - No more need for running traders?
- Clearing: Diversity instead of uniformity - Safety for all?
- Settlement: Increasing importance - Does efficient settlement assure the "value added" of exchanges in the long run?

Workload

The total workload for this course is approximately 45.0 hours. For further information see German version.

Literature

Elective literature:

Educational material will be offered within the lecture.

Learning Control / Examinations

The assessment consists of a written exam (60 min) (according to §4(2), 1 of the examination regulations). By successful completion of the exercises (§4 (2), 3 SPO 2007 respectively §4 (3) SPO 2015) a bonus can be obtained. If the grade of the written exam is at least 4.0 and at most 1.3, the bonus will improve it by one grade level (i.e. by 0.3 or 0.4). The bonus only applies to the first and second exam of the semester in which it was obtained.

Conditions

None

V Event excerpt: Experimental Economics (WS 17/18)

Aim

The students should learn

- how to gain scientific experience and knowledge (philosophy of science),
- how Game Theory and Experimental Economics influenced each other in scientific research,
- about the methods as well as the strengths and weaknesses of Experimental Economics,
- some examples of experimental research, such as markets and auctions, coordination games, bargaining, decision making under risk,
- how to evaluate data.

Content

Experimental Economics have become a separate field in Economics. Nearly all fields of the economic discipline use economic experiments to verify theoretical results. Besides being used for empirical validation, this method is applied in political and strategic consulting. The lecture gives an introduction to experimental methods in economics and shows differences to experiments in natural sciences. Scientific studies are used to show exemplary applications.

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

Learning Control / Examinations

The assessment consists of a written exam (120 min) according to Section 4 (2), 1 of the examination regulation.
The exam takes place in every semester.

Prerequisite for admission to examination is the successful completion of the online assessments.

Conditions

Prerequisite for admission to examination is the successful completion of the online assessments.

Recommendations

None

Remarks

The lecture is held in every winter term. The planned lectures and courses for the next three years are announced online.

V Event excerpt: Facility Location and Strategic Supply Chain Management (WS 17/18)

Aim

The student

- knows and describes basic quantitative methods in location planning in the context of strategic Supply Chain Planning,
- applies several criteria for the evaluation of the locations of facilities in the context of classical location planning models (planar models, network models and discrete models) and advanced location planning models designed for Supply Chain Management (single-period and multi-period models),
- implements the considered models in practical problems.

Content

Since the classical work "Theory of the Location of Industries" of Weber from 1909, the determination of an optimal location of a new facility with respect to existing customers is strongly connected to strategical logistics planning. Strategic decisions concerning the location of facilities as production plants, distribution centers or warehouses are of high importance for the rentability of supply chains. Thoroughly carried out, location planning allows an efficient flow of materials and leads to lower costs and increased customer service.

Subject of the course is an introduction to the most important terms and definitions in location planning as well as the presentation of basic quantitative location planning models. Furthermore, specialized location planning models for Supply Chain Management will be addressed as they are part in many commercial SCM tools for strategic planning tasks.

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

None

V Event excerpt: Financial Intermediation (WS 17/18)

Aim

Students

- are in a position to describe the arguments for the existence of financial intermediaries,
- are able to discuss and analyze both static and dynamic aspects of contractual relationships between banks and borrowers,
- are able to discuss the macroeconomic role of the banking system,
- are in a position to explain the fundamental principles of the prudential regulation of banks and are able to recognize and evaluate the implications of specific regulations.

Content

- Arguments for the existence of financial intermediaries
- Bank loan analysis, relationship lending
- Stability of the financial system
- The macroeconomic role of financial intermediation
- Principles of the prudential regulation of banks

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

V Event excerpt: Fixed Income Securities (WS 17/18)

Aim

The objective of this course is to become familiar with national and international bond markets. Therefore, we first have a look at financial instruments that are of particular importance. Thereafter, specific models and methods that allow the evaluation of interest rate derivatives are introduced and applied.

Content

The lecture deals with both German and international bond markets, which are an important source of funding for both the corporate and the public sector. After an overview of the most important bond markets, various definitions of return are discussed. Based on that, the concept of the yield curve is presented. The modelling of the dynamics of the term structure of interest rates provides the theoretical foundation for the valuation of interest rate derivatives, which is discussed in the last part of the lecture.

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

Learning Control / Examinations

Success is in the form of a written examination (60 min.) (according to § 4(2), 1 SPO) and possibly of a compulsory prerequisite.

The exam is offered in the lecture of semester and the following semester.

The success check can be done also with the success control for "Global optimization II". In this case, the duration of the written exam is 120 min.

Conditions

None

Modeled Conditions

The following conditions must be met:

- The course [\[T-WIWI-103638\] Global optimization I and II](#) must not have been started.

Recommendations

None

Remarks

Part I and II of the lecture are held consecutively in the *samesemester*.

V Event excerpt: (SS 2017)

Aim

The student

- knows and understands the fundamentals of deterministic global optimization in the convex case,
- is able to choose, design and apply modern techniques of deterministic global optimization in the convex case in practice.

Content

In many optimization problems from economics, engineering and natural sciences, numerical solution methods are only able to efficiently identify *local* optimizers, while it is much harder to find *globally* optimal points. This corresponds to the fact that by local search it is easy to find the summit of the closest mountain, but that the search for the summit of Mount Everest is rather elaborate.

Part I of the lecture treats methods for global optimization of convex functions under convex constraints. It is structured as follows:

- Introduction, examples, and terminology
- Existence results

-
- Optimality in convex optimization
 - Duality, bounds, and constraint qualifications
 - Numerical methods

Nonconvex optimization problems are treated in part II of the lecture.

The lecture is accompanied by computer exercises in which you can learn the programming language MATLAB and implement and test some of the methods for practically relevant examples.

Learning Control / Examinations

The assessment of the lecture is a written examination (60 minutes) according to §4(2), 1 of the examination regulation and possibly of a compulsory prerequisite.

The examination is held in the semester of the lecture and in the following semester.

The examination can also be combined with the examination of "Global optimization I". In this case, the duration of the written examination takes 120 minutes.

Conditions

None

Modeled Conditions

The following conditions must be met:

- The course [\[T-WIWI-103638\] Global optimization I and II](#) must not have been started.

Remarks

Part I and II of the lecture are held consecutively in the *samesemester*.

V Event excerpt: (SS 2017)

Aim

The student

- knows and understands the fundamentals of deterministic global optimization in the nonconvex case,
- is able to choose, design and apply modern techniques of deterministic global optimization in the nonconvex case in practice.

Content

In many optimization problems from economics, engineering and natural sciences, numerical solution methods are only able to efficiently identify *local* optimizers, while it is much harder to find *globally* optimal points. This corresponds to the fact that by local search it is easy to find the summit of the closest mountain, but that the search for the summit of Mount Everest is rather elaborate.

The global solution of convex optimization problems is subject of part I of the lecture.

Part II of the lecture treats methods for global optimization of nonconvex functions under nonconvex constraints. It is structured as follows:

- Introduction and examples
- Convex relaxation
- Interval arithmetic
- Convex relaxation via α BB method

-
- Branch and bound methods
 - Lipschitz optimization

The lecture is accompanied by computer exercises in which you can learn the programming language MATLAB and implement and test some of the methods for practically relevant examples.

Learning Control / Examinations

The assessment consists of a written exam (60 minutes) (following §4(2), 1 of the examination regulation). The exam takes place in every semester. Re-examinations are offered at every ordinary examination date.

In case of a small number of registrations, we might offer an oral exam instead of a written exam.

Conditions

None

Recommendations

Knowledge of microeconomics, game theory, and statistics is assumed.

Remarks

The course is carried out routinely in summer.

V Event excerpt: Incentives in Organizations (SS 2017)

Aim

The student

- develops a strategic understanding about incentives systems and how they work.
- analyzes models from personnel economics. He / she is able to use both, standard economic models and behavioral models.
- understands how econometric methods can be used to analyze performance and compensation data.
- is able to read and interpret results from regressions and derive economic relevance from those results.
- knows incentives schemes that are used in companies and is able to evaluate them critically.
- can develop practical implications which are based on theoretical models and empirical data for companies.
- understands the challenges of managing incentive and compensation systems and their relationship with corporate strategy.

Content

The students acquire profound knowledge about the design and the impact of different incentive and compensation systems. Topics covered are, for instance, performance based compensation, team work, intrinsic motivation, multitasking, and subjective performance evaluations. We will use microeconomic or behavioral models as well as empirical data to analyze incentive systems. We will investigate several widely used compensation schemes and their relationship with corporate strategy. Students will learn to develop practical implications which are based on the acquired knowledge of this course.

Workload

The total workload for this course is approximately 135 hours.

Remarks

New course starting summer term 2017.

V Event excerpt: (SS 2017)

Aim

- The students know the fundamentals and measures of information theory and are able to apply those in the context of Information Service Engineering.
- The students have basic skills of natural language processing and are enabled to apply natural language processing technology to solve and evaluate simple text analysis tasks.
- The students have fundamental skills of knowledge representation with ontologies as well as basic knowledge of Semantic Web and Linked Data technologies. The students are able to apply these skills for simple representation and analysis tasks.
- The students have fundamental skills of information retrieval and are enabled to conduct and to evaluate simple information retrieval tasks.
- The students apply their skills of natural language processing, Linked Data engineering, and Information Retrieval to conduct and evaluate simple knowledge mining tasks.
- The students know the fundamentals of recommender systems as well as of semantic and exploratory search.

T Course: Innovationtheory and -Policy [T-WIWI-102840]

Responsibility: Ingrid Ott

Contained in: [M-WIWI-101478] Innovation and growth

ECTS	Language	Recurrence	Version
4.5	deutsch	Jedes Sommersemester	1

Events

Term	Event-No.	Events	Type	SWS	Lecturers
SS 2017	2560236	Innovationtheory and -policy	Vorlesung (V)		Ingrid Ott
SS 2017	2560237		Übung (Ü)		Levent Eraydin, Ingrid Ott

Learning Control / Examinations

The assessment consists of a written exam (60 min) according to Section 4(2), 1 of the examination regulation. The exam takes place in every semester. Re-examinations are offered at every ordinary examination date.

Students will be given the opportunity of writing and presenting a short paper during the lecture time to achieve a bonus on the exam grade. If the mandatory credit point exam is passed, the awarded bonus points will be added to the regular exam points. A deterioration is not possible by definition, and a grade does not necessarily improve, but is very likely to (not every additional point improves the total number of points, since a grade can not become better than 1). The voluntary elaboration of such a paper can not countervail a fail in the exam.

Conditions

None

Recommendations

Basic knowledge of micro- and macroeconomics is assumed, as taught in the courses Economics I [2600012], and Economics II [2600014]. In addition, an interest in quantitative-mathematical modeling is required.

V Event excerpt: Innovationtheory and -policy (SS 2017)

Aim

Students shall be given the ability to

- identify the importance of alternative incentive mechanisms for the emergence and dissemination of innovations
- understand the relationships between market structure and the development of innovation
- explain, in which situations market interventions by the state, for example taxes and subsidies, can be legitimized, and evaluate them in the light of economic welfare

Content

- Incentives for the emergence of innovations
- Patents
- Diffusion
- Impact of technological progress
- Innovation Policy

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

V Event excerpt: Insurance Risk Management (SS 2017)

Aim

Getting to know basic principles of risk management in insurance companies and credit institutions.

Content

Einführend wird zunächst die Position von Risk Management in Kreditinstituten und Versicherungsunternehmen in Abgrenzung zu anderen Steuerungs- und Überwachungssystemen dargestellt. Erster Schwerpunkt der Vorlesung ist die Identifikation und Messung von Risiken (Methoden und Modelle), gefolgt von einer Darstellung ausgewählter Risk Management-Instrumente. Hierauf baut die Thematisierung von Kapitalbedarf (Soll-Kapital) und risikotragendem Kapital (Ist-Kapital) anhand verschiedener Modelle (Aufsicht nach Basel II und Solvency II, Rating sowie ökonomischer Modelle). Ferner werden Fragen und Standpunkte zur Basel II- und Solvency II-Diskussion und Reaktionen der deutschen Finanzdienstleistungsaufsicht dargestellt und diskutiert.

Die sog. Subprime-Krise (US-amerikanische Immobilienfinanzierung) bzw. die jetzt allgemeine Finanzmarktkrise und deren Auswirkungen auf deutsche Kreditinstitute und Versicherungen (Kapitalanlagen, D&O-Versicherung, Kreditaufzahlersicherung, Kreditvergabe, Refinanzierung) bilden den praxisbezogenen Schwerpunkt der diesjährigen Vorlesung.

Workload

The total workload for this course is approximately 75.0 hours. For further information see German version.

V Event excerpt: International Finance (SS 2017)

Aim

The objective of this course is to become familiar with the basics of investment decisions on international markets and to manage foreign exchange risks.

Content

The main aspects of this course are the chances and the risks which are associated with international transactions. We carry out our analysis from two distinct perspectives: First the point of view of an international investor second that of an international corporation. Several alternatives to the management of foreign exchange risks are shown. Due to the importance of foreign exchange risks, the first part of the course deals with currency markets. Furthermore current exchange rate theories are discussed.

Workload

The total workload for this course is approximately 90 hours. For further information see German version.

V Event excerpt: (SS 2017)

Aim

The student

- names and describes basic notions of stochastic optimization,
- knows the indispensable methods and models for quantitative analysis,
- models and classifies stochastic optimization problems and is able to quantify the value of the stochastic optimization approach compared to a deterministic method,
- validates, illustrates and interprets the obtained solutions.

Content

This class is an introduction in stochastic optimization. Stochastic optimization is the discipline of modeling and solving of optimization problems, where some input data are not known with certainty at the time when the decision is made. However, stochastic information is assumed available for these uncertain data, in form of a distribution. This class focuses on discrete distributions and it quantifies the value of stochastic optimization approaches. In addition, we cover special algorithms to solve stochastic optimization approaches. Other methods to model optimization problems under uncertainty are also discussed.

V Event excerpt: Knowledge Discovery (WS 17/18)

Aim

Students

- know fundamentals of Machine Learning, Data Mining and Knowledge Discovery.
- are able to design, train and evaluate adaptive systems.
- conduct Knowledge Discovery projects in regards to algorithms, representations and applications.

Content

Topics of the lectures comprise the whole Machine Learning and Data Mining process like CRISP, data warehousing, OLAP-techniques, learning algorithms, visualization and empirical evaluation. Covered learning techniques range from traditional approaches like decision trees, neural networks and support vector machines to selected approaches resulting from current research. Discussed learning problems are amongst others featurevector-based learning, text mining and social network analysis.

Workload

V Event excerpt: Machine Learning 1 - Basic methods (WS 17/18)

Aim

- Studierende erlangen Kenntnis der grundlegenden Methoden im Bereich des Maschinellen Lernens.
- Studierende können Methoden des Maschinellen Lernens einordnen, formal beschreiben und bewerten.
- Die Studierenden können ihr Wissen für die Auswahl geeigneter Modelle und Methoden für ausgewählte Probleme im Bereich des Maschinellen Lernens einsetzen.

Content

Das Themenfeld Wissensakquisition und Maschinelles Lernen ist ein stark expandierendes Wissenschaftsgebiet und Gegenstand zahlreicher Forschungs- und Entwicklungsvorhaben. Der Wissenserwerb kann dabei auf unterschiedliche Weise erfolgen. So kann ein System Nutzen aus bereits gemachten Erfahrungen ziehen, es kann trainiert werden, oder es zieht Schlüsse aus umfangreichem Hintergrundwissen.

Die Vorlesung behandelt sowohl symbolische Lernverfahren, wie induktives Lernen (Lernen aus Beispielen, Lernen durch Beobachtung), deduktives Lernen (Erklärungsbasiertes Lernen) und Lernen aus Analogien, als auch subsymbolische Techniken wie Neuronale Netze, Support Vektor-Maschinen, Genetische Algorithmen und Reinforcement Lernen. Die Vorlesung führt in die Grundprinzipien sowie Grundstrukturen lernender Systeme und der Lerntheorie ein und untersucht die bisher entwickelten Algorithmen. Der Aufbau sowie die Arbeitsweise lernender Systeme wird an einigen Beispielen, insbesondere aus den Gebieten Robotik, autonome mobile Systeme und Bildverarbeitung vorgestellt und erläutert.

Workload

Vorlesung mit 2 SWS, plus Nachbereitung durch die Studierenden.

Remarks

New course starting summer term 2017.

V Event excerpt: Machine Learning 2 - Advanced methods (SS 2017)

Aim

- Students gain knowledge of the basic methods in the field of machine learning.
- Students understand advanced concepts of machine learning and their application.
- Students can classify, formally describe and evaluate methods of machine learning.
- Students can use their knowledge to select suitable models and methods for selected problems in the field of machine learning.

Content

The subject area of machine intelligence and, in particular, machine learning, taking into account real challenges of complex application domains, is a rapidly expanding field of knowledge and the subject of numerous research and development projects.

The lecture “Machine Learning 2” deals with advanced methods of machine learning such as semi-supervised and active learning, deep neural networks (deep learning), pulsed networks, hierarchical approaches, e.g. As well as dynamic, probabilistic relational methods. Another focus is the embedding and application of machine learning methods in real systems.

The lecture introduces the latest basic principles as well as extended basic structures and elucidates previously developed algorithms. The structure and the mode of operation of the methods and methods are presented and explained by means of some application scenarios, especially in the field of technical (sub) autonomous systems (robotics, neurorobotics, image processing, etc.).

Workload

Vorlesung mit 2 SWS, plus Nachbereitung durch die Studierenden.

V Event excerpt: Management of IT-Projects (SS 2017)

Aim

Students

- explain the terminology of IT project management and typical used methods for planning, handling and controlling,
- apply methods appropriate to current project phases and project contexts,
- consider organisational and social impact factors.

Content

The lecture deals with the general framework, impact factors and methods for planning, handling, and controlling of IT projects. Especially following topics are addressed:

- project environment
- project organisation
- project planning including the following items:
 - plan of the project structure
 - flow chart
 - project schedule
 - plan of resources
- effort estimation
- project infrastructur
- project controlling
- risk management
- feasibility studies
- decision processes, conduct of negotiations, time management.

Recommendations

None

Remarks

Please note that only one of the following courses can be chosen in the Marketing Management Module: Marketing Strategy Business Game, Strategic Brand Management, Open Innovation – Concepts, Methods and Best Practices or Business Plan Workshop.

Please note: The number of participants for this course is limited. The Marketing and Sales Research Group typically provides the possibility to attend a course with 1.5 ECTS in the respective module to all students. Participation in a specific course cannot be guaranteed.

In order to participate in this course, you need to apply. Applications are usually accepted at the start of the lecture period in summer term. Detailed information on the application process is usually provided on the website of the Marketing and Sales Research Group (marketing.iism.kit.edu) shortly before the lecture period in summer term starts.

V Event excerpt: Marketing Strategy Business Game (SS 2017)

Aim

Students

- are able to operate the strategic marketing simulation software "Markstrat"
- are able to take strategic marketing decisions in groups
- know how to apply strategic marketing concepts to practical contexts (e.g. for market segmentation, product launches, coordination of the marketing mix, market research, choice of the distribution channel or competitive behavior)
- are capable to collect and to select information usefully with the aim of decision-making
- are able to react appropriately to predetermined market conditions
- know how to present their strategies in a clear and consistent way
- are able to talk about the success, problems, critical incidents, external influences and strategy changes during the experimental game and to reflect and present their learning success

Content

Using Markstrat, a marketing strategy business game, students work in groups representing a company that competes on a simulated market against the other groups' companies.

Workload

The total workload for this course is approximately 45.0 hours. For further information see German version.

Learning Control / Examinations

The assessment of the lecture is a written examination (60 minutes) according to §4(2), 1 of the examination regulation. The examination is held in the semester of the lecture and in the following semester.

Prerequisite for admission to the written examination is attaining at least 30% of the exercise points. Therefore the online-registration for the written examination is subject to fulfilling the prerequisite.

The examination can also be combined with the examination of *Mixed Integer Programming II* [25140]. In this case, the duration of the written examination takes 120 minutes.

Conditions

None

Recommendations

It is strongly recommended to visit at least one lecture from the Bachelor program of this chair before attending this course.

Remarks

The lecture is offered irregularly. The curriculum of the next three years is available online (kop.ior.kit.edu).

V Event excerpt: (WS 17/18)

Aim

The student

- knows and understands the fundamentals of linear mixed integer programming,
- is able to choose, design and apply modern techniques of linear mixed integer programming in practice.

Content

Many optimization problems from economics, engineering and natural sciences are modeled with continuous as well as discrete variables. Examples are the energy minimal design of a chemical process in which several reactors may be switched on or off, or the time minimal covering of a distance with a vehicle equipped with a gear shift. While optimal points can be defined straightforwardly, for their numerical identification an interplay of ideas from discrete and continuous optimization is necessary.

The lecture treats methods for the numerical solution of linear optimization problems which depend on continuous as well as discrete variables. It is structured as follows:

- Existence results and concepts of linear as well as convex optimization
- LP relaxation and error bounds for rounding
- Gomory's cutting plane method
- Benders decomposition

Part II of the lecture treats nonlinear mixed integer programs.

The lecture is accompanied by computer exercises in which you can learn the programming language MATLAB and implement and test some of the methods for practically relevant examples.

Learning Control / Examinations

The assessment of the lecture is a written examination (60 minutes) according to §4(2), 1 of the examination regulation.

The examination is held in the semester of the lecture and in the following semester.

Prerequisite for admission to the written examination is attaining at least 30% of the exercise points. Therefore the online-registration for the written examination is subject to fulfilling the prerequisite.

The examination can also be combined with the examination of *Mixed Integer Programming I* [2550138]. In this case, the duration of the written examination takes 120 minutes.

Conditions

None

Recommendations

It is strongly recommended to visit at least one lecture from the Bachelor program of this chair before attending this course.

Remarks

The lecture is offered irregularly. The curriculum of the next three years is available online (kop.ior.kit.edu).

Learning Control / Examinations

The assessment is a 120 minutes examination, including a written and a practical part (according to §4(2), 1 of the examination regulation).

The examination is held in the term of the software laboratory and the following term.

Conditions

None

Recommendations

Firm knowledge of the contents from the lecture *Introduction to Operations Research I* [2550040] of the module *Operations Research* [WW1OR].

Remarks

Due to capacity restrictions, registration before course start is required. For further information see the webpage of the course.

The lecture is offered in every term. The planned lectures and courses for the next three years are announced online.

V Event excerpt: (WS 17/18)

Aim

The student

- evaluates the possibilities of computer usage in practical applications of Operations Research,
- is capable of classifying and utilizing the general possibilities and fields of usage of modeling and implementation software for solving OR models in practice,
- models and solves problems arising in industry applications with the aid of computer-supported optimization methods.

Content

After an introduction to general concepts of modelling tools (implementation, data handling, result interpretation, . . .), the software IBM ILOG CPLEX Optimization Studio and the corresponding modeling language OPL will be discussed which can be used to solve OR problems on a computer-aided basis.

Subsequently, a broad range of exercises will be discussed. The main goals of the exercises from literature and practical applications are to learn the process of modeling optimization problems as linear or mixed-integer programs, to efficiently utilize the presented tools for solving these optimization problems and to implement heuristic solution procedures for mixed-integer programs.

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

T Course: Modelling, Measuring and Managing of Extreme Risks [T-WIWI-102841]

Responsibility: Ute Werner

Contained in: [M-WIWI-101469] Insurance Management I

Recommendations

None

V Event excerpt: Modelling, Measuring and Managing of Extreme Risks (SS 2017)

Aim

See German version.

Content

- Risk preferences under uncertainty, risk management strategies using utility functions, risk aversion, premium calculations, insurance principle, exceptions, Arrow Lind theorem. Probability and statistics introduction, distributions, Lebesgue integration.
- Introduction to Extreme value theory, Catastrophe models: Introduction to extreme value theory, asymptotic models, extremal types theorem, Generalized extreme value distributions, max-stability, domain of attraction inference for the GEV distribution, model generalization: order statistics. Catastrophemodelapproaches, simulationof extremes.
- Threshold models, generalized pareto distribution, threshold selection, parameter estimation, point process characterization, estimation under maximum domain: Pickands's estimator, Hill's estimator, Deckers-Einmahl-de Haan estimator.
- Catastrophe model approaches, simulation of earthquakes, hurricanes, and floods, vulnerability functions, loss estimation. Indirectvsdirecteffects.
- Introduction to financial risk management against rare events. Basic risk measures: VaR, CVar, CEL and current approaches. Risk management measures against extreme risk for different risk bearers: Insurance principle, loading factors, credits, reserve accumulation, risk aversion.
- Risk preferences in decision making processes. Utility theory, certainty equivalent, Arrow Lind proof for risk neutrality, exceptions in risk neutrality assumptions.
- The Fiscal Risk Matrix, Fiscal Hedge Matrix, Dealing with Risk in Fiscal Analysis and Fiscal Management (macroeconomic context, specific fiscal risks, institutional framework). Reducing Government Risk Exposure (Risk mitigation with private sector, Risk transfer and risk-sharing mechanisms, Managing residual risk).
- Approaches to Managing Fiscal Risk (Reporting on financial statements, Cost-based budgeting, Rules for talking fiscal risk, Market-type arrangements). Case: Analyzing Government Fiscal Risk Exposure in China (Krumm/Wong), The Fiscal Risk of Floods: Lessons of Argentina (AlciraKreimer).
- Case study presentations: Household level index based insurance systems (India, Ethiopia, SriLanka, China), insurance back-up systems coupled with public private partnerships (France, US), Reinsurance approaches (Munich Re, Swiss Re, Allianz).

-
- Climate Change topics: IPCC report, global and climate change.

Workload

The total workload for this course is approximately 75.0 hours. For further information see German version.

SS 2017	2550554		Vorlesung (V)	2	Oliver Grothe
SS 2017	2550555		Übung (Ü)	2	Maximilian Coblenz, Oliver Grothe

Learning Control / Examinations

The assessment of this course is a written examination (60 min) according to §4(2), 1 of the examination regulation. A bonus program can improve the grade by one grade level (i.e. by 0.3 or 0.4).

The exam is offered every semester. Re-examinations are offered only for repeaters.

Conditions

None

Recommendations

The course covers highly advanced statistical methods with a quantitative focus. Hence, participants are necessarily expected to have advanced statistical knowledge, e.g. acquired in the course "Advanced Statistics". Without this, participation in the course is not advised.

Previous attendance of the course Analysis of Multivariate Data is recommended. Alternatively, the script can be provided to interested students.

T Course: Nature-Inspired Optimisation Methods [T-WIWI-102679]

Responsibility: Pradyumn Kumar Shukla

Contained in: [M-WIWI-101472] Informatics

ECTS	Language	Recurrence	Version
5	englisch	Jedes Sommersemester	1

Events

Term	Event-No.	Events	Type	SWS	Lecturers
SS 2017	2511106		Vorlesung (V)	2	Pradyumn Kumar Shukla

Learning Control / Examinations

The assessment consists of a written exam (60 min) (according to Section 4(2), 1 of the examination regulation) and an additional written examination called "bonus exam", 60 min (according Section 4(2), 3 of the examination regulation) or a selection of exercises. The bonus exam may be split into several shorter written tests.

The grade of this course is the achieved grade in the written examination. If this grade is at least 4.0 and at most 1.3, a passed bonus exam will improve it by one grade level (i.e. by 0.3 or 0.4).

Conditions

None

V Event excerpt: (SS 2017)

Aim

To learn:

1. Different nature-inspired methods: local search, simulated annealing, tabu search, evolutionary algorithms, ant colony optimization, particle swarm optimization
2. Different aspects and limitation of the methods
3. Applications of such methods
4. Multi-objective optimization methods
5. Constraint handling methods
6. Different aspects in parallelization and computing platforms

Content

Many optimization problems are too complex to be solved to optimality. A promising alternative is to use stochastic heuristics, based on some fundamental principles observed in nature. Examples include evolutionary algorithms, ant algorithms, or simulated annealing. These methods are widely applicable and have proven very powerful in practice. During the course, such optimization methods based on natural principles are presented, analyzed and compared. Since the algorithms are usually quite computational intensive, possibilities for parallelization are also investigated.

Learning Control / Examinations

The assessment consists of a written exam (60 minutes) according to Section 4(2), 1 of the examination regulation and possibly of a compulsory prerequisite.

The exam takes place in the semester of the lecture and in the following semester.

The examination can also be combined with the examination of *Nonlinear Optimization II* [2550113]. In this case, the duration of the written examination takes 120 minutes.

Conditions

The module component exam T-WIWI-103637 "Nonlinear Optimization I and II" may not be selected.

Remarks

Part I and II of the lecture are held consecutively in the *samesemester*.

V Event excerpt: (WS 17/18)

Aim

The student

- knows and understands fundamentals of unconstrained nonlinear optimization,
- is able to choose, design and apply modern techniques of unconstrained nonlinear optimization in practice.

Content

The lecture treats the minimization of smooth nonlinear functions under nonlinear constraints. For such problems, which occur very often in economics, engineering, and natural sciences, we derive optimality conditions that form the basis for numerical solution methods. The lecture is structured as follows:

- Introduction, examples, and terminology
- Existence results for optimal points
- First and second order optimality conditions for unconstrained problems
- Optimality conditions for unconstrained convex problems
- Numerical methods for unconstrained problems (line search, steepest descent method, variable metric methods, Newton method, Quasi Newton methods, CG method, trust region method)

Constrained problems are the contents of part II of the lecture.

The lecture is accompanied by computer exercises in which you can learn the programming language MATLAB and implement and test some of the methods for practically relevant examples.

Remarks

In order to participate in this course, you need to apply. Applications are usually accepted at the start of the lecture period in summer term. Detailed information on the application process is usually provided on the website of the Marketing and Sales Research Group (marketing.iism.kit.edu) shortly before the lecture period in summer term starts.

Please note that only one of the following courses can be chosen in the Marketing Management Module: Marketing Strategy Business Game, Strategic Brand Management, Open Innovation – Concepts, Methods and Best Practices or Business Plan Workshop.

Please note: The number of participants for this course is limited. The Marketing and Sales Research Group typically provides the possibility to attend a course with 1,5 ECTS in the respective module to all students. Participation in a specific course cannot be guaranteed.

V Event excerpt: Open Innovation – Concepts, Methods and Best Practices (SS 2017)

Aim

Students

- know approaches, objectives, advantages and disadvantages of Open Innovation,
- know strategy, processes, methods and fields of application of Open Innovation,
- understand success factors by means of best practices from real life projects,
- can apply Open Innovation methods on their own.

Content

Joy's Law: "No matter who you are, most of the smartest people work for someone else" (Bill Joy, Co-Founder Sun Microsystems)

This lecture conveys an understanding and practical application of Open Innovation, i.e. the collaborative opening of the innovation process to customers, suppliers, partners, competitors, new markets.... The contents encompass among others:

- approaches, objectives, advantages and disadvantages of Open Innovation
- knowledge of approaches, objectives, advantages and disadvantages of Open Innovation
- strategy, processes, methods and fields of application of Open Innovation
- focus mainly on customer integration into the innovation process (e.g. Netnography, Crowdsourcing, Lead User, Trend Receiver,...)

-
- Understanding of success factors by means of best practices from real life projects (Digital Open Innovation, Idea Contests, Ideation, Hackathons, Idea Management, Customer Engagement, Lead User, Trend Receiver,...)
 - Independent application of Open Innovation methods.

Workload

Total workload for 1.5 ECTS: ca. 45 hours

Literature

To be announced in the course.

T Course: Operations Research in Health Care Management [T-WIWI-102884]

Responsibility: Stefan Nickel

Contained in: [M-WIWI-102805] Service Operations

ECTS	Recurrence	Version
4.5	Unregelmäßig	1

Learning Control / Examinations

The assessment is a 120 minutes written examination (according to §4(2), 1 of the examination regulation). The examination is held in the term of the lecture and the following lecture.

Conditions

None

Recommendations

Basic knowledge as conveyed in the module *Introduction to Operations Research* [WI1OR] is assumed.

Remarks

The course is offered irregularly. Planned lectures for the next three years can be found in the internet at <http://dol.ior.kit.edu/english/Courses.php>.

T Course: Operations Research in Supply Chain Management [T-WIWI-102715]

Responsibility: Stefan Nickel

Contained in: [M-WIWI-101473] Mathematical Programming

[M-WIWI-103289] Stochastic Optimization

[M-WIWI-102805] Service Operations

[M-WIWI-102832] Operations Research in Supply Chain Management

ECTS	Recurrence	Version
4.5	Unregelmäßig	1

Learning Control / Examinations

The assessment is a 120 minutes written examination (according to §4(2), 1 of the examination regulation).

The examination is held in the term of the lecture and the following lecture.

Conditions

None

Recommendations

Basic knowledge as conveyed in the module *Introduction to Operations Research* and in the lectures *Facility Location and Strategic SCM, Tactical and operational SCM* is assumed.

Remarks

The course is offered irregularly. Planned lectures for the next three years can be found in the internet at <http://dol.ior.kit.edu/english/Courses.php>.

**T Course: Optimisation and Optimal Control for Differential Equations

Learning Control / Examinations

The assessment of this course consists of a written examination (following §4(2), 1 SPOs) and of possible additional assignments during the course (§4 (2), 3 SPO 2007 respectively §4 (3) SPO 2015).

Conditions

None

V Event excerpt: Portfolio and Asset Liability Management (SS 2017)

Aim

Introduction and deepening of various portfolio management techniques in the financial industry.

Content

Portfolio theory: principles of investment, Markowitz- portfolio analysis, Modigliani-Miller theorems and absence of arbitrage, efficient markets, capital asset pricing model (CAPM), multi factorial CAPM, arbitragepricing theory (APT), arbitrage and hedging, multi factorial models, equity-portfolio management, passive strategies, active investment

Asset liability: statistical portfolio analysis in stock allocation, measures of success, dynamic multi seasonal models, models in building scenarios, stochastic programming in bond and liability management, optimal investment strategies, integrated asset liability management

Workload

The total workload for this course is approximately 150 hours. For further information see German version.

Literature

To be announced in lecture.

Elective literature:

To be announced in lecture.

V Event excerpt: Product and Innovation Marketing (SS 2017)

Aim

See German version.

Content

This course addresses topics around the management of new as well as existing products. After the foundations of product management, especially the product choice behavior of customers, students get to know in detail different steps of the innovation process. Another section regards the management of the existing product portfolio.

Workload

The total workload for this course is approximately 90 hours. For further information see German version.

V Event excerpt: Requirements Analysis and Requirements Management (WS 17/18)

Aim

The students have a full understanding of the foundations of the analysis and management of requirements as part of the development process of software and systems. They know the main terminology and approaches of this topic, and are able to express requirements themselves using different description methods.

Content

The analysis and management of requirements is a central task in the development of software and systems, addressing the border between the application discipline and computer science. The adequate performance of this task has a decisive influence on the whether or not a development project will be successful. The lecture provides an introduction to this topic, using the syllabus for the "Certified Professional for Requirements Engineering" (CPRE) as a guideline.

Lecture structure:

1. Introduction and overview, motivation
2. Identifying requirements
3. Documenting requirements (in natural language or using a modelling language such as UML)
4. Verification and validation of requirements
5. Management of requirements
6. Tool support

Workload

Workload: 120h overall,

V Event excerpt: (WS 17/18)

Aim

Die in die Veranstaltung eingebundenen Fallstudien sollen dabei helfen, Prozesse der Risikokommunikation verstehen zu lernen, um darauf basierend kommunikationspolitische Strategien und Instrumente entwerfen zu können. Dies kann abschließend an einem Konzept für Vision Zero in Deutschland und ähnlichen Risikokommunikationsproblemen geübt werden.

Content

Beispiele zu nicht beabsichtigten Wirkungen bei der Kommunikation zu Unternehmen, Ereignissen, Aktivitäten oder Zielen zeigen immer wieder, wie wichtig es ist, die möglichen Interpretationen der Empfänger bei der Gestaltung von Botschaften zu berücksichtigen.

Im Anschluss an eine Einführung in Modelle der Risikokommunikation auf individueller und gesellschaftlicher Ebene fokussieren wir auf die Risikokommunikation in Unternehmen. Hierbei wird zwischen dem systematischen Aufbau von Risikokommunikationskompetenzen, der Kommunikation in Krisensituationen und den organisatorischen Voraussetzungen für Erfolg versprechende Risikokommunikation getrennt. Ausgewählte Vertiefungen beschäftigen sich z.B. mit den spezifischen Anforderungen der Störfallverordnung.

Die in die Veranstaltung eingebundenen Fallstudien sollen dabei helfen, Prozesse der Risikokommunikation verstehen zu lernen, um darauf basierend kommunikationspolitische Strategien und Instrumente entwerfen zu können. Dies kann abschließend an einem Konzept für Vision Zero in Deutschland.

Alle Teilnehmer tragen aktiv zur Veranstaltung bei, indem sie einen Vortrag halten und eine Ausarbeitung anfertigen. Dies ist eine Veranstaltung im Modul 'Insurance Management' (M.Sc.), in der auch Seminarscheine erworben werden können. Die Präsentationen und Ausarbeitungen werden überwiegend in Gruppenarbeit erstellt.

Literature

Themenspezifische Literatur wird rechtzeitig vor Veranstaltungsbeginn genannt.

T Course: Semantic Web Technologies [T-WIWI-102874]

Responsibility: Andreas Harth, York Sure-Vetter
Contained in: [M-WIWI-101472] Informatics

SS 2017	2511311	Exercises to Semantic Web Technologies	Übung (Ü)	1	Maribel Acosta Deibe, Andreas Harth, York Sure-Vetter

Learning Control / Examinations

The assessment consists of an 1h written exam following §4, Abs. 2, 1 of the examination regulation or of an oral exam (20 min) following §4, Abs. 2, 2 of the examination regulation.

The exam takes place every semester and can be repeated at every regular examination date.

Conditions

None

Recommendations

Lectures on Informatics of the Bachelor on Information Management (Semester 1-4) or equivalent are required.

V Event excerpt: Semantic Web Technologies (SS 2017)

Aim

The student

- understands the motivation and foundational ideas behind Semantic Web and Linked Data technologies, and is able to analyse and realise systems
- demonstrates basic competency in the areas of data and system integration on the web
- masters advanced knowledge representation scenarios involving ontologies

Content

The following topics are covered:

- Resource Description Framework (RDF) and RDF Schema (RDFS)
- Web Architecture and Linked Data
- Web Ontology Language (OWL)
- Query language SPARQL
- Rule languages
- Applications

Workload

- The total workload for this course is approximately 150 hours
- Time of presentness: 45 hours
- Time of preparation and postprocessing: 67.5 hours
- Exam and exam preparation: 37.5 hours

Learning Control / Examinations

The non examassessmment (§4(2), 3 SPO 2007) or alternative exam assessment (§ 4(2), 3 SPO 2015)consists of

- a talk about the research topic of the seminar together with discussion,
- a written summary about the major issues of the topic and
- attending the discussions of the seminar

The grade is achieved by the weighted sum of the grades.

Conditions

None.

Recommendations

See seminar description in the course catalogue of the KIT (<https://campus.kit.edu/>)

Remarks

The listed seminar titles are placeholders. Currently offered seminars of each semester will be published on the websites of the institutes and in the course catalogue of the KIT. In general, the current seminar topics of each semester are already announced at the end of the previous semester. Furthermore for some seminars there is an application required.

The available places are listed on the internet: <https://portal.wiwi.kit.edu>.

V Event excerpt: Seminar Human Resources and Organizations (WS 17/18)

Aim

The student

- looks critically into current research topics in the fields of Human Resources and Organizations.
- trains his / her presentation skills.
- learns to get his / her ideas and insights across in a focused and concise way, both in oral and written form, and to sum up the crucial facts.
- cultivates the discussion of research approaches.

Content

The topics are redefined each semester on basis of current research topics. The topics will be announced on the website of the Chair.

Workload

The total workload for this course is approximately 90 hours.

Lecture 30h

Preparation of lecture 45h

Exam preparation 15h

V Event excerpt: Master Seminar in Information Engineering and Management (WS 17/18)

Aim

The student is able to

- to perform a literature search for a given topic, to identify, find, value and evaluate the relevant literature.
- to commit to a topic (pr.n., in teamwork); this may include technical conceptual work and implementation.
- to write his seminar thesis of 15-20 pages in a structured scientific manner.
- to communicate his results in a presentation with discussion afterwards.

Content

The seminar serves on one hand to improve the scientific working skills. On the other hand, the student should work intensively on a given topic and develop a scientific work, that is based on a profound literature research.

The seminar can also be a implementation of software for a scientific problem (e.g. Business Games/dynamic systems) according to the individual focus in the current semester. The software has to be well documented. The written elaboration covers a description and explanation of the software as well as a discussion about limits and extensibility. Furthermore the software must be deployable und shall be presented on the infrastructure stack of the chair. An implementation of a software has to examine the scientific state of the art in a critical way, too.

A concrete description of the current topics is announced in time for the begin of the application stage.

Workload

The total workload for this course is approximately 90 hours (3 ECTS). Depending on the realization of the work, the times may vary. The main focus is always on working independently.

V Event excerpt: Automated Financial Advisory (Master) (SS 2017)

Aim

In this seminar students work on issues related to the automatization of risk and investment management applications.

Content

At the beginning of the semester, a selection of seminar topics will be discussed with each student of the seminar.

Workload

The total workload for this course is approximately 90 hours.

Literature

Literature will be distributed during the first lecture.

V Event excerpt: Hospital Management (SS 2017)

Aim

The student

- knows the scope of duties and decisions of a hospital manager and
- is able to give profound guidance.

Content

The seminar 'Hospital Management' presents internal organization structures, work conditions and work environments at the example of hospitals und relates this to common and expected conditions of other service industries.

Covered topics include normative environment, intra-organizational structure, personnel management, quality, external networking and market appearance. The course consists of two full-day sessions.

Workload

The total workload for this course is approximately 90 hours.

V Event excerpt: Seminar Management Accounting and Costing Practices (SS 2017)

Aim

Students

- are largely independently able to identify a distinct topic in Management Accounting,
- are capable to research the topic, analyze the information, to conceptualize and deduct fundamental principles and relationships from relatively unstructured information,
- can afterwards logically and systematically present the results in writing and as an oral presentation, following a scientific approach (structuring, terminology, sources).

Content

The course will be a mix of lectures, discussions, and student presentations. Students will write a paper in small groups, and present this in the final week. You are to a large extent free to select your own topic. The seminar course is concentrated in four meetings that are spread throughout the semester.

Meeting 1: Introductory lecture. You need to conduct a first literature search and at the end of the first week you should identify (provisionally) the topic for your paper.

Meeting 2 and 3: The purpose of the second week is to define the topics and research questions in much more detail. Different types of papers may be selected: literature review, research paper, descriptive case study, or teaching case. Students will present their ideas and all participants should ask questions, help each other focus, offer ideas, etc.

Meeting 4: In the third week we are going to present and discuss the final papers.

Workload

The total workload for this course is approximately 90 hours. For further information see German version.

Literature

Will be announced in the course.

Literature

Will be announced in the course.

V Event excerpt: Seminar in Finance (SS 2017)

Aim

The student gets in touch with scientific work. Through profound working on a specific scientific topic the student is meant to learn the foundations of scientific research and reasoning in particular in finance.

Through the presentations in this seminar the student becomes familiar with the fundamental techniques for presentations and foundations of scientific reasoning. In addition, the student earns rhetorical skills.

Content

Within this seminar different topics of current concern are treated. These topics have their foundations in the contents of certain lectures.

The topics of the seminar are published on the website of the involved finance chairs at the end of the foregoing semester.

Workload

The total workload for this course is approximately 90 hours. For further information see German version.

Literature

Will be announced at the end of the foregoing semester.

V Event excerpt: (WS 17/18)

Aim

Die in die Veranstaltung eingebundenen Fallstudien sollen dabei helfen, Prozesse der Risikokommunikation verstehen zu lernen, um darauf basierend kommunikationspolitische Strategien und Instrumente entwerfen zu können. Dies kann abschließend an einem Konzept für Vision Zero in Deutschland und ähnlichen Risikokommunikationsproblemen geübt werden.

Content

Beispiele zu nicht beabsichtigten Wirkungen bei der Kommunikation zu Unternehmen, Ereignissen, Aktivitäten oder Zielen zeigen immer wieder, wie wichtig es ist, die möglichen Interpretationen der Empfänger bei der Gestaltung von Botschaften zu berücksichtigen.

Im Anschluss an eine Einführung in Modelle der Risikokommunikation auf individueller und gesellschaftlicher Ebene fokussieren wir auf die Risikokommunikation in Unternehmen. Hierbei wird zwischen dem systematischen Aufbau von Risikokommunikationskompetenzen, der Kommunikation in Krisensituationen und den organisatorischen Voraussetzungen für Erfolg versprechende Risikokommunikation getrennt. Ausgewählte Vertiefungen beschäftigen sich z.B. mit den spezifischen Anforderungen der Störfallverordnung.

Die in die Veranstaltung eingebundenen Fallstudien sollen dabei helfen, Prozesse der Risikokommunikation verstehen zu lernen, um darauf basierend kommunikationspolitische Strategien und Instrumente entwerfen zu können. Dies kann abschließend an einem Konzept für Vision Zero in Deutschland.

Alle Teilnehmer tragen aktiv zur Veranstaltung bei, indem sie einen Vortrag halten und eine Ausarbeitung anfertigen. Dies ist eine Veranstaltung im Modul 'Insurance Management' (M.Sc.), in der auch Seminarscheine erworben werden können. Die Präsentationen und Ausarbeitungen werden überwiegend in Gruppenarbeit erstellt.

Literature

Themenspezifische Literatur wird rechtzeitig vor Veranstaltungsbeginn genannt.

V Event excerpt: Seminar: Energy Informatics (WS 17/18)

Aim

Der/die Studierende besitzt einen vertieften Einblick in Themenbereiche der Energieinformatik und hat grundlegende Kenntnisse in den Bereichen der Modellierung, Simulation und Algorithmen in Energienetzen. Ausgehend von einem vorgegebenen Thema kann er/sie mithilfe einer Literaturrecherche relevante Literatur identifizieren, auffinden, bewerten und schließlich auswerten. Er/sie kann das Thema in den Themenkomplex einordnen und in einen Gesamtzusammenhang bringen.

Er/sie ist in der Lage eine Seminararbeit (und später die Bachelor-/Masterarbeit) mit minimalem Einarbeitungsaufwand anzufertigen und dabei Formatvorgaben zu berücksichtigen, wie sie von allen Verlagen bei der Veröffentlichung von Dokumenten vorgegeben werden. Außerdem versteht er/sie das vorgegebene Thema in Form einer wissenschaftlichen Präsentation auszuarbeiten und kennt Techniken um die vorzustellenden Inhalte auditoriumsgerecht aufzuarbeiten und vorzutragen. Somit besitzt er/sie die Kenntnis wissenschaftliche Ergebnisse der Recherche in schriftlicher Form derart zu präsentieren, wie es in wissenschaftlichen Publikationen der Fall ist.

Content

Energieinformatik ist eine junges Forschungsgebiet, welches verschiedene Bereiche ausserhalb der Informatik beinhaltet wie der Wirtschaftswissenschaft, Elektrotechnik und Rechtswissenschaften. Bedingt durch die Energiewende wird vermehrt Strom aus erneuerbaren Erzeugern in das Netz eingespeist. Der Trend hin zu dezentralen und volatilen Stromerzeugung führt jedoch schon heute zu Engpässen in Stromnetzen, da diese für ein bidirektionales Szenario nicht ausgelegt wurden. Mithilfe der Energieinformatik und der dazugehörigen Vernetzung der verschiedenen Kompetenzen soll eine intelligente Steuerung der Netzinfrastruktur—von Stromverbrauchern, -erzeugern, -speichern und Netzkomponenten—zu einer umweltfreundlichen, nachhaltigen, effizienten und verlässlichen Energieversorgung beitragen.

Daher sollen im Rahmen des Seminars „Seminar: Energieinformatik“, unterschiedliche Algorithmen, Simulationen und Modellierungen bzgl. ihrer Vor- und Nachteile in den verschiedenen Bereichen der Netzinfrastruktur untersucht werden.

Workload

- 4 LP entspricht ca. 120 Stunden
- ca. 21 Std. Besuch des Seminars,
- ca. 45 Std. Analyse und Bearbeitung des Themas,
- ca. 27 Std. Vorbereitung und Erstellung der Präsentation, und
- ca. 27 Std. Schreiben der Ausarbeitung.

V Event excerpt: Seminar Human Resource Management (WS 17/18)

Aim

The student

- looks critically into current research topics in the fields of Human Resource Management and Personnel Economics.
- trains his / her presentation skills.
- learns to get his / her ideas and insights across in a focused and concise way, both in oral and written form, and to sum up the crucial facts.
- cultivates the discussion of research approaches.

Workload

The total workload for this course is approximately 90 hours.

V Event excerpt: Special Topics in Management Accounting (SS 2017)

Aim

Students

- are largely independently able to identify a distinct topic in Management Accounting,
- are capable to research the topic, analyze the information, to conceptualize and deduct fundamental principles and relationships from relatively unstructured information,
- can afterwards logically and systematically present the results in writing and as an oral presentation, following a scientific approach (structuring, terminology, sources).

Content

The course will be a mix of lectures, discussions, and student presentations. Students will write a paper in small groups, and present this in the final week. Topics are selectively prediscibed. The seminar course is concentrated in four meetings that are spread throughout the semester.

Meeting 1: Introductory lecture. You need to conduct a first literature search and at the end of the first week you should identify (provisionally) the topic for your paper.

Meeting 2 and 3: The purpose of the second week is to define the topics and research questions in much more detail. Different types of papers may be selected: literature review, research paper, descriptive case study, or teaching case. Students will present their ideas and all participants should ask questions, help each other focus, offer ideas, etc.

Meeting 4: In the third week we are going to present and discuss the final papers.

Workload

The total workload for this course is approximately 90 hours. For further information see German version.

Literature

Will be announced in the course.

V Event excerpt: (WS 17/18)

Aim

Students

- can exploit a literature field systematically
- are able to write an academic paper in a formally correct way
- can assess the relevance and quality of sources
- are able to get an overview of sources very quickly
- know how to find relevant sources for a literature field
- are capable to write a convincing outline
- know how to categorize a subject under a research field
- understand how to systematize literature fields theoretically and empirically with the help of literature tables
- can identify the most important findings in a huge number of sources
- are able to present a research field
- can discuss the theoretical and practical implications of a topic
- are capable to identify interesting research gaps

Content

The seminary teaches students to gain a systematic overview of a field of literature in Marketing - an important prerequisite for a successful master thesis. Central aspects are identification of relevant literature sources, systematization of the field, working out central insights, writing comprehensively, and identification of research gaps.

Workload

The total workload for this course is approximately 90 hours. For further information see German version.

Literature

will be announced in the seminary.

V Event excerpt: (WS 17/18)

Aim

Learning to identify, to analyse and to assess business risks; this serves as a basis for strategy and policy design regarding risks and opportunities of an enterprise. Introduction to approaches that allow to consider area-specific risk objectives, risk-bearing capacity and risk acceptance.

Content

1. Concepts and practice of risk management, based on decision theory
2. Goals, strategies and policies for the identification, analysis, assessment and management of risks
3. Insurance as an instrument for loss-financing
4. Selected aspects of risk management: e.g. environmental protection, organizational failure and D&O-coverage, development of a risk management culture
5. Organisation of risk management
6. Approaches for determining optimal combinations of risk management measures considering their investment costs and outcomes.

Workload

The overall amount of work necessary for this course is approx. 135 hours (4.5 ECTS-Credits).

Literature

- K. Hoffmann. Risk Management - Neue Wege der betrieblichen Risikopolitik. 1985.
- R. Hölscher, R. Elfgen. Herausforderung Risikomanagement. Identifikation, Bewertung und Steuerung industrieller Risiken. Wiesbaden 2002.
- W. Gleissner, F. Romeike. Risikomanagement - Umsetzung, Werkzeuge, Risikobewertung. Freiburg im Breisgau 2005.

Der Trend hin zu dezentralen und volatilen Stromerzeugung führt jedoch schon heute zu Engpässen in Stromnetzen, da diese für ein bidirektionales Szenario nicht ausgelegt wurden. Mithilfe der Energieinformatik und der dazugehörigen Vernetzung der verschiedenen Kompetenzen soll eine intelligente Steuerung der Netzinfrastruktur—von Stromverbrauchern, -erzeugern, -speichern und Netzkomponenten—zu einer umweltfreundlichen, nachhaltigen, effizienten und verlässlichen Energieversorgung beitragen.

Daher sollen im Rahmen des Seminars „Seminar: Energieinformatik“, unterschiedliche Algorithmen, Simulationen und Modellierungen bzgl. ihrer Vor- und Nachteile in den verschiedenen Bereichen der Netzinfrastruktur untersucht werden.

Workload

- 4 LP entspricht ca. 120 Stunden
- ca. 21 Std. Besuch des Seminars,
- ca. 45 Std. Analyse und Bearbeitung des Themas,
- ca. 27 Std. Vorbereitung und Erstellung der Präsentation, und
- ca. 27 Std. Schreiben der Ausarbeitung.

V Event excerpt: Seminar Human Resource Management (WS 17/18)

Aim

The student

- looks critically into current research topics in the fields of Human Resource Management and Personnel Economics.
- trains his / her presentation skills.
- learns to get his / her ideas and insights across in a focused and concise way, both in oral and written form, and to sum up the crucial facts.
- cultivates the discussion of research approaches.

Workload

The total workload for this course is approximately 90 hours.

Lecture 30h

Preparation of lecture 45h

Exam preparation 15h

V Event excerpt: Seminar Management Accounting and Innovation (SS 2017)

Aim

Students

- are largely independently able to identify a distinct topic in Management Accounting,
- are capable to research the topic, analyze the information, to conceptualize and deduct fundamental principles and relationships from relatively unstructured information,
- can afterwards logically and systematically present the results in writing and as an oral presentation, following a scientific approach (structuring, terminology, sources).

Content

The course will be a mix of lectures, discussions, and student presentations. Students will write a paper in small groups, and present this in the final week. You are to a large extent free to select your own topic. The seminar course is concentrated in four meetings that are spread throughout the semester.

Meeting 1: Introductory lecture. You need to conduct a first literature search and at the end of the first week you should identify (provisionally) the topic for your paper.

Meeting 2 and 3: The purpose of the second week is to define the topics and research questions in much more detail. Different types of papers may be selected: literature review, research paper, descriptive case study, or teaching case. Students will present their ideas and all participants should ask questions, help each other focus, offer ideas, etc.

Meeting 4: In the third week we are going to present and discuss the final papers.

Workload

The total workload for this course is approximately 90 hours. For further information see German version.

Literature

Will be announced in the course.

V Event excerpt: Special Topics in Management Accounting (SS 2017)

Aim

Students

- are largely independently able to identify a distinct topic in Management Accounting,
- are capable to research the topic, analyze the information, to conceptualize and deduct fundamental principles and relationships from relatively unstructured information,
- can afterwards logically and systematically present the results in writing and as an oral presentation, following a scientific approach (structuring, terminology, sources).

Content

The course will be a mix of lectures, discussions, and student presentations. Students will write a paper in small groups, and present this in the final week. Topics are selectively prediscibed. The seminar course is concentrated in four meetings that are spread throughout the semester.

Meeting 1: Introductory lecture. You need to conduct a first literature search and at the end of the first week you should identify (provisionally) the topic for your paper.

Meeting 2 and 3: The purpose of the second week is to define the topics and research questions in much more detail. Different types of papers may be selected: literature review, research paper, descriptive case study, or teaching case. Students will present their ideas and all participants should ask questions, help each other focus, offer ideas, etc.

Meeting 4: In the third week we are going to present and discuss the final papers.

Workload

The total workload for this course is approximately 90 hours. For further information see German version.

Literature

Will be announced in the course.

V Event excerpt: (WS 17/18)

Aim

Students

- can exploit a literature field systematically
- are able to write an academic paper in a formally correct way
- can assess the relevance and quality of sources
- are able to get an overview of sources very quickly
- know how to find relevant sources for a literature field
- are capable to write a convincing outline
- know how to categorize a subject under a research field
- understand how to systematize literature fields theoretically and empirically with the help of literature tables
- can identify the most important findings in a huge number of sources
- are able to present a research field
- can discuss the theoretical and practical implications of a topic
- are capable to identify interesting research gaps

Content

The seminary teaches students to gain a systematic overview of a field of literature in Marketing - an important prerequisite for a successful master thesis. Central aspects are identification of relevant literature sources, systematization of the field, working out central insights, writing comprehensively, and identification of research gaps.

Workload

The total workload for this course is approximately 90 hours. For further information see German version.

Literature

will be announced in the seminary.

V Event excerpt: (WS 17/18)

Aim

Learning to identify, to analyse and to assess business risks; this serves as a basis for strategy and policy design regarding risks and opportunities of an enterprise. Introduction to approaches that allow to consider area-specific risk objectives, risk-bearing capacity and risk acceptance.

Content

1. Concepts and practice of risk management, based on decision theory
2. Goals, strategies and policies for the identification, analysis, assessment and management of risks
3. Insurance as an instrument for loss-financing
4. Selected aspects of risk management: e.g. environmental protection, organizational failure and D&O-coverage, development of a risk management culture
5. Organisation of risk management
6. Approaches for determining optimal combinations of risk management measures considering their investment costs and outcomes.

Workload

The overall amount of work necessary for this course is approx. 135 hours (4.5 ECTS-Credits).

Literature

- K. Hoffmann. Risk Management - Neue Wege der betrieblichen Risikopolitik. 1985.
- R. Hölscher, R. Elfgen. Herausforderung Risikomanagement. Identifikation, Bewertung und Steuerung industrieller Risiken. Wiesbaden 2002.
- W. Gleissner, F. Romeike. Risikomanagement - Umsetzung, Werkzeuge, Risikobewertung. Freiburg im Breisgau 2005.
- H. Schierenbeck (Hrsg.). Risk Controlling in der Praxis. Zürich 2006.

Elective literature:

Additional literature is recommended during the course.

T Course: Seminar in Economics A (Master) [T-WIWI-103478]

Responsibility: Johannes Brumm, Jan Kowalski, Kay Mitusch, Ingrid Ott, Clemens Puppe, Johannes Philipp Reiß, Nora Szech, Berthold Wigger

V Event excerpt: Smart Services and the IoT (WS 17/18)

Content

Domains of interest include, but are not limited to:

- Medicine
- Social Media
- Finance Market

V Event excerpt: Developing IT-based Business Models (WS 17/18)

Aim

The Student

- analyzes and develops in small teams a business model from an idea to a complete business plan or
- treats a special topic from the area of Semantic Web in businesses and entrepreneurship.
- learns about basic concepts and problem areas and considers these while building the business plan for a particular business idea.
- understands and considers the viewpoints of different stakeholders in the area of entrepreneurship and their influences on an own business idea.

Content

Semantic technologies such as RDF, SPARQL, OWL, and RIF are still standardised only in their first versions. Still, the multitude of integrated technologies provides the basis for development of new applications and creates, with the help of the initial standardisations, a foundation for attracting investors. The potential and future developments in the field are exemplified by the growing popularity and importance of data, being published as Linked Data, as well as by the increase in applications developed outside the scope of research. The seminar "Developing Business Models for the Semantic Web" aims to explore these opportunities for new business models und business ventures.

The seminar takes place on a weekly basis and consists of two main parts. The first part is a series of presentations, held by external experts who share their experience in the area of entrepreneurship. The aim is to engage a wide variety of presenters, including applicants to programs for supporting young business ventures, startup founders, and people in leadership positions in established companies. Further guest lecturers include experts in the field of business and startup development, tax and enterprise law, as well as entrepreneurs, who have sold their startups or had to give up their ideas. The second part consists of the contributions of seminar participants. They are required to develop a business model, starting with the initial idea and building it up to a complete business plan. This development process is accompanied by feedback sessions, pitches, mid-term presentations and a final presentation. The student presentations alternate with presentations given by external experts. Furthermore, besides on the development of a business plan, student can work on a specific topic such as "Analysing Existing Business Models on the Web" or "Using Open Source in Startups".

The seminar pass can be obtained by submitting a completed seminar thesis (i.e. the business plan or the specific topic) and by regularly attending the seminar presentations.

Workload

The total workload for this course is approximately 90 hours. For further information see German version.

V Event excerpt: Seminar: Energy Informatics (WS 17/18)

Aim

Der/die Studierende besitzt einen vertieften Einblick in Themenbereiche der Energieinformatik und hat grundlegende Kenntnisse in den Bereichen der Modellierung, Simulation und Algorithmen in Energienetzen. Ausgehend von einem vorgegebenen Thema kann er/sie mithilfe einer Literaturrecherche relevante Literatur identifizieren, auffinden, bewerten und schließlich auswerten. Er/sie kann das Thema in den Themenkomplex einordnen und in einen Gesamtzusammenhang bringen.

Er/sie ist in der Lage eine Seminararbeit (und später die Bachelor-/Masterarbeit) mit minimalem Einarbeitungsaufwand anzufertigen und dabei Formatvorgaben zu berücksichtigen, wie sie von allen Verlagen bei der Veröffentlichung von Dokumenten vorgegeben werden. Außerdem versteht er/sie das vorgegebene Thema in Form einer wissenschaftlichen Präsentation auszuarbeiten und kennt Techniken um die vorzustellenden Inhalte auditoriumsgerecht aufzuarbeiten und vorzutragen. Somit besitzt er/sie die Kenntnis wissenschaftliche Ergebnisse der Recherche in schriftlicher Form derart zu präsentieren, wie es in wissenschaftlichen Publikationen der Fall ist.

Content

Energieinformatik ist eine junges Forschungsgebiet, welches verschiedene Bereiche ausserhalb der Informatik beinhaltet wie der Wirtschaftswissenschaft, Elektrotechnik und Rechtswissenschaften. Bedingt durch die Energiewende wird vermehrt

Strom aus erneuerbaren Erzeugern in das Netz eingespeist. Der Trend hin zu dezentralen und volatilen Stromerzeugung führt jedoch schon heute zu Engpässen in Stromnetzen, da diese für ein bidirektionales Szenario nicht ausgelegt wurden. Mithilfe der Energieinformatik und der dazugehörigen Vernetzung der verschiedenen Kompetenzen soll eine intelligente Steuerung der Netzinfrastruktur—von Stromverbrauchern, -erzeugern, -speichern und Netzkomponenten—zu einer umweltfreundlichen, nachhaltigen, effizienten und verlässlichen Energieversorgung beitragen.

Daher sollen im Rahmen des Seminars „Seminar: Energieinformatik“, unterschiedliche Algorithmen, Simulationen und Modellierungen bzgl. ihrer Vor- und Nachteile in den verschiedenen Bereichen der Netzinfrastruktur untersucht werden.

ca. 21 Std. Besuch des Seminars,
ca. 45 Std. Analyse und Bearbeitung des Themas,
ca. 27 Std. Vorbereitung und Erstellung der Präsentation, und
ca. 27 Std. Schreiben der Ausarbeitung.

V Event excerpt: Seminar Service Science, Management & Engineering (WS 17/18)

Aim

The student

- illustrates and evaluates classic and current research questions in service science, management and engineering,
- applies models and techniques in service science, also with regard to their applicability in practical cases,
- successfully gets in touch with scientific working by an in-depth working on a special scientific topic which makes the student familiar with scientific literature research and argumentation methods,
- acquires good rhetorical and presentation skills.

As a further aspect of scientific work, especially for Master students the emphasis is put on a critical discussion of the seminar topic.

Content

Each Semester, the seminar will cover topics from a different selected subfield of Service Science, Management & Engineering. Topics include service innovation, service economics, service computing, transformation and coordination of service value networks as well as collaboration for knowledge intensive services.

See the KSRI website for more information about this seminar: www.ksri.kit.edu

Workload

The total workload for this course is approximately 120 hours. For further information see German version.

Literature

The student will receive the necessary literature for his research topic.

V Event excerpt: Applications of Semantic MediaWiki (WS 17/18)

V Event excerpt: (WS 17/18)

Aim

Ziel der Vorlesung ist es, Kenntnisse über Grundlagen und weitergehende Methoden und Techniken des Ubiquitous Computing zu vermitteln. Nach Abschluss der Vorlesung können die Studierenden

- das erlernte Wissen über existierende Ubiquitous Computing Systeme wiedergeben und erörtern.
- die allgemeinen Kenntnisse zu Ubiquitären Systemen bewerten und Aussagen und Gesetzmäßigkeiten auf Sonderfälle übertragen.
- unterschiedliche Methoden zu Design-Prozessen und Nutzerstudien bewerten und beurteilen sowie geeignete Methoden für die Entwicklung neuer Lösungen auswählen.
- selbst neue ubiquitäre Systeme für den Einsatz in Alltags- oder industriellen Prozessumgebungen erfinden, planen, entwerfen und bewerten sowie Aufwände und technische Implikationen bemessen.

Content

Die Vorlesung gibt einen Überblick über Konzepte, Theorien und Methoden der Ubiquitären Informationstechnologie (Ubiquitous Computing). Anhand des Appliance-Konzepts werden dann in der Übung von den Studierenden eigene Appliances entworfen, die Konstruktion geplant und dann entwickelt. Die notwendigen technischen und methodischen Grundlagen wie Hardware für Ubiquitäre Systeme, Software für Ubiquitäre Systeme, Prinzipien der Kontexterkennung für Ubiquitäre Systeme, Vernetzung Ubiquitärer Systeme und Entwurf von Ubiquitären Systemen und insbesondere Information Appliances werden thematisiert. In Ubiquitous Computing entwickelte Methoden des Entwurfs und Testens für Mensch-Maschine Interaktion und Mensch-Maschine Schnittstellen werden ausführlich erklärt. Es findet auch eine Einführung findet in die wirtschaftlichen Aspekte eines Ubiquitären Systems statt.

Im Übungsteil der Vorlesung wird durch praktische Anwendung der Wissensgrundlage der Vorlesung das Verständnis in Ubiquitäre Systeme vertieft. Die Studierenden entwerfen und entwickeln dazu eine eigene Appliance und testen diese. Ziel ist es die Schritte hin zu einer prototypischen und eventuell marktfähigen Appliance durchlaufen zu haben.

Workload

Der Gesamtarbeitsaufwand für diese Lerneinheit beträgt ca. 150 Stunden (5.0 Credits).

The student presentations alternate with presentations given by external experts. Furthermore, besides on the development of a business plan, student can work on a specific topic such as "Analysing Existing Business Models on the Web" or "Using Open Source in Startups".

The seminar pass can be obtained by submitting a completed seminar thesis (i.e. the business plan or the specific topic) and by regularly attending the seminar presentations.

Workload

The total workload for this course is approximately 90 hours. For further information see German version.

V Event excerpt: (SS 2017)

Content

Domains of interest include, but are not limited to:

- Medicine
- Social Media
- Finance Market

Literature

Detailed references are indicated together with the respective subjects. For general background information look up the following textbooks:

- Mitchell, T.; Machine Learning
- McGraw Hill, Cook, D.J. and Holder, L.B. (Editors) Mining Graph Data, ISBN:0-471-73190-0
- Wiley, Manning, C. and Schütze, H.; Foundations of Statistical NLP, MIT Press, 1999.

V Event excerpt: Seminar: Energy Informatics (WS 17/18)

Aim

Der/die Studierende besitzt einen vertieften Einblick in Themenbereiche der Energieinformatik und hat grundlegende Kenntnisse in den Bereichen der Modellierung, Simulation und Algorithmen in Energienetzen. Ausgehend von einem vorgegebenen Thema kann er/sie mithilfe einer Literaturrecherche relevante Literatur identifizieren, auffinden, bewerten und schließlich auswerten. Er/sie kann das Thema in den Themenkomplex einordnen und in einen Gesamtzusammenhang bringen.

Er/sie ist in der Lage eine Seminararbeit (und später die Bachelor-/Masterarbeit) mit minimalem Einarbeitungsaufwand anzufertigen und dabei Formatvorgaben zu berücksichtigen, wie sie von allen Verlagen bei der Veröffentlichung von Dokumenten vorgegeben werden. Außerdem versteht er/sie das vorgegebene Thema in Form einer wissenschaftlichen Präsentation auszuarbeiten und kennt Techniken um die vorzustellenden Inhalte auditoriumsgerecht aufzuarbeiten und vorzutragen. Somit besitzt er/sie die Kenntnis wissenschaftliche Ergebnisse der Recherche in schriftlicher Form derart zu präsentieren, wie es in wissenschaftlichen Publikationen der Fall ist.

Content

Energieinformatik ist eine junges Forschungsgebiet, welches verschiedene Bereiche ausserhalb der Informatik beinhaltet wie der Wirtschaftswissenschaft, Elektrotechnik und Rechtswissenschaften. Bedingt durch die Energiewende wird vermehrt

Strom aus erneuerbaren Erzeugern in das Netz eingespeist. Der Trend hin zu dezentralen und volatilen Stromerzeugung führt jedoch schon heute zu Engpässen in Stromnetzen, da diese für ein bidirektionales Szenario nicht ausgelegt wurden. Mithilfe der Energieinformatik und der dazugehörigen Vernetzung der verschiedenen Kompetenzen soll eine intelligente Steuerung der Netzinfrastruktur—von Stromverbrauchern, -erzeugern, -speichern und Netzkomponenten—zu einer umweltfreundlichen, nachhaltigen, effizienten und verlässlichen Energieversorgung beitragen.

Daher sollen im Rahmen des Seminars „Seminar: Energieinformatik“, unterschiedliche Algorithmen, Simulationen und Modellierungen bzgl. ihrer Vor- und Nachteile in den verschiedenen Bereichen der Netzinfrastruktur untersucht werden.

Workload

4 LP entspricht ca. 120 Stunden
ca. 21 Std. Besuch des Seminars,
ca. 45 Std. Analyse und Bearbeitung des Themas,
ca. 27 Std. Vorbereitung und Erstellung der Präsentation, und
ca. 27 Std. Schreiben der Ausarbeitung.

V Event excerpt: Seminar Service Science, Management & Engineering (WS 17/18)

Aim

The student

- illustrates and evaluates classic and current research questions in service science, management and engineering,
- applies models and techniques in service science, also with regard to their applicability in practical cases,
- successfully gets in touch with scientific working by an in-depth working on a special scientific topic which makes the student familiar with scientific literature research and argumentation methods,
- acquires good rhetorical and presentation skills.

As a further aspect of scientific work, especially for Master students the emphasis is put on a critical discussion of the seminar topic.

Content

Each Semester, the seminar will cover topics from a different selected subfield of Service Science, Management & Engineering. Topics include service innovation, service economics, service computing, transformation and coordination of service value networks as well as collaboration for knowledge intensive services.

See the KSRI website for more information about this seminar: www.ksri.kit.edu

Workload

The total workload for this course is approximately 120 hours. For further information see German version.

Literature

The student will receive the necessary literature for his research topic.

V Event excerpt: Applications of Semantic MediaWiki (WS 17/18)

Content

Topics of interest include, but are not limited to:

- Analysis of Medical Processes
- Correlation analysis of medical data
- Visualization of data in SMW
- Sentiment analysis of Twitter data
- Upload Interface for SMW
- Process Matching of process data

V Event excerpt: Cooperation seminar: Innovative applications on single board computers as well as their economic relevance (WS 17/18)

Content

Topics of interest include, but are not limited to:

- Smart Home Applications

-
- Environmental measurements
 - Gesture control
 - Security systems

V Event excerpt: (WS 17/18)

Workload

Topics of interest include, but are not limited to:

- Travel Security
- Geo data
- Linked News
- Social Media

T Course: Seminar in Operations Research A (Master) [T-WIWI-103481]

Responsibility: Stefan Nickel, Oliver Stein, Karl-Heinz Waldmann
Contained in: [M-WIWI-102973] Seminar

ECTS	Language	Recurrence	Version
3	deutsch/englisch	Jedes Semester	1

Events

Term	Event-No.	Events	Type	SWS	Lecturers
SS 2017	2500003	Seminar: Recent Topics in OR	Seminar (S)		Mitarbeiter, Stefan Nickel, Anne Zander

Learning Control / Examinations

The non examassessment (§4(2), 3 SPO 2007) or alternative exam assessment (§ 4(2), 3 SPO 2015) consists of

- a talk about the research topic of the seminar together with discussion,
- a written summary about the major issues of the topic and
- attending the discussions of the seminar

The grade is achieved by the weighted sum of the grades.

Conditions

None.

Recommendations

See seminar description in the course catalogue of the KIT (<https://campus.kit.edu/>)

Remarks

The listed seminar titles are placeholders. Currently offered seminars of each semester will be published on the websites of the institutes and in the course catalogue of the KIT. In general, the current seminar topics of each semester are already announced at the end of the previous semester. Furthermore for some seminars there is an application required. The available places are listed on the internet: <https://portal.wiwi.kit.edu>.

V Event excerpt: Seminar: Recent Topics in OR (WS 17/18)

Aim

The student

- illustrates and evaluates classic and current research questions in discrete optimization,
- applies optimization models and algorithms in discrete optimization, also with regard to their applicability in practical cases (especially in Supply Chain and Health Care Management),
- successfully gets in touch with scientific working by an in-depth working on a special scientific topic which makes the student familiar with scientific literature research and argumentation methods,

-
- acquires good rhetorical and presentation skills.

As a further aspect of scientific work, especially for Master students the emphasis is put on a critical discussion of the seminar topic.

Content

The topics of the seminar will be announced at the beginning of the term in a preliminary meeting. Dates will be announced on the internet.

Workload

The total workload for this course is approximately 90 hours. For further information see German version.

Literature

Literature and relevant sources will be announced at the beginning of the seminar.

V Event excerpt: Service Oriented Computing (SS 2017)

Aim

Students will extend their knowledge and proficiency in the area of modern service-oriented technologies. Thereby, they acquire the capability to understand, apply and assess concepts and methods that are of innovative and scientific nature.

Content

Building upon basic Web service technologies the lecture introduces selected topics from advanced service computing and service engineering. In particular, focus will be placed on new Web-based architectures and applications leveraging Web 2.0, Cloud Computing, Semantic Web and other emerging technologies.

Workload

- The total workload for this course is approximately 150 hours
- Time of presentness: 45 hours
- Time of preparation and postprocessing: 67.5 hours
- Exam and exam preparation: 37.5 hours

Literature

Literature will be announced in the lecture.

T Course: Simulation I [T-WIWI-102627]

Responsibility: Karl-Heinz Waldmann

Learning Control / Examinations

The assessment consists of a written exam (60 minutes) (following §4(2), 1 of the examination regulation). The exam takes place in every semester. Re-examinations are offered at every ordinary examination date.

Conditions

None

V Event excerpt: Social Choice Theory (SS 2017)

Aim

The student should acquire knowledge of formal theories of collective decision making and learn to apply them to real life situations.

Content

The course provides a comprehensive treatment of preference and judgement aggregation, including proofs of general results that have Arrow's famous impossibility theorem and Gibbard's oligarchy theorem as corollaries. The second part of the course is devoted to voting theory. Among other things, we prove the Gibbard-Satterthwaite theorem.

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

Literature

Main texts:

- Hervé Moulin: Axioms of Cooperative Decision Making, Cambridge University Press, 1988
- Christian List and Clemens Puppe: Judgement Aggregation. A survey, in: Handbook of rational & social choice, P.Anand, P.Pattanaik, C.Puppe (Eds.), Oxford University Press 2009.

Learning Control / Examinations

The assessment of this course is a written examination (60 min) according to §4(2), 1 of the examination regulation in the first week after lecture period.

Conditions

None

Remarks

This course was formerly named "Software Technology: Quality Management".

V Event excerpt: Software Quality Management (SS 2017)

Aim

Students

- explain the relevant quality models,
- apply methods to evaluate the software quality and evaluate the results,
- know the main models of software certification, compare and evaluate these models,
- write scientific theses in the area of software quality management and find own solutions for given problems.

Content

This lecture imparts fundamentals of active software quality management (quality planning, quality testing, quality control, quality assurance) and illustrates them with concrete examples, as currently applied in industrial software development. Keywords of the lecture content are: software and software quality, process models, software process quality, ISO 9000-3, CMM(I), BOOTSTRAP, SPICE, software tests.

Workload

Lecture 30h

Exercise 15h

Preparation of lecture 30h

Preparation of exercises 30h

Exam preparation 44h

Exam 1h

Total: 150h

Literature

- Helmut Balzert: Lehrbuch der Software-Technik. Spektrum-Verlag 2008

WS 17/18	2561261		Übung (Ü)	1	David Bälz, Ingrid Ott

Learning Control / Examinations

The assessment consists of a written exam (60 minutes) (following §4(2), 1 of the examination regulation).

Conditions

None

Recommendations

Basic knowledge of micro- and macroeconomics is assumed, as taught in the courses Economics I [2600012], and Economics II [2600014]. In addition, an interest in quantitative-mathematical modeling is required. The attendance of the course Introduction to economic policy [2560280] is recommended.

V Event excerpt: Spatial Economics (WS 17/18)

Aim

The student

- analyses how spatial distribution of economic activity is determined
- uses quantitative methods within the context of economic models
- has basic knowledge of formal-analytic methods
- understands the link between economic theory and its empirical applications
- understands to what extent concentration processes result from agglomeration and dispersion forces
- is able to determine theory based policy recommendations

Content

Geography, trade and development

Geography and economic theory

Core models of economic geography and empirical evidence

Agglomeration, home market effect, and spatial wages

Applications and extensions

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

Literature

Steven Brakman, Harry Garretsen, Charles van Marrewijk (2009), The New Introduction to Geographical Economics
Further literature recommendations will be announced in the course of the lecture.

Learning Control / Examinations

The assessment of this course is a written examination (60 min) according to §4(2), 1 of the examination regulation.

Conditions

None

Modeled Conditions

The following conditions must be met:

- The course [\[T-MATH-105870\]](#) *Generalized Regression Models* must not have been started.

Recommendations

Knowledge of the contents covered by the course "Economics III: Introduction in Econometrics" [2520016]

V Event excerpt: (WS 17/18)

Aim

The student

- shows comprehensive knowledge of regression techniques

Workload

The total workload for this course is approximately 135 hours (4.5 credits).

regular attendance: 30 hours

self-study: 65 hours

exam preparation: 40 hours

T Course: Stein's Method [T-MATH-105914]

Learning Control / Examinations

The assessment of this course consists of a written examination (§4(2), 1 SPOs) and of possible additional assignments during the course (§4 (2), 3 SPO 2007 respectively §4 (3) SPO 2015).

Conditions

None

Remarks

For more information see <http://statistik.econ.kit.edu/>

V Event excerpt: Stochastic Calculus and Finance (WS 17/18)

Aim

After successful completion of the course students will be familiar with many common methods of pricing and portfolio models in finance. Emphasis will be put on both finance and the theory behind it.

Content

The course will provide rigorous yet focused training in stochastic calculus and finance. The program will cover modern approaches in stochastic calculus and mathematical finance. Topics to be covered:

1. Stochastic Calculus. Stochastic Processes, Brownian Motion and Martingales, Stopping Times, Local martingales, Doob-Meyer Decomposition, Quadratic Variation, Stochastic Integration, Ito Formula, Girsanov Theorem, Jump-diffusion Processes. Stable and tempered stable processes. Levy processes.
2. Mathematical Finance: Pricing Models. The Black-Scholes Model, State prices and Equivalent Martingale Measure, Complete Markets and Redundant Security Prices, Arbitrage Pricing with Dividends, Term-Structure Models (One Factor Models, Cox-Ingersoll-Ross Model, Affine Models), Term-Structure Derivatives and Hedging, Mortgage-Backed Securities, Derivative Assets (Forward Prices, Future Contracts, American Options, Look-back Options), Option pricing with tempered stable and Levy-Processes and volatility clustering, Optimal Portfolio and Consumption Choice (Stochastic Control and Merton continuous time optimization problem), Equilibrium models, Consumption-Based CAPM, Numerical Methods.

Stochastic processes (Poisson-process, Brownian motion, martingales), stochastic Integral (Integral, quadratic und co-variation, Ito-formula), stochastic differential equation for price-processes, trading strategies, option pricing(Feynman-Kac), neutral risk rating(equivalent martingale measure, Girsanov theorem), term structure models

Workload

The total workload for this course is approximately 150 hours. For further information see German version.

Literature

To be announced in lecture.

Recommendations

None

Remarks

Please note that only one of the following courses can be chosen in the Marketing Management Module: Marketing Strategy Business Game, Strategic Brand Management, Open Innovation – Concepts, Methods and Best Practices or Business Plan Workshop.

Please note: The number of participants for this course is limited. The Marketing and Sales Research Group typically provides the possibility to attend a course with 1.5 ECTS in the respective module to all students. Participation in a specific course cannot be guaranteed.

In order to participate in this course, you need to apply. Applications are usually accepted at the start of the lecture period in summer term. Detailed information on the application process is usually provided on the website of the Marketing and Sales Research Group (marketing.iism.kit.edu) shortly before the lecture period in summer term starts.

V Event excerpt: Strategic Brand Management (SS 2017)

Aim

See German version.

Content

Die Veranstaltung konzentriert sich auf das strategische Markenmanagement. Der Fokus liegt dabei auf zentralen Branding-Elementen wie z.B. Markenpositionierungen und -identitäten. Gehalten wird die Veranstaltung von Herrn Blickhäuser, einem langjährigen Manager der BMW Group, der aktuell für das Brand Management des Automobilherstellers zuständig ist.

Workload

The total workload for this course is approximately 45.0 hours. For further information see German version.

Literature

Homburg, Christian (2016), Marketingmanagement, 6. ed., Wiesbaden.

SS 2017	2511603		Übung (Ü)	1	Thomas Wolf

Learning Control / Examinations

The assessment of this course is a written (60 min.) or (if necessary) oral examination according (30 min.) to §4(2) of the examination regulation.

Conditions

None

V Event excerpt: Strategic Management of Information Technology (SS 2017)

Aim

Students know the outer frame of IT in an enterprise and know which functions IT has within an enterprise. They understand the organization and the content of these functions.

Content

The following topics will be covered: strategic planning of ICT, architecture of ICT, overall planning of ICT, outsourcing, operation and controlling of ICT.

Literature

- Nolan, R., Croson, D.: Creative Destruction: A Six-Stage Process for Transforming the Organization. Harvard Business School Press, Boston Mass. 1995

Learning Control / Examinations

Non exam assessment (following §4(2) 3 of the examination regulation).

Conditions

None

Recommendations

Basic knowledge as conveyed in the bachelor module „Strategy and Organization“ is recommended.

Remarks

This course is admission restricted. If you were already admitted to another course in the module “Advanced Topics in Strategy and Management” the participation at this course will be guaranteed.

The course is planned to be held for the first time in the winter term 2017/18.

V Event excerpt: Strategy and Management Theory: Developments and "Classics" (WS 17/18)

Aim

Students

- are able to explain and evaluate theoretical approaches and models in the field of strategic management and can illustrate them by tangible examples
- learn to express their position in structured discussions

Content

In this lecture, students discuss and evaluate models in the field of strategic management with a focus on applicability and theory based limitations. Critical examination of current research results will be a substantial part of this course.

Workload

The total workload for this course is approximately 90 hours.

Lecture: 15 hours

Preparation of lecture: 75 hours

Exam preparation: n/a

T Course: Supply Chain Management in the Process Industry [T-WIWI-102860]

Responsibility: Stefan Nickel

Contained in: [M-WIWI-102805] Service Operations

ECTS	Language	Recurrence	Version
4.5	englisch	Jedes Wintersemester	1

Events

Term	Event-No.	Events	Type	SWS	Lecturers
WS 17/18	2550494	Supply Chain Management in the Process Industry	Vorlesung / Übung 3 (VÜ)	3	Robert Blackburn, Jan Buchmann

Learning Control / Examinations

The assessment is a 60 minutes written examination (according to §4(2), 1 of the examination regulation) (individual grading), case study presentation by student teams (team grading) and classroom participation (individual grading). The examination is held in the term of the lecture.

Conditions

None

Recommendations

Basic knowledge as conveyed in the module Introduction to Operations Research is assumed.

Advanced knowledge of Operations Research (e.g., as conveyed in the lectures Facility Location and Strategic SCM, Tactical and operational SCM) is recommended.

Remarks

The number of participants is restricted due to the execution of interactive case studies and the resulting examination effort. Due to these capacity restrictions, registration before course start is required according to the information on the course website. The course is planned to be held every winter term. The planned lectures and courses for the next three years are announced online.

V Event excerpt: Supply Chain Management in the Process Industry (WS 17/18)

Aim

The student

- knows and classifies state-of-the art approaches for designing, planning and managing global supply chains in the process industry
- distinguishes quality in supply chains and identifies important building blocks, repeating patterns and concepts crucial to supply chain strategy, design and planning,
- explains specific challenges and approaches towards supply chain operations within the process industry with regards to transportation and warehousing, and describes the interdisciplinary linkage of SCM with information systems, performance management, project management, risk management and sustainability management,
- transfers gained knowledge into practice by using SCM case studies and SCM real life project documentations.

Content

The course "Supply Chain Management in the Process Industry" covers fundamental concepts in the field of supply chain management with special focus on process industry. Strategic, planning and operational topics within the end-to-end supply chain are examined, covering relevant approaches in design, processes and performance measurement. Additional focus within the course is on showing the interdisciplinary linkages SCM has with information systems, performance management, project management, risk management and sustainability management. The course is enriched by various insights from the world's leading chemical company BASF, provided by executive management as real life examples and cases.

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

Literature

- Chopra, S./Meindl, P.: Supply Chain Management – Strategy, Planning, & Operations, 4th edition, Upper Saddle River, 2009.
- Various case studies, which will be provided during the course

SS 2017	2550487		Übung (Ü)	1	Stefan Nickel, Brita Rohrbeck

Learning Control / Examinations

The assessment consists of a written exam (120 minutes) according to Section 4(2), 1 of the examination regulation. The exam takes place in every the semester.

Prerequisite for admission to examination is the succesful completion of the online assessments.

Conditions

Prerequisite for admission to examination is the succesful completion of the online assessments.

Recommendations

None

Remarks

The lecture is held in every summer term. The planned lectures and courses for the next three years are announced online.

V Event excerpt: (SS 2017)

Aim

The student

- gathers expertise in fundamental techniques from procurement and distribution logistics, methods from inventory management and lot sizing,
- acquires the ability to efficiently utilize quantitative models from transportation planning (long-distance and distribution planning), inventory management and lot sizing in production,
- applies the introduced methods in more detail and in industry-relevant case-studies.

Content

The lecture covers basic quantitative methods in location planning in the context of strategic Supply Chain Planning. Besides the discussion of several criteria for the evaluation of the locations of facilities, the students are acquainted with classical location planning models (planar models, network models and discrete models) and advanced location planning models designed for Supply Chain Management (single-period and multi-period models). The exercises accompanying the lecture offer the possibility to apply the considered models to practical problems.

T Course: Technological Change in Energy Economics [T-WIWI-102694]

Responsibility: Martin Wietschel

Contained in: [M-WIWI-101452] Energy Economics and Technology

ECTS	Recurrence	Version
3	Jedes Wintersemester	1

Learning Control / Examinations

The examination will be offered latest until summer term 2018 (repeaters only).

The assessment consists of a written exam (60 min) (according to Section 4(2), 1 of the examination regulation).

Recommendations

None

T Course: The Riemann Zeta Function [T-MATH-105934]

Responsibility: Fabian Januszewski

Contained in: [M-MATH-102960] The Riemann Zeta Function

ECTS	Version
4	1

T Course: Theory of Endogenous Growth [T-WIWI-102785]

Responsibility: Ingrid Ott
Contained in: [\[M-WIWI-101478\]](#) Innovation and growth
[\[M-WIWI-101496\]](#) Growth and Agglomeration

ECTS	Language	Recurrence	Version
4.5	deutsch	Jedes Wintersemester	1

Events

Term	Event-No.	Events	Type	SWS	Lecturers
WS 17/18	2561503	Theory of endogenous growth	Vorlesung (V)	2	Ingrid Ott
WS 17/18	2561504		Übung (Ü)	1	Levent Eraydin, Ingrid Ott

Learning Control / Examinations

The assessment consists of a written exam (60 min) according to Section 4(2), 1 of the examination regulation. The exam takes place in every semester. Re-examinations are offered at every ordinary examination date. Students will be given the opportunity of writing and presenting a short paper during the lecture time to achieve a bonus on the exam grade. If the mandatory credit point exam is passed, the awarded bonus points will be added to the regular exam points. A deterioration is not possible by definition, and a grade does not necessarily improve, but is very likely to (not every additional point improves the total number of points, since a grade can not become better than 1). The voluntary elaboration of such a paper can not countervail a fail in the exam.

Conditions

None

Recommendations

Basic knowledge of micro- and macroeconomics is assumed, as taught in the courses Economics I [2600012], and Economics II [2600014]. In addition, an interest in quantitative-mathematical modeling is required.

V Event excerpt: Theory of endogenous growth (WS 17/18)

Aim

Students shall be given the ability to understand, analyze and evaluate selected models of endogenous growth theory.

Content

- Basic models of endogenous growth
- Human capital and economic growth
- Modelling of technological progress
- Diversity Models
- Schumpeterian growth
- Directional technological progress
- Diffusion of technologies

Workload

The total workload for this course is approximately 135.0 hours. For further information see German version.

Learning Control / Examinations

The assessment of this course is a written examination (60 min) according to §4(2), 1 of the examination regulation or an oral exam (20 min) following §4, Abs. 2, 2 of the examination regulation.

The exam takes place every semester and can be repeated at every regular examination date.

Conditions

None

Remarks

New course starting winter term 2015/2016.

V Event excerpt: Web Science (WS 17/18)

Aim

The students

- look critically into current research topics in the field of Web Science and learns in particular about the topics small-world-problem, network theory, social network analysis, bibliometrics, as well as link analysis and search.
- apply interdisciplinary thinking.
- train the application of technological approaches to social science problems.

Content

This course aims to provide students with a basic knowledge and understanding about the structure and analysis of selected web phenomena and technologies. Topics include the small world problem, network theory, social network analysis, graph search and technologies/standards/architectures.

The assessment of this course is a written examination (60 min) according to §4(2), 1 of the examination regulation in the first week after lecture period.

Conditions

None

V Event excerpt: Workflow-Management (SS 2017)

Aim

Students

- explain the concepts and principles of workflow management concepts and systems and their applications,
- create and evaluate business process models,
- analyze static and dynamic properties of workflows.

Content

A workflow is that part of a business process which is automatically executed by a computerized system. Workflow management includes the design, modelling, analysis, execution and management of workflows. Workflow management systems are standard software systems for the efficient control of processes in enterprises and organizations. Knowledge in the field of workflow management systems is especially important during the design of systems for process support.

The course covers the most important concepts of workflow management. Modelling and design techniques are presented and an overview about current workflow management systems is given. Standards, which have been proposed by the workflow management coalition (WfMC), are discussed. Petri nets are proposed as a formal modelling and analysis tool for business processes. Architecture and functionality of workflow management systems are discussed. The course is a combination of theoretical foundations of workflow management concepts and of practical application knowledge.

Studien- und Prüfungsordnung der Universität Karlsruhe (TH) für den Masterstudiengang Wirtschaftsmathematik

Aufgrund von § 34 Abs. 1, Satz 1 des Landeshochschulgesetzes (LHG) vom 1. Januar 2005 hat die beschließende Senatskommission für Prüfungsordnungen der Universität Karlsruhe (TH) am 13. Februar 2009 die folgende Studien- und Prüfungsordnung für den Masterstudiengang Wirtschaftsmathematik beschlossen.

Der Rektor hat seine Zustimmung am 28. August 2009 erteilt.

Inhaltsverzeichnis

I. Allgemeine Bestimmungen

- § 1 Geltungsbereich, Zweck der Prüfung
- § 2 Akademischer Grad

- § 21 Ungültigkeit der Masterprüfung, Entziehung des Mastergrades
- § 22 Einsicht in die Prüfungsakten
- § 23 In-Kraft-Treten

Die Universität Karlsruhe (TH) hat sich im Rahmen der Umsetzung des Bolognaprozesses zum Aufbau eines Europäischen Hochschulraumes zum Ziel gesetzt, dass am Abschluss der Studiengangsausbildung an der Universität Karlsruhe (TH) der Mastergrad stehen soll. Die Universität Karlsruhe (TH) sieht daher die an der Universität Karlsruhe (TH) angebotenen konsekutiven Bachelor- und Masterstudiengänge als Gesamtkonzept mit konsekutivem Curriculum.

In dieser Satzung ist nur die weibliche Sprachform gewählt worden. Alle personenbezogenen Aussagen gelten jedoch stets für Frauen und Männer gleichermaßen.

I. Allgemeine Bestimmungen

§ 1 Geltungsbereich, Zweck der Prüfung

- (1) Diese Masterprüfungsordnung regelt Studienablauf, Prüfungen und den Abschluss des Studiums im Masterstudiengang Wirtschaftsmathematik an der Universität Karlsruhe (TH).
- (2) Im Masterstudium sollen die im Bachelorstudium erworbenen wissenschaftlichen Qualifikationen weiter vertieft oder ergänzt werden. Die Studentin soll in der Lage sein, die wissenschaftlichen Erkenntnisse und Methoden selbstständig anzuwenden und ihre Bedeutung und Reichweite für die Lösung komplexer wissenschaftlicher und gesellschaftlicher Problemstellungen zu bewerten.

§ 2 Akademischer Grad

Aufgrund der bestandenen Masterprüfung wird der akademische Grad „Master of Science“ (abgekürzt: „M.Sc.“) verliehen.

§ 3 Regelstudienzeit, Studienaufbau, Leistungspunkte

- (1) Die Regelstudienzeit beträgt vier Semester. Sie umfasst neben den Lehrveranstaltungen Prüfungen und die Masterarbeit.
- (2) Die im Studium zu absolvierenden Lehrinhalte sind in Module gegliedert, die jeweils aus einer Lehrveranstaltung oder mehreren, thematisch und zeitlich aufeinander bezogenen Lehrveranstaltungen bestehen. Art, Umfang und Zuordnung der Module zu einem Fach sowie die Möglichkeiten, Module untereinander zu kombinieren, beschreibt der Studienplan. Die Fächer und deren Umfang werden in § 17 definiert.
- (3) Der für das Absolvieren von Lehrveranstaltungen und Modulen vorgesehene Arbeitsaufwand wird in Leistungspunkten (Credits) ausgewiesen. Die Maßstäbe für die Zuordnung von Leistungspunkten entsprechen dem ECTS (European Credit Transfer System). Ein Leistungspunkt entspricht einem Arbeitsaufwand von etwa 30 Stunden.
- (4) Der Umfang der für den erfolgreichen Abschluss des Studiums erforderlichen Studienleistungen wird in Leistungspunkten gemessen und beträgt insgesamt 120 Leistungspunkte.
- (5) Die Verteilung der Leistungspunkte im Studienplan auf die Semester hat in der Regel gleichmäßig zu erfolgen.
- (6) Lehrveranstaltungen können auch in englischer Sprache angeboten werden.

§ 4 Aufbau der Prüfungen

(1) Die Masterprüfung besteht aus einer Masterarbeit und Modulprüfungen, jede Modulprüfung aus einer oder mehreren Modulteilprüfungen. Eine Modulteilprüfung besteht aus mindestens einer Erfolgskontrolle.

(2) Erfolgskontrollen sind:

1. schriftliche Prüfungen,
2. mündliche Prüfungen oder
3. Erfolgskontrollen anderer Art.

Erfolgskontrollen anderer Art sind z.B. Vorträge, Übungsscheine, Projekte, schriftliche Arbeiten, Berichte, Seminararbeiten und Klausuren, sofern sie nicht als schriftliche oder mündliche Prüfung in der Modul- oder Lehrveranstaltungsbeschreibung im Studienplan ausgewiesen sind.

(3) In der Regel sind mindestens 50 % einer Modulprüfung in Form von schriftlichen oder mündlichen Prüfungen (Absatz 2, Nr. 1 und 2) abzulegen, die restlichen Prüfungen erfolgen durch Erfolgskontrollen anderer Art (Absatz 2, Nr. 3). Hiervon ausgenommen sind Seminarmodule.

§ 5 Anmeldung und Zulassung zu den Prüfungen

(1) Um an den Modulprüfungen teilnehmen zu können, muss sich die Studentin schriftlich oder per Online-Anmeldung beim Studienbüro anmelden. Hierbei sind die gemäß dem Studienplan für die jeweilige Modulprüfung notwendigen Studienleistungen nachzuweisen. Darüber hinaus muss sich die Studentin für jede einzelne Modulteilprüfung, die in Form einer schriftlichen oder mündlichen Prüfung (§ 4 Abs. 2, Nr. 1 und 2) durchgeführt wird, beim Studienbüro anmelden. Dies gilt auch für die Anmeldung zur Masterarbeit.

(2) Um zu schriftlichen und/oder mündlichen Prüfungen (§ 4 Abs. 2, Nr. 1 und 2) in einem bestimmten Modul zugelassen zu werden, muss die Studentin vor der ersten schriftlichen oder mündlichen Prüfung in diesem Modul beim Studienbüro eine bindende Erklärung über die Wahl des betreffenden Moduls und dessen Zuordnung zu einem Fach, wenn diese Wahlmöglichkeit besteht, abgeben.

(3) Die Zulassung darf nur abgelehnt werden, wenn die Studentin in einem mit der Wirtschaftsmathematik oder den Wirtschaftswissenschaften vergleichbaren oder einem verwandten Studiengang bereits eine Diplomvorprüfung, Diplomprüfung, Bachelor- oder Masterprüfung endgültig nicht bestanden hat, sich in einem Prüfungsverfahren befindet oder den Prüfungsanspruch in einem solchen Studiengang verloren hat. In Zweifelsfällen entscheidet der Prüfungsausschuss.

§ 6 Durchführung von Prüfungen und Erfolgskontrollen

(1) Erfolgskontrollen werden studienbegleitend, in der Regel im Verlauf der Vermittlung der Lehrinhalte der einzelnen Module oder zeitnah danach, durchgeführt.

(2) Die Art der Erfolgskontrolle (§ 4 Abs. 2, Nr. 1 bis 3) der einzelnen Lehrveranstaltungen wird von der Prüferin der betreffenden Lehrveranstaltung in Bezug auf die Lehrinhalte der Lehrveranstaltung und die Lehrziele des Moduls festgelegt. Die Prüferin, die Art der Erfolgskontrollen, deren Häufigkeit, Reihenfolge und Gewichtung und die Bildung der Lehrveranstaltungsnote müssen mindestens sechs Wochen vor Semesterbeginn bekannt gegeben werden. Im Einvernehmen zwischen Prüferin und Studentin kann die Art der Erfolgskontrolle auch nachträglich geändert werden. Dabei ist jedoch § 4 Abs. 3 zu berücksichtigen.

(3) Eine schriftlich durchzuführende Prüfung kann auch mündlich, eine mündlich durchzuführende Prüfung kann auch schriftlich abgenommen werden. Diese Änderung muss mindestens sechs Wochen vor der Prüfung bekannt gegeben werden.

(4) Weist eine Studentin nach, dass sie wegen länger andauernder oder ständiger körperlicher Behinderung nicht in der Lage ist, die Erfolgskontrollen ganz oder teilweise in der vorgeschriebenen

Form abzulegen, kann der zuständige Prüfungsausschuss – in dringenden Angelegenheiten, deren Erledigung nicht bis zu einer Sitzung des Ausschusses aufgeschoben werden kann, dessen Vorsitzende – gestatten, Erfolgskontrollen in einer anderen Form zu erbringen. Auf begründeten Antrag kann der Prüfungsausschuss auch in anderen Ausnahmefällen gestatten, Erfolgskontrollen in einer anderen Form zu erbringen.

(5) Bei Lehrveranstaltungen in englischer Sprache können mit Zustimmung der Studentin die entsprechenden Erfolgskontrollen in englischer Sprache abgenommen werden.

(6) Schriftliche Prüfungen (§ 4 Abs. 2, Nr. 1) sind in der Regel von einer Prüferin nach § 15 Abs. 2 oder § 15 Abs. 3 zu bewerten. Die Note ergibt sich aus dem arithmetischen Mittel der Einzelbewertungen. Entspricht das arithmetische Mittel keiner der in § 7 Abs. 2, Satz 2 definierten Notenstufen, so ist auf die nächstliegende Notenstufe zu runden. Bei gleichem Abstand ist auf die nächstbessere Notenstufe zu runden. Das Bewertungsverfahren soll sechs Wochen nicht überschreiten. Schriftliche Einzelprüfungen dauern mindestens 60 und höchstens 240 Minuten.

(7) Mündliche Prüfungen (§ 4 Abs. 2, Nr. 2) sind von mehreren Prüferinnen (Kollegialprüfung) oder von einer Prüferin in Gegenwart einer Beisitzenden als Gruppen- oder Einzelprüfungen abzunehmen und zu bewerten. Vor der Festsetzung der Note hört die Prüferin die anderen an der Kollegialprüfung mitwirkenden Prüferinnen an. Mündliche Prüfungen dauern in der Regel mindestens 15 Minuten und maximal 45 Minuten pro Studentin.

(8) Die wesentlichen Gegenstände und Ergebnisse der mündlichen Prüfung in den einzelnen Fächern sind in einem Protokoll festzuhalten. Das Ergebnis der Prüfung ist der Studentin im Anschluss an die mündliche Prüfung bekannt zu geben.

(9) Studentinnen, die sich in einem späteren Prüfungszeitraum der gleichen Prüfung unterziehen wollen, werden entsprechend den räumlichen Verhältnissen als Zuhörerinnen bei mündlichen Prüfungen zugelassen. Die Zulassung erstreckt sich nicht auf die Beratung und Bekanntgabe der Prüfungsergebnisse. Aus wichtigen Gründen oder auf Antrag der zu prüfenden Studentin ist die Zulassung zu versagen.

(10) Für Erfolgskontrollen anderer Art sind angemessene Bearbeitungsfristen einzuräumen und Abgabetermine festzulegen. Dabei ist durch die Art der Aufgabenstellung und durch entsprechende Dokumentation sicherzustellen, dass die erbrachte Studienleistung der Studentin zurechenbar ist. Die wesentlichen Gegenstände und Ergebnisse einer solchen Erfolgskontrolle sind in einem Protokoll festzuhalten.

(11) Schriftliche Arbeiten im Rahmen einer Erfolgskontrolle anderer Art haben dabei die folgende Erklärung zu tragen: „Ich versichere wahrheitsgemäß, die Arbeit selbstständig angefertigt, alle benutzten Hilfsmittel vollständig und genau angegeben und alles kenntlich gemacht zu haben, was aus Arbeiten anderer unverändert oder mit Abänderungen entnommen wurde.“ Trägt die Arbeit diese Erklärung nicht, wird diese Arbeit nicht angenommen. Die wesentlichen Gegenstände und Ergebnisse einer solchen Erfolgskontrolle sind in einem Protokoll festzuhalten.

(12) Bei mündlich durchgeführten Erfolgskontrollen anderer Art muss in der Regel neben der Prüferin eine Beisitzende anwesend sein, die zusätzlich zur Prüferin die Protokolle zeichnet.

§ 7 Bewertung von Prüfungen und Erfolgskontrollen

(1) Das Ergebnis einer Erfolgskontrolle wird von den jeweiligen Prüferinnen in Form einer Note festgesetzt.

(2) Im Masterzeugnis dürfen nur folgende Noten verwendet werden:

- | | |
|---------------------------------|---|
| 1 = sehr gut (very good) | = eine hervorragende Leistung, |
| 2 = gut (good) | = eine Leistung, die erheblich über den durchschnittlichen Anforderungen liegt, |
| 3 = befriedigend (satisfactory) | = eine Leistung, die durchschnittlichen Anforderungen entspricht, |

4	= ausreichend (sufficient)	= eine Leistung, die trotz ihrer Mängel noch den Anforderungen genügt,
5	= nicht ausreichend (failed)	= eine Leistung, die wegen erheblicher Mängel nicht den Anforderungen genügt.

Für die Masterarbeit und die Modulteilprüfungen sind zur differenzierten Bewertung nur folgende Noten zugelassen:

1	1.0, 1.3	= sehr gut
2	1.7, 2.0, 2.3	= gut
3	2.7, 3.0, 3.3	= befriedigend
4	3.7, 4.0	= ausreichend
5	4.7, 5.0	= nicht ausreichend

Diese Noten müssen in den Protokollen und in den Anlagen (Transcript of Records und Diploma Supplement) verwendet werden.

(3) Für Erfolgskontrollen anderer Art kann im Studienplan die Benotung mit „bestanden“ (passed) oder „nicht bestanden“ (failed) vorgesehen werden.

(4) Bei der Bildung der gewichteten Durchschnitte der Modulnoten und der Gesamtnote wird nur die erste Dezimalstelle hinter dem Komma berücksichtigt; alle weiteren Stellen werden ohne Rundung gestrichen.

(5) Jedes Modul, jede Lehrveranstaltung und jede Erfolgskontrolle darf in demselben Studiengang nur einmal angerechnet werden. Die Anrechnung eines Moduls, einer Lehrveranstaltung oder einer Erfolgskontrolle ist darüber hinaus ausgeschlossen, wenn das betreffende Modul, die Lehrveranstaltung oder die Erfolgskontrolle bereits in einem grundständigen Bachelorstudiengang angerechnet wurde, auf dem dieser Masterstudiengang konsekutiv aufbaut.

(6) Erfolgskontrollen anderer Art dürfen in Modulteilprüfungen oder Modulprüfungen nur eingerechnet werden, wenn die Benotung nicht nach Absatz 3 erfolgt ist. Die zu dokumentierenden Erfolgskontrollen und die daran geknüpften Bedingungen werden im Studienplan festgelegt.

(7) Eine Modulteilprüfung ist bestanden, wenn die Note mindestens „ausreichend“ (4.0) ist.

(8) Eine Modulprüfung ist dann bestanden, wenn die Modulnote mindestens „ausreichend“ (4.0) ist. Die Modulprüfung und die Bildung der Modulnote werden im Studienplan geregelt. Die differenzierten Lehrveranstaltungsnoten (Absatz 2) sind bei der Berechnung der Modulnoten als Ausgangsdaten zu verwenden. Enthält der Studienplan keine Regelung darüber, wann eine Modulprüfung bestanden ist, so ist diese Modulprüfung dann endgültig nicht bestanden, wenn eine dem Modul zugeordnete Modulteilprüfung endgültig nicht bestanden wurde.

(9) Die Ergebnisse der Masterarbeit, der Modulprüfungen bzw. der Modulteilprüfungen, der Erfolgskontrollen anderer Art sowie die erworbenen Leistungspunkte werden durch das Studienbüro der Universität erfasst.

(10) Die Noten der Module eines Faches gehen in die Fachnote mit einem Gewicht proportional zu den ausgewiesenen Leistungspunkten der Module ein. Eine Fachprüfung ist bestanden, wenn die für das Fach erforderliche Anzahl von Leistungspunkten nachgewiesen wird.

(11) Die Gesamtnote der Masterprüfung und die Modulnoten lauten:

	bis	1.5	=	sehr gut
von	1.6	bis	2.5	= gut
von	2.6	bis	3.5	= befriedigend
von	3.6	bis	4.0	= ausreichend

(12) Zusätzlich zu den Noten nach Absatz 2 werden ECTS-Noten für Fachprüfungen, Modulprüfungen und für die Masterprüfung nach folgender Skala vergeben:

- | ECTS-Note | Quote, Definition |
|-----------|---|
| A | gehört zu den besten 10 % der Studierenden, die die Erfolgskontrolle bestanden haben, |
| B | gehört zu den nächsten 25 % der Studierenden, die die Erfolgskontrolle bestanden haben, |
| C | gehört zu den nächsten 30 % der Studierenden, die die Erfolgskontrolle bestanden haben, |
| D | gehört zu den nächsten 25 % der Studierenden, die die Erfolgskontrolle bestanden haben, |
| E | gehört zu den letzten 10 % der Studierenden, die die Erfolgskontrolle bestanden haben, |
| FX | <i>nicht bestanden</i> (failed) - es sind Verbesserungen erforderlich, bevor die Leistungen anerkannt werden, |
| F | <i>nicht bestanden</i> (failed) - es sind erhebliche Verbesserungen erforderlich. |

Die Quote ist als der Prozentsatz der erfolgreichen Studierenden definiert, die diese Note in der Regel erhalten. Dabei ist von einer mindestens fünfjährigen Datenbasis über mindestens 30 Studierende auszugehen. Für die Ermittlung der Notenverteilungen, die für die ECTS-Noten erforderlich sind, ist das Studienbüro der Universität zuständig. Bis zum Aufbau einer entsprechenden Datenbasis wird als Übergangsregel die Verteilung der Diplomsnoten des Diplomstudiengangs Wirtschaftsmathematik per 30. September 2009 zur Bildung dieser Skala für alle Module des Masterstudiengangs Wirtschaftsmathematik herangezogen. Diese Verteilung wird jährlich gleitend über mindestens fünf Semester mit mindestens 30 Studierenden jeweils zu Beginn des Semesters für jedes Modul, die Fachnoten und die Gesamtnote angepasst und in diesem Studienjahr für die Festsetzung der ECTS-Note verwendet.

§ 8 Erlöschen des Prüfungsanspruchs, Wiederholung von Prüfungen und Erfolgskontrollen

(1) Studentinnen können eine nicht bestandene schriftliche Prüfung (§ 4 Abs. 2, Nr. 1) einmal wiederholen. Wird eine schriftliche Wiederholungsprüfung mit „nicht ausreichend“ bewertet, so findet eine mündliche Nachprüfung im zeitlichen Zusammenhang mit dem Termin der nicht bestandenen Prüfung statt. In diesem Falle kann die Note dieser Prüfung nicht besser als „ausreichend“ (4.0) sein.

(2) Studentinnen können eine nicht bestandene mündliche Prüfung (§ 4 Abs. 2, Nr. 2) einmal wiederholen.

(3) Wiederholungsprüfungen nach Absatz 1 und 2 müssen in Inhalt, Umfang und Form (mündlich oder schriftlich) der ersten entsprechen. Ausnahmen kann der zuständige Prüfungsausschuss auf Antrag zulassen. Fehlversuche an anderen Hochschulen sind anzurechnen.

(4) Die Wiederholung einer Erfolgskontrolle anderer Art (§ 4 Abs. 2, Nr. 3) wird im Studienplan geregelt.

(5) Eine zweite Wiederholung derselben schriftlichen oder mündlichen Prüfung ist nur in Ausnahmefällen zulässig. Einen Antrag auf Zweitwiederholung hat die Studentin schriftlich beim Prüfungsausschuss zu stellen. Über den ersten Antrag einer Studentin auf Zweitwiederholung entscheidet der Prüfungsausschuss, wenn er den Antrag genehmigt. Wenn der Prüfungsausschuss diesen Antrag ablehnt, entscheidet die Rektorin. Über weitere Anträge auf Zweitwiederholung entscheidet nach Stellungnahme des Prüfungsausschusses die Rektorin. Absatz 1, Satz 2 und 3 gelten entsprechend.

(6) Die Wiederholung einer bestandenen Erfolgskontrolle ist nicht zulässig.

(7) Eine Fachprüfung ist endgültig nicht bestanden, wenn mindestens ein Modul des Faches endgültig nicht bestanden ist.

(8) Die Masterarbeit kann bei einer Bewertung mit „nicht ausreichend“ einmal wiederholt werden. Eine zweite Wiederholung der Masterarbeit ist ausgeschlossen.

(9) Ist gemäß § 34 Abs. 2, Satz 3 LHG die Masterprüfung bis zum Ende des siebten Fachsemester dieses Studiengangs einschließlich etwaiger Wiederholungen nicht vollständig abgelegt, so erlischt der Prüfungsanspruch im Studiengang, es sei denn, dass die Studentin die Fristüberschreitung nicht zu vertreten hat. Die Entscheidung darüber trifft der Prüfungsausschuss. Die Entscheidung über eine Fristverlängerung und über Ausnahmen von der Fristregelung trifft der Prüfungsausschuss.

§ 9 Versäumnis, Rücktritt, Täuschung, Ordnungsverstoß

(1) Die Studentin kann bei schriftlichen Modulprüfungen ohne Angabe von Gründen bis einen Tag (24 Uhr) vor dem Prüfungstermin zurücktreten (Abmeldung). Bei mündlichen Modulprüfungen muss der Rücktritt spätestens drei Werkstage vor dem betreffenden Prüfungstermin erklärt werden (Abmeldung). Ein Rücktritt von einer mündlichen Prüfung weniger als drei Werkstage vor dem betreffenden Prüfungstermin ist nur unter den Voraussetzungen des Absatzes 3 möglich. Die Abmeldung kann schriftlich bei der Prüferin oder per Online-Abmeldung beim Studienbüro erfolgen. Eine durch Widerruf abgemeldete Prüfung gilt als nicht angemeldet. Der Rücktritt von mündlichen Nachprüfungen im Sinne von § 8 Abs. 2 ist grundsätzlich nur unter den Voraussetzungen von Absatz 3 möglich.

(2) Eine Modulprüfung gilt als mit „nicht ausreichend“ bewertet, wenn die Studentin einen Prüfungstermin ohne triftigen Grund versäumt oder wenn sie nach Beginn der Prüfung ohne triftigen Grund von der Prüfung zurücktritt. Dasselbe gilt, wenn die Masterarbeit nicht innerhalb der vorgesehenen Bearbeitungszeit erbracht wird, es sei denn, die Studentin hat die Fristüberschreitung nicht zu vertreten.

(3) Der für den Rücktritt nach Beginn der Prüfung oder das Versäumnis geltend gemachte Grund muss dem Prüfungsausschuss unverzüglich schriftlich angezeigt und glaubhaft gemacht werden. Bei Krankheit der Studentin bzw. eines von ihr allein zu versorgenden Kindes oder pflegebedürftigen Angehörigen kann die Vorlage eines ärztlichen Attestes und in Zweifelsfällen ein amtsärztliches Attest verlangt werden. Die Anerkennung des Rücktritts ist ausgeschlossen, wenn bis zum Eintritt des Hinderungsgrundes bereits Prüfungsleistungen erbracht worden sind und nach deren Ergebnis die Prüfung nicht bestanden werden kann. Wird der Grund anerkannt, wird ein neuer Termin anberaumt. Die bereits vorliegenden Prüfungsergebnisse sind in diesem Fall anzurechnen. Bei Modulprüfungen, die aus mehreren Prüfungen bestehen, werden die Prüfungsleistungen dieses Moduls, die bis zu einem anerkannten Rücktritt bzw. einem anerkannten Versäumnis einer Prüfungsleistung dieses Moduls erbracht worden sind, angerechnet.

(4) Versucht die Studentin das Ergebnis seiner Modulprüfung durch Täuschung oder Benutzung nicht zugelassener Hilfsmittel zu beeinflussen, gilt die betreffende Modulprüfung als mit „nicht ausreichend“ (5.0) bewertet.

(5) Eine Studentin, die den ordnungsgemäßen Ablauf der Prüfung stört, kann von der jeweiligen Prüferin oder Aufsicht Führenden von der Fortsetzung der Modulprüfung ausgeschlossen werden. In diesem Fall gilt die betreffende Prüfungsleistung als mit „nicht ausreichend“ (5.0) bewertet. In schwerwiegenden Fällen kann der Prüfungsausschuss die Studentin von der Erbringung weiterer Prüfungsleistungen ausschließen.

(6) Die Studentin kann innerhalb einer Frist von einem Monat verlangen, dass Entscheidungen gemäß Absatz 4 und 5 vom Prüfungsausschuss überprüft werden. Belastende Entscheidungen des Prüfungsausschusses sind der Studentin unverzüglich schriftlich mitzuteilen. Sie sind zu begründen und mit einer Rechtsbehelfsbelehrung zu versehen. Der Studentin ist vor einer Entscheidung Gelegenheit zur Äußerung zu geben.

(7) Näheres regelt die Allgemeine Satzung der Universität Karlsruhe (TH) zur Redlichkeit bei Prüfungen und Praktika („Verhaltensordnung“).

§ 10 Mutterschutz, Elternzeit, Wahrnehmung von Familienpflichten

(1) Auf Antrag sind die Mutterschutzfristen, wie sie im jeweils gültigen Gesetz zum Schutz der erwerbstätigen Mutter (MuSchG) festgelegt sind, entsprechend zu berücksichtigen. Dem Antrag sind die erforderlichen Nachweise beizufügen. Die Mutterschutzfristen unterbrechen jede Frist nach dieser Prüfungsordnung. Die Dauer des Mutterschutzes wird nicht in die Frist eingerechnet.

(2) Gleichfalls sind die Fristen der Elternzeit nach Maßgabe des jeweiligen gültigen Gesetzes (BErzGG) auf Antrag zu berücksichtigen. Die Studentin muss bis spätestens vier Wochen vor dem Zeitpunkt, von dem an sie die Elternzeit antreten will, dem Prüfungsausschuss unter Beifügung der erforderlichen Nachweise schriftlich mitteilen, in welchem Zeitraum sie Elternzeit in Anspruch nehmen will. Der Prüfungsausschuss hat zu prüfen, ob die gesetzlichen Voraussetzungen vorliegen, die bei einer Arbeitnehmerin den Anspruch auf Elternzeit auslösen würden, und teilt der Studentin das Ergebnis sowie die neu festgesetzten Prüfungszeiten unverzüglich mit. Die Bearbeitungszeit der Masterarbeit kann nicht durch Elternzeit unterbrochen werden. Die gestellte Arbeit gilt als nicht vergeben. Nach Ablauf der Elternzeit erhält die Studentin ein neues Thema.

(3) Der Prüfungsausschuss entscheidet auf Antrag über die flexible Handhabung von Prüfungsfristen entsprechend den Bestimmungen des Landeshochschulgesetzes, wenn Studierende Familienpflichten wahrzunehmen haben. Die Bearbeitungszeit der Masterarbeit kann nicht durch die Wahrnehmung von Familienpflichten unterbrochen oder verlängert werden. Die gestellte Arbeit gilt als nicht vergeben. Die Studentin erhält ein neues Thema, das innerhalb der in § 11 festgelegten Bearbeitungszeit zu bearbeiten ist.

§ 11 Masterarbeit

(1) Die Masterarbeit soll zeigen, dass die Studentin in der Lage ist, ein Problem aus ihrem Fach selbstständig und in begrenzter Zeit nach wissenschaftlichen Methoden, die dem Stand der Forschung entsprechen, zu bearbeiten. Die Masterarbeit kann auf Deutsch oder Englisch geschrieben werden.

(2) Zum Modul Masterarbeit wird zugelassen, wer mindestens 70 Leistungspunkte gesammelt hat.

(3) Die Masterarbeit kann von jeder Prüferin nach § 15 Abs. 2 aus den Fakultäten für Mathematik oder Wirtschaftswissenschaften vergeben werden. Soll die Masterarbeit außerhalb der Fakultäten für Mathematik oder Wirtschaftswissenschaften angefertigt werden, so bedarf dies der Genehmigung des Prüfungsausschusses. Der Studentin ist Gelegenheit zu geben, für das Thema Vorschläge zu machen. Auf Antrag der Studentin sorgt ausnahmsweise die Vorsitzende des Prüfungsausschusses dafür, dass die Studentin innerhalb von vier Wochen nach Antragstellung von einer Betreuerin ein Thema für die Masterarbeit erhält. Die Ausgabe des Themas erfolgt in diesem Fall über die Vorsitzende des Prüfungsausschusses.

(4) Der Masterarbeit werden 30 Leistungspunkte zugeordnet. Die Bearbeitungsdauer beträgt sechs Monate. Thema, Aufgabenstellung und Umfang der Masterarbeit sind von der Betreuerin so zu begrenzen, dass sie mit dem in Satz 1 festgelegten Arbeitsaufwand bearbeitet werden kann. Auf begründeten Antrag der Studentin kann der Prüfungsausschuss diesen Zeitraum um höchstens drei Monate verlängern.

(5) Bei der Abgabe der Masterarbeit hat die Studentin schriftlich zu versichern, dass sie die Arbeit selbstständig verfasst hat und keine anderen als die von ihr angegebenen Quellen und Hilfsmittel benutzt hat, die wörtlich oder inhaltlich übernommenen Stellen als solche kenntlich gemacht und die Satzung der Universität Karlsruhe (TH) zur Sicherung guter wissenschaftlicher Praxis in der jeweils gültigen Fassung beachtet hat. Wenn diese Erklärung nicht enthalten ist, wird die Arbeit nicht angenommen. Bei Abgabe einer unwahren Versicherung wird die Masterarbeit mit „nicht ausreichend“ (5.0) bewertet.

(6) Der Zeitpunkt der Ausgabe des Themas der Masterarbeit und der Zeitpunkt der Abgabe der Masterarbeit sind aktenkundig zu machen. Die Studentin kann das Thema der Masterarbeit nur einmal und nur innerhalb der ersten zwei Monate der Bearbeitungszeit zurückgeben. Wird die Masterarbeit nicht fristgerecht abgeliefert, gilt sie als mit „nicht ausreichend“ bewertet, es sei denn, dass die Studentin dieses Versäumnis nicht zu vertreten hat. Die Möglichkeit der Wiederholung wird in § 8 geregelt.

(7) Die Masterarbeit wird von einer Betreuerin sowie in der Regel von einer weiteren Prüferin aus den beteiligten Fakultäten begutachtet und bewertet. Eine der beiden muss Hochschullehrerin sein. Bei nicht übereinstimmender Beurteilung der beiden Prüferinnen setzt der Prüfungsausschuss im Rahmen der Bewertung der beiden Prüferinnen die Note der Masterarbeit fest. Der Bewertungszeitraum soll acht Wochen nicht überschreiten.

§ 12 Berufspraktikum

(1) Die Studentin kann während des Masterstudiums ein Berufspraktikum ableisten, welches geeignet ist, der Studentin eine Anschauung von der Verzahnung mathematischer und wirtschaftswissenschaftlicher Sichtweisen zu vermitteln. Dem Berufspraktikum sind 8 Leistungspunkte zugeordnet.

(2) Die Studentin setzt sich in eigener Verantwortung mit geeigneten privaten bzw. öffentlichen Einrichtungen in Verbindung, an denen das Praktikum abgeleistet werden kann. Die Studentin wird dabei von einer Prüferin nach § 15 Abs. 2 und einer Ansprechpartnerin der betroffenen Einrichtung betreut.

(3) Am Ende des Berufspraktikums ist der Prüferin ein kurzer Bericht abzugeben und eine Kurzpräsentation über die Erfahrungen im Berufspraktikum zu halten.

(4) Das Berufspraktikum ist abgeschlossen, wenn eine mindestens sechswöchige Tätigkeit nachgewiesen wird, der Bericht abgegeben und die Kurzpräsentation gehalten wurde. Das Berufspraktikum geht nicht in die Gesamtnote ein. Ein Berufspraktikum kann als Zusatzleistung im Sinne von § 13 Abs. 1 oder im Rahmen des Wahlpflichtfachs gemäß § 17 Abs. 4 erbracht werden.

§ 13 Zusatzleistungen, Zusatzmodule, Schlüsselqualifikationen

(1) Innerhalb der Regelstudienzeit, einschließlich der Urlaubssemester für das Studium an einer ausländischen Hochschule (Regelprüfungszeit), können in einem Modul bzw. Fach auch weitere Leistungspunkte (Zusatzleistungen) im Umfang von höchstens 20 Leistungspunkten pro Studiengang erworben werden. § 3 und § 4 der Prüfungsordnung bleiben davon unberührt. Diese Zusatzleistungen gehen nicht in die Festsetzung der Gesamt-, Fach- und Modulnoten ein. Die bei der Festlegung der Modul- bzw. Fachnote nicht berücksichtigten Leistungspunkte werden als Zusatzleistungen automatisch im Transcript of Records aufgeführt und als Zusatzleistungen gekennzeichnet. Zusatzleistungen werden mit den nach § 7 vorgesehenen Noten gelistet.

(2) Die Studentin hat bereits bei der Anmeldung zu einer Prüfung in einem Modul diese als Zusatzleistung zu deklarieren.

(3) Die Ergebnisse maximal zweier Module, die jeweils mindestens 9 Leistungspunkte umfassen müssen, werden auf Antrag der Studentin in das Bachelorzeugnis als Zusatzmodule aufgenommen und als Zusatzmodule gekennzeichnet. Zusatzmodule werden bei der Festsetzung der Gesamtnote nicht mit einbezogen. Nicht in das Zeugnis aufgenommene Zusatzmodule werden im Transcript of Records automatisch aufgenommen und als Zusatzmodule gekennzeichnet. Zusatzmodule werden mit den nach § 7 vorgesehenen Noten gelistet.

(4) Neben den verpflichtenden fachwissenschaftlichen Modulen sind Module zu den überfachlichen Schlüsselqualifikationen im Umfang von 3 bis 4 Leistungspunkten Bestandteil eines Masterstudiums. Im Studienplan werden Empfehlungen ausgesprochen, welche Module im Rahmen des Angebots zur Vermittlung der additiven Schlüsselqualifikationen belegt werden sollen.

§ 14 Prüfungsausschuss

(1) Für den Masterstudiengang Wirtschaftsmathematik wird ein Prüfungsausschuss gebildet. Er besteht aus sechs stimmberechtigten Mitgliedern, die jeweils zur Hälfte von der Fakultät für Mathematik und der Fakultät für Wirtschaftswissenschaften bestellt werden: vier Hochschullehrerinnen oder Privatdozentinnen, zwei Vertreterinnen der Gruppe der akademischen Mitarbeiterinnen nach § 10 Abs. 1, Satz 2, Nr. 2 LHG und einer Vertreterin der Studentinnen der Fakultät für Mathematik mit beratender Stimme. Weitere Mitglieder mit beratender Stimme können von den jeweiligen Fakultätsräten bestellt werden. Die Amtszeit der nichtstudentischen Mitglieder beträgt zwei Jahre, die des studentischen Mitglieds ein Jahr.

(2) Die Vorsitzende, ihre Stellvertreterin, die weiteren Mitglieder des Prüfungsausschusses sowie deren Stellvertreterinnen werden von den jeweiligen Fakultätsräten bestellt, die Mitglieder der Gruppe der akademischen Mitarbeiterinnen nach § 10 Abs. 1, Satz 2, Nr. 2 LHG und die Vertreterin der Studentinnen auf Vorschlag der Mitglieder der jeweiligen Gruppe; Wiederbestellung ist möglich. Die Vorsitzende und deren Stellvertreterin müssen Hochschullehrerin sein. Die Vorsitzende des Prüfungsausschusses nimmt die laufenden Geschäfte wahr.

(3) Der Prüfungsausschuss ist zuständig für die Organisation der Modulprüfungen und die Durchführung der ihm durch diese Studien- und Prüfungsordnung zugewiesenen Aufgaben. Er achtet auf die Einhaltung der Bestimmungen dieser Studien- und Prüfungsordnung und fällt die Entscheidung in Prüfungsangelegenheiten. Er entscheidet über die Anrechnung von Studienzeiten, Studienleistungen und Modulprüfungen und übernimmt die Gleichwertigkeitsfeststellung. Er berichtet der jeweiligen Fakultät regelmäßig über die Entwicklung der Prüfungs- und Studienzeiten, einschließlich der Bearbeitungszeiten für die Masterarbeiten und die Verteilung der Gesamtnoten. Er gibt Anregungen zur Reform der Studien- und Prüfungsordnung und der Modulbeschreibungen.

(4) Der Prüfungsausschuss kann die Erledigung seiner Aufgaben für alle Regelfälle auf die Vorsitzende des Prüfungsausschusses übertragen.

(5) Die Mitglieder des Prüfungsausschusses haben das Recht, der Abnahme von Prüfungen beizuwohnen. Die Mitglieder des Prüfungsausschusses, die Prüferinnen und die Beisitzenden unterliegen der Amtsverschwiegenheit. Sofern sie nicht im öffentlichen Dienst stehen, sind sie durch die Vorsitzende zur Verschwiegenheit zu verpflichten.

(6) In Angelegenheiten des Prüfungsausschusses, die eine an einer anderen Fakultät zu absolvierende Prüfungsleistung betreffen, ist auf Antrag eines Mitgliedes des Prüfungsausschusses eine fachlich zuständige und von der betroffenen Fakultät zu nennende Hochschullehrerin oder Privatdozentin hinzuzuziehen. Sie hat in diesem Punkt Stimmrecht.

(7) Belastende Entscheidungen des Prüfungsausschusses sind der Studentin schriftlich mitzuteilen. Sie sind zu begründen und mit einer Rechtsbehelfsbelehrung zu versehen. Widersprüche gegen Entscheidungen des Prüfungsausschusses sind innerhalb eines Monats nach Zugang der Entscheidung schriftlich oder zur Niederschrift beim Rektorat der Universität Karlsruhe (TH) einzulegen.

§ 15 Prüferinnen und Beisitzende

(1) Der Prüfungsausschuss bestellt die Prüferinnen und die Beisitzenden. Er kann die Bestellung der Vorsitzenden übertragen.

(2) Prüferinnen sind Hochschullehrerinnen und habilitierte Mitglieder sowie akademischen Mitarbeiterinnen, denen die Prüfungsbefugnis übertragen wurde. Zur Prüferin und Beisitzenden darf nur bestellt werden, wer mindestens die dem jeweiligen Prüfungsgegenstand entsprechende fachwissenschaftliche Qualifikation erworben hat.

(3) Soweit Lehrveranstaltungen von anderen als den unter Absatz 2 genannten Personen durchgeführt werden, sollen diese zu Prüferinnen bestellt werden, wenn die jeweilige Fakultät ihnen eine diesbezügliche Prüfungsbefugnis erteilt hat.

(4) Zur Beisitzenden darf nur bestellt werden, wer einen Masterabschluss in einem Studiengang der Wirtschaftsmathematik oder einen gleichwertigen akademischen Abschluss erworben hat.

§ 16 Anrechnung von Studienzeiten, Anerkennung von Studienleistungen und Modulprüfungen

(1) Studienzeiten und Studienleistungen und Modulprüfungen, die in gleichen oder anderen Studiengängen an der Universität Karlsruhe (TH) oder an anderen Hochschulen erbracht wurden, werden angerechnet, soweit Gleichwertigkeit besteht. Gleichwertigkeit ist festzustellen, wenn Leistungen in Inhalt, Umfang und in den Anforderungen denjenigen des Studiengangs im Wesentlichen entsprechen. Dabei ist kein schematischer Vergleich, sondern eine Gesamtbetrachtung vorzunehmen. Bezüglich des Umfangs einer zur Anerkennung vorgelegten Studienleistung und Modulprüfung werden die Grundsätze des ECTS herangezogen; die inhaltliche Gleichwertigkeitsprüfung orientiert sich an den Qualifikationszielen des Moduls.

(2) Werden Leistungen angerechnet, können die Noten – soweit die Notensysteme vergleichbar sind – übernommen werden und in die Berechnung der Modulnoten und der Gesamtnote einbezogen werden. Liegen keine Noten vor, muss die Leistung nicht anerkannt werden. Die Studentin hat die für die Anrechnung erforderlichen Unterlagen vorzulegen.

(3) Bei der Anrechnung von Studienzeiten und der Anerkennung von Studienleistungen und Modulprüfungen, die außerhalb der Bundesrepublik erbracht wurden, sind die von der Kultusministerkonferenz und der Hochschulrektorenkonferenz gebilligten Äquivalenzvereinbarungen sowie Absprachen im Rahmen der Hochschulpartnerschaften zu beachten.

(4) Absatz 1 gilt auch für Studienzeiten, Studienleistungen und Modulprüfungen, die in staatlich anerkannten Fernstudien- und an anderen Bildungseinrichtungen, insbesondere an staatlichen oder staatlich anerkannten Berufsakademien erworben wurden.

(5) Die Anerkennung von Teilen der Masterprüfung kann versagt werden, wenn in einem Studiengang mehr als die Hälfte aller Erfolgskontrollen und/oder in einem Studiengang mehr als die Hälfte der erforderlichen Leistungspunkte und/oder die Masterarbeit anerkannt werden sollen. Dies gilt insbesondere bei einem Studiengangwechsel sowie bei einem Studienortwechsel.

(6) Zuständig für die Anrechnungen ist der Prüfungsausschuss. Vor Feststellungen über die Gleichwertigkeit sind die zuständigen Fachvertreterinnen zu hören. Der Prüfungsausschuss entscheidet in Abhängigkeit von Art und Umfang der anzurechnenden Studien- und Prüfungsleistungen über die Einstufung in ein höheres Fachsemester.

II. Masterprüfung

§ 17 Umfang und Art der Masterprüfung

(1) Die Masterprüfung besteht aus den Prüfungen nach Absatz 2, 3 und 4 sowie der Masterarbeit nach Absatz 6.

(2) Es sind Prüfungen aus folgenden Gebieten durch den Nachweis von Leistungspunkten in jeweils einem oder mehreren Modulen abzulegen:

Fach Mathematik:

1. Stochastik: im Umfang von 8 Leistungspunkten,
2. Angewandte und Numerische Mathematik/Optimierung: im Umfang von 8 Leistungspunkten,
3. Analysis: im Umfang von 8 Leistungspunkten.

Des Weiteren sind Prüfungen aus den mathematischen Gebieten Stochastik, Angewandte und Numerische Mathematik/Optimierung, Analysis oder Algebra und Geometrie der Fakultät für Mathematik im Umfang von 12 Leistungspunkten abzulegen.

Fach Wirtschaftswissenschaften:

4. Finance - Risikomanagement - Managerial Economics: im Umfang von 18 Leistungspunkten,
5. Operations Management - Datenanalyse - Informatik: im Umfang von 18 Leistungspunkten.

Die Module, die ihnen zugeordneten Leistungspunkte und die Zuordnung der Module zu den Gebieten und Fächern sind im Studienplan festgelegt. Zur entsprechenden Modulprüfung kann nur zugelassen werden, wer die Anforderungen nach § 5 erfüllt.

- (3) Es sind zwei Seminarmodule über je 3 Leistungspunkte nachzuweisen. Dabei muss je ein Seminarmodul aus den beiden beteiligten Fakultäten bestanden werden.
- (4) Es sind weiterhin 12 Leistungspunkte zu erbringen, wobei mindestens 8 Leistungspunkte aus den obigen Gebieten 1.-5. oder dem Berufspraktikum kommen müssen und 3 bis 4 Leistungspunkte aus Modulen zu Schlüsselqualifikationen nach § 13 Abs. 4.
- (5) Im Studienplan oder Modulhandbuch können darüber hinaus inhaltliche Schwerpunkte definiert werden, denen Module zugeordnet werden können.
- (6) Als weitere Prüfungsleistung ist eine Masterarbeit gemäß § 11 anzufertigen.

§ 18 Bestehen der Masterprüfung, Bildung der Gesamtnote

- (1) Die Masterprüfung ist bestanden, wenn alle in § 17 genannten Prüfungsleistungen mindestens mit „ausreichend“ bewertet wurden.
- (2) Die Gesamtnote der Masterprüfung errechnet sich als ein mit Leistungspunkten gewichteter Notendurchschnitt. Dabei werden alle Prüfungsleistungen nach § 17 mit ihren Leistungspunkten gewichtet.
- (3) Hat die Studentin die Masterarbeit mit der Note 1.0 und die Masterprüfung mit einem Durchschnitt von 1.0 abgeschlossen, so wird das Prädikat „mit Auszeichnung“ (with distinction) verliehen. Mit einer Masterarbeit mit der Note 1.0 und bis zu einem Durchschnitt von 1.3 kann auf Antrag an den Prüfungsausschuss das Prädikat „mit Auszeichnung“ (with distinction) verliehen werden.

§ 19 Masterzeugnis, Masterurkunde, Transcript of Records und Diploma Supplement

- (1) Über die Masterprüfung werden nach Bewertung der letzten Prüfungsleistung eine Masterurkunde und ein Zeugnis erstellt. Die Ausfertigung von Masterurkunde und Zeugnis soll nicht später als sechs Wochen nach der Bewertung der letzten Prüfungsleistung erfolgen. Masterurkunde und Masterzeugnis werden in deutscher und englischer Sprache ausgestellt. Masterurkunde und Zeugnis tragen das Datum der erfolgreichen Erbringung der letzten Prüfungsleistung. Sie werden der Studentin gleichzeitig ausgehändigt. In der Masterurkunde wird die Verleihung des akademischen Mastergrades beurkundet. Die Masterurkunde wird von der Rektorin und der Dekanin unterzeichnet und mit dem Siegel der Universität versehen.
- (2) Das Zeugnis enthält die in den Fachprüfungen, den zugeordneten Modulprüfungen und der Masterarbeit erzielten Noten, deren zugeordnete Leistungspunkte und ECTS-Noten und die Gesamtnote und die ihr entsprechende ECTS-Note. Das Zeugnis ist von den Dekaninnen der beteiligten Fakultäten und von der Vorsitzenden des Prüfungsausschusses zu unterzeichnen.
- (3) Weiterhin erhält die Studentin als Anhang ein Diploma Supplement in deutscher und englischer Sprache, das den Vorgaben des jeweils gültigen ECTS User's Guide entspricht. Das Diploma Supplement enthält eine Abschrift der Studiendaten der Studentin (Transcript of Records).
- (4) Die Abschrift der Studiendaten (Transcript of Records) enthält in strukturierter Form alle von der Studentin erbrachten Prüfungsleistungen. Sie beinhaltet alle Fächer, Fachnoten und ihre

entsprechende ECTS-Note samt den zugeordneten Leistungspunkten, die dem jeweiligen Fach zugeordneten Module mit den Modulnoten, entsprechender ECTS-Note und zugeordneten Leistungspunkten sowie die den Modulen zugeordneten Lehrveranstaltungen samt Noten und zugeordneten Leistungspunkten. Aus der Abschrift der Studiendaten soll die Zugehörigkeit von Lehrveranstaltungen zu den einzelnen Modulen und die Zugehörigkeit der Module zu den einzelnen Fächern deutlich erkennbar sein. Angerechnete Studienleistungen sind im Transcript of Records aufzunehmen.

(5) Die Masterurkunde, das Masterzeugnis und das Diploma Supplement einschließlich des Transcript of Records werden vom Studienbüro der Universität ausgestellt.

III. Schlussbestimmungen

§ 20 Bescheid über Nicht-Bestehen, Bescheinigung von Prüfungsleistungen

(1) Der Bescheid über die endgültig nicht bestandene Masterprüfung wird der Studentin durch den Prüfungsausschuss in schriftlicher Form erteilt. Der Bescheid ist mit einer Rechtsbehelfsbelehrung zu versehen.

(2) Hat die Studentin die Masterprüfung endgültig nicht bestanden, wird ihr auf Antrag und gegen Vorlage der Exmatrikulationsbescheinigung eine schriftliche Bescheinigung ausgestellt, die die erbrachten Prüfungsleistungen und deren Noten sowie die zur Prüfung noch fehlenden Prüfungsleistungen enthält und erkennen lässt, dass die Prüfung insgesamt nicht bestanden ist. Dasselbe gilt, wenn der Prüfungsanspruch erloschen ist.

§ 21 Ungültigkeit der Masterprüfung, Entziehung des Mastergrades

(1) Hat die Studentin bei einer Prüfungsleistung getäuscht und wird diese Tatsache nach der Aushändigung des Zeugnisses bekannt, so können die Noten der Modulprüfungen, bei deren Erbringung die Studentin getäuscht hat, berichtigt werden. Gegebenenfalls kann die Modulprüfung für „nicht ausreichend“ (5.0) und die Masterprüfung für „nicht bestanden“ erklärt werden.

(2) Waren die Voraussetzungen für die Zulassung zu einer Prüfung nicht erfüllt, ohne dass die Studentin darüber täuschen wollte, und wird diese Tatsache erst nach Aushändigung des Zeugnisses bekannt, wird dieser Mangel durch das Bestehen der Prüfung geheilt. Hat die Studentin die Zulassung vorsätzlich zu Unrecht erwirkt, so kann die Modulprüfung für „nicht ausreichend“ (5.0) und die Masterprüfung für „nicht bestanden“ erklärt werden.

(3) Vor einer Entscheidung des Prüfungsausschusses ist der Studentin Gelegenheit zur Äußerung zu geben.

(4) Das unrichtige Zeugnis ist zu entziehen und gegebenenfalls ein neues zu erteilen. Mit dem unrichtigen Zeugnis ist auch die Masterurkunde einzuziehen, wenn die Masterprüfung aufgrund einer Täuschung für „nicht bestanden“ erklärt wurde.

(5) Eine Entscheidung nach Absatz 1 und Absatz 2 Satz 2 ist nach einer Frist von fünf Jahren ab dem Datum des Zeugnisses ausgeschlossen.

(6) Die Aberkennung des akademischen Grades richtet sich nach den gesetzlichen Vorschriften.

§ 22 Einsicht in die Prüfungsakten

(1) Nach Abschluss der Masterprüfung wird der Studentin auf Antrag innerhalb eines Jahres Einsicht in ihre Masterarbeit, die darauf bezogenen Gutachten und in die Prüfungsprotokolle gewährt.

- (2) Für die Einsichtnahme in die schriftlichen Modulprüfungen, schriftlichen Modulteilprüfungen bzw. Prüfungsprotokolle gilt eine Frist von einem Monat nach Bekanntgabe des Prüfungsergebnisses.
- (3) Die Prüferin bestimmt Ort und Zeit der Einsichtnahme.
- (4) Prüfungsunterlagen sind mindestens fünf Jahre aufzubewahren.

§ 23 In-Kraft-Treten

- (1) Diese Studien- und Prüfungsordnung tritt am 1. Oktober 2009 in Kraft.
- (2) Studierende, die auf Grundlage der Prüfungsordnung der Universität Karlsruhe (TH) für den Diplomstudiengang Wirtschaftsmathematik vom 15. November 2001 (Amtliche Bekanntmachung der Universität Karlsruhe (TH) Nr. 30 vom 26. November 2001) in der Fassung der Änderungssatzung vom 10. September 2003 (Amtliche Bekanntmachung der Universität Karlsruhe (TH) Nr. 28 vom 20. Oktober 2003) ihr Studium an der Universität Karlsruhe (TH) aufgenommen haben, können einen Antrag auf Zulassung zur Prüfung letztmalig am 30. September 2020 stellen.

Karlsruhe, den 28. August 2009

*Professor Dr. sc. tech. Horst Hippler
(Rektor)*

**Studien- und Prüfungsordnung
des Karlsruher Instituts für Technologie (KIT) für den Masterstudiengang
Wirtschaftsmathematik**

vom 17.12.2015

Aufgrund von § 10 Absatz 2 Ziff. 5 und § 20 des Gesetzes über das Karlsruher Institut für Technologie (KIT-Gesetz - KITG) in der Fassung vom 14. Juli 2009 (GBI. S. 317 f), zuletzt geändert durch Artikel 5 des Dritten Gesetzes zur Änderung hochschulrechtlicher Vorschriften (3. Hochschulrechtsänderungsgesetz – 3. HRÄG) vom 01. April 2014 (GBI. S. 99, 167) und § 8 Absatz 5 des Gesetzes über die Hochschulen in Baden-Württemberg (Landeshochschulgesetz - LHG) in der Fassung vom 1. Januar 2005 (GBI. S. 1 f), zuletzt geändert durch Artikel 1 des 3. HRÄG vom 01. April 2014 (GBI. S. 99 ff.), hat der Senat des KIT am 14.12.2015 die folgende Studien- und Prüfungsordnung für den Masterstudiengang Wirtschaftsmathematik beschlossen.

Der Präsident hat seine Zustimmung gemäß § 20 Absatz 2 KITG iVm. § 32 Absatz 3 Satz 1 LHG am 17. Dezember 2015 erteilt.

Inhaltsverzeichnis

I. Allgemeine Bestimmungen

- § 1 Geltungsbereich
- § 2 Ziele des Studiums, akademischer Grad
- § 3 Regelstudienzeit, Studienaufbau, Leistungspunkte
- § 4 Modulprüfungen, Studien- und Prüfungsleistungen
- § 5 Anmeldung und Zulassung zu den Modulprüfungen und Lehrveranstaltungen
- § 6 Durchführung von Erfolgskontrollen
 - § 6 a Erfolgskontrollen im Antwort-Wahl-Verfahren
 - § 6 b Computergestützte Erfolgskontrollen
- § 7 Bewertung von Studien- und Prüfungsleistungen
- § 8 Wiederholung von Erfolgskontrollen, endgültiges Nichtbestehen
- § 9 Verlust des Prüfungsanspruchs
- § 10 Abmeldung; Versäumnis, Rücktritt
- § 11 Täuschung, Ordnungsverstoß
- § 12 Mutterschutz, Elternzeit, Wahrnehmung von Familienpflichten
- § 13 Studierende mit Behinderung oder chronischer Erkrankung
- § 14 Modul Masterarbeit
- § 15 Zusatzleistungen
- § 16 Prüfungsausschuss
- § 17 Prüfende und Beisitzende
- § 18 Anerkennung von Studien- und Prüfungsleistungen, Studienzeiten

II. Masterprüfung

- § 19 Umfang und Art der Masterprüfung
- § 20 Bestehen der Masterprüfung, Bildung der Gesamtnote
- § 21 Masterzeugnis, Masterurkunde, Diploma Supplement und Transcript of Records

III. Schlussbestimmungen

- § 22 Bescheinigung von Prüfungsleistungen
- § 23 Aberkennung des Mastergrades
- § 24 Einsicht in die Prüfungsakten
- § 25 Inkrafttreten, Übergangsvorschriften

Präambel

Das KIT hat sich im Rahmen der Umsetzung des Bolognaprozesses zum Aufbau eines europäischen Hochschulraumes zum Ziel gesetzt, dass am Abschluss des Studiums am KIT der Mastergrad stehen soll. Das KIT sieht daher die am KIT angebotenen konsekutiven Bachelor- und Masterstudiengänge als Gesamtkonzept mit konsekutivem Curriculum.

I. Allgemeine Bestimmungen

§ 1 Geltungsbereich

Diese Masterprüfungsordnung regelt Studienablauf, Prüfungen und den Abschluss des Studiums im Masterstudiengang Wirtschaftsmathematik am KIT.

§ 2 Ziel des Studiums, akademischer Grad

(1) Im konsekutiven Masterstudium sollen die im Bachelorstudium erworbenen wissenschaftlichen Qualifikationen weiter vertieft, verbreitert, erweitert oder ergänzt werden. Ziel des Studiums ist die Fähigkeit, die wissenschaftlichen Erkenntnisse und Methoden selbstständig anzuwenden und ihre Bedeutung und Reichweite für die Lösung komplexer wissenschaftlicher und gesellschaftlicher Problemstellungen zu bewerten.

(2) Aufgrund der bestandenen Masterprüfung wird der akademische Grad „Master of Science (M.Sc.)“ für den Masterstudiengang Wirtschaftsmathematik verliehen.

§ 3 Regelstudienzeit, Studienaufbau, Leistungspunkte

(1) Die Regelstudienzeit beträgt vier Semester.

(2) Das Lehrangebot des Studiengangs ist in Fächer, die Fächer sind in Module, die jeweiligen Module in Lehrveranstaltungen gegliedert. Die Fächer und ihr Umfang werden in § 19 festgelegt. Näheres beschreibt das Modulhandbuch. .

(3) Der für das Absolvieren von Lehrveranstaltungen und Modulen vorgesehene Arbeitsaufwand wird in Leistungspunkten (LP) ausgewiesen. Die Maßstäbe für die Zuordnung von Leistungspunkten entsprechen dem European Credit Transfer System (ECTS). Ein Leistungspunkt entspricht einem Arbeitsaufwand von etwa 30 Zeitstunden. Die Verteilung der Leistungspunkte auf die Semester hat in der Regel gleichmäßig zu erfolgen.

(4) Der Umfang der für den erfolgreichen Abschluss des Studiums erforderlichen Studien- und Prüfungsleistungen wird in Leistungspunkten gemessen und beträgt insgesamt 120 Leistungspunkte.

(5) Lehrveranstaltungen können nach vorheriger Ankündigung auch in englischer Sprache angeboten werden.

§ 4 Modulprüfungen, Studien- und Prüfungsleistungen

(1) Die Masterprüfung besteht aus Modulprüfungen. Modulprüfungen bestehen aus einer oder mehreren Erfolgskontrollen.

Erfolgskontrollen gliedern sich in Studien- oder Prüfungsleistungen.

(2) Prüfungsleistungen sind:

1. schriftliche Prüfungen,
2. mündliche Prüfungen oder
3. Prüfungsleistungen anderer Art.

(3) Studienleistungen sind schriftliche, mündliche oder praktische Leistungen, die von den Studierenden in der Regel lehrveranstaltungsbegleitend erbracht werden. Die Masterprüfung darf nicht mit einer Studienleistung abgeschlossen werden.

(4) Von den Modulprüfungen sollen mindestens 70 % benotet sein.

(5) Bei sich ergänzenden Inhalten können die Modulprüfungen mehrerer Module durch eine auch modulübergreifende Prüfungsleistung (Absatz 2 Nr.1 bis 3) ersetzt werden.

§ 5 Anmeldung und Zulassung zu den Modulprüfungen und Lehrveranstaltungen

(1) Um an den Modulprüfungen teilnehmen zu können, müssen sich die Studierenden online im Studierendenportal zu den jeweiligen Erfolgskontrollen anmelden. In Ausnahmefällen kann eine Anmeldung schriftlich im Studierendenservice oder in einer anderen, vom Studierendenservice autorisierten Einrichtung erfolgen. Für die Erfolgskontrollen können durch die Prüfenden Anmeldefristen festgelegt werden. Die Anmeldung der Masterarbeit ist im Modulhandbuch geregelt.

(2) Sofern Wahlmöglichkeiten bestehen, müssen Studierende, um zu einer Prüfung in einem bestimmten Modul zugelassen zu werden, vor der ersten Prüfung in diesem Modul mit der Anmeldung zu der Prüfung eine bindende Erklärung über die Wahl des betreffenden Moduls und dessen Zuordnung zu einem Fach abgeben. Auf Antrag des/der Studierenden an den Prüfungsausschuss kann die Wahl oder die Zuordnung nachträglich geändert werden.

(3) Zu einer Erfolgskontrolle ist zuzulassen, wer

1. in den Masterstudiengang Wirtschaftsmathematik am KIT eingeschrieben ist; die Zulassung beurlaubter Studierender ist auf Prüfungsleistungen beschränkt; und
2. nachweist, dass er die im Modulhandbuch für die Zulassung zu einer Erfolgskontrolle festgelegten Voraussetzungen erfüllt und
3. nachweist, dass er in dem Masterstudiengang Wirtschaftsmathematik den Prüfungsanspruch nicht verloren hat.

(4) Nach Maßgabe von § 30 Abs. 5 LHG kann die Zulassung zu einzelnen Pflichtveranstaltungen beschränkt werden. Der/die Prüfende entscheidet über die Auswahl unter den Studierenden, die sich rechtzeitig bis zu dem von dem/der Prüfenden festgesetzten Termin angemeldet haben unter Berücksichtigung des Studienfortschritts dieser Studierenden und unter Beachtung von § 13 Abs. 1 Satz 1 und 2, sofern ein Abbau des Überhangs durch andere oder zusätzliche Veranstaltungen nicht möglich ist. Für den Fall gleichen Studienfortschritts sind durch die KIT-Fakultäten weitere Kriterien festzulegen. Das Ergebnis wird den Studierenden rechtzeitig bekannt gegeben.

(5) Die Zulassung ist zu versagen, wenn die in Absatz 3 und 4 genannten Voraussetzungen nicht erfüllt sind. Die Zulassung kann versagt werden, wenn die betreffende Erfolgskontrolle bereits in einem grundständigen Bachelorstudiengang am KIT erbracht wurde, der Zulassungsvooraussetzung für diesen Masterstudiengang gewesen ist. Dies gilt nicht für Mastervorzugsleistungen. Zu diesen ist eine Zulassung nach Maßgabe von Satz 1 ausdrücklich zu genehmigen.

§ 6 Durchführung von Erfolgskontrollen

(1) Erfolgskontrollen werden studienbegleitend, in der Regel im Verlauf der Vermittlung der Lehrinhalte der einzelnen Module oder zeitnah danach, durchgeführt.

(2) Die Art der Erfolgskontrolle (§ 4 Abs. 2 Nr. 1 bis 3, Abs. 3) wird von der/dem Prüfenden der betreffenden Lehrveranstaltung in Bezug auf die Lerninhalte der Lehrveranstaltung und die Lernziele des Moduls festgelegt. Die Art der Erfolgskontrolle, ihre Häufigkeit, Reihenfolge und Gewichtung sowie gegebenenfalls die Bildung der Modulnote müssen mindestens sechs Wo-

chen vor Vorlesungsbeginn im Modulhandbuch bekannt gemacht werden. Im Einvernehmen von Prüfendem und Studierender bzw. Studierendem können die Art der Prüfungsleistung sowie die Prüfungssprache auch nachträglich geändert werden; im ersten Fall ist jedoch § 4 Abs. 4 zu berücksichtigen. Bei der Prüfungsorganisation sind die Belange Studierender mit Behinderung oder chronischer Erkrankung gemäß § 13 Abs. 1 zu berücksichtigen. § 13 Abs. 1 Satz 3 und 4 gelten entsprechend.

(3) Bei unvertretbar hohem Prüfungsaufwand kann eine schriftlich durchzuführende Prüfungsleistung auch mündlich, oder eine mündlich durchzuführende Prüfungsleistung auch schriftlich abgenommen werden. Diese Änderung muss mindestens sechs Wochen vor der Prüfungsleistung bekannt gegeben werden.

(4) Bei Lehrveranstaltungen in englischer Sprache (§ 3 Abs. 6) können die entsprechenden Erfolgskontrollen in dieser Sprache abgenommen werden. § 6 Abs. 2 gilt entsprechend.

(5) *Schriftliche Prüfungen* (§ 4 Abs. 2 Nr. 1) sind in der Regel von einer/einem Prüfenden nach § 18 Abs. 2 oder 3 zu bewerten. Sofern eine Bewertung durch mehrere Prüfende erfolgt, ergibt sich die Note aus dem arithmetischen Mittel der Einzelbewertungen. Entspricht das arithmetische Mittel keiner der in § 7 Abs. 2 Satz 2 definierten Notenstufen, so ist auf die nächstliegende Notenstufe auf- oder abzurunden. Bei gleichem Abstand ist auf die nächstbessere Notenstufe zu runden. Das Bewertungsverfahren soll sechs Wochen nicht überschreiten. Schriftliche Prüfungen dauern mindestens 60 und höchstens 300 Minuten.

(6) *Mündliche Prüfungen* (§ 4 Abs. 2 Nr. 2) sind von mehreren Prüfenden (Kollegialprüfung) oder von einer/einem Prüfenden in Gegenwart einer oder eines Beisitzenden als Gruppen- oder Einzelprüfungen abzunehmen und zu bewerten. Vor der Festsetzung der Note hört die/der Prüfende die anderen an der Kollegialprüfung mitwirkenden Prüfenden an. Mündliche Prüfungen dauern in der Regel mindestens 15 Minuten und maximal 60 Minuten pro Studierenden.

Die wesentlichen Gegenstände und Ergebnisse der *mündlichen Prüfung* sind in einem Protokoll festzuhalten. Das Ergebnis der Prüfung ist den Studierenden im Anschluss an die mündliche Prüfung bekannt zu geben.

Studierende, die sich in einem späteren Semester der gleichen Prüfung unterziehen wollen, werden entsprechend den räumlichen Verhältnissen und nach Zustimmung des Prüflings als Zuhörerinnen und Zuhörer bei mündlichen Prüfungen zugelassen. Die Zulassung erstreckt sich nicht auf die Beratung und Bekanntgabe der Prüfungsergebnisse.

(7) Für *Prüfungsleistungen anderer Art* (§ 4 Abs. 2 Nr. 3) sind angemessene Bearbeitungsfristen einzuräumen und Abgabetermine festzulegen. Dabei ist durch die Art der Aufgabenstellung und durch entsprechende Dokumentation sicherzustellen, dass die erbrachte Prüfungsleistung dem/der Studierenden zurechenbar ist. Die wesentlichen Gegenstände und Ergebnisse der Erfolgskontrolle sind in einem Protokoll festzuhalten.

Bei *mündlich* durchgeföhrten *Prüfungsleistungen anderer Art* muss neben der/dem Prüfenden ein/e Beisitzende/r anwesend sein, die/der zusätzlich zum/r Prüfenden das Protokoll zeichnet.

Schriftliche Arbeiten im Rahmen einer *Prüfungsleistung anderer Art* haben dabei die folgende Erklärung zu tragen: „Ich versichere wahrheitsgemäß, die Arbeit selbstständig angefertigt, alle benutzten Hilfsmittel vollständig und genau angegeben und alles kenntlich gemacht zu haben, was aus Arbeiten anderer unverändert oder mit Abänderungen entnommen wurde.“ Trägt die Arbeit diese Erklärung nicht, wird sie nicht angenommen. Die wesentlichen Gegenstände und Ergebnisse einer solchen Erfolgskontrolle sind in einem Protokoll festzuhalten.

§ 6 a Erfolgskontrollen im Antwort-Wahl-Verfahren

Das Modulhandbuch regelt, ob und in welchem Umfang Erfolgskontrollen im Wege des *Antwort-Wahl-Verfahrens* abgelegt werden können

§ 6 b Computergestützte Erfolgskontrollen

(1) Erfolgskontrollen können computergestützt durchgeführt werden. Dabei wird die Antwort bzw. Lösung der/des Studierenden elektronisch übermittelt und, sofern möglich, automatisiert ausgewertet. Die Prüfungsinhalte sind von einer/einem Prüfenden zu erstellen.

(2) Vor der computergestützten Erfolgskontrolle hat die/der Prüfende sicherzustellen, dass die elektronischen Daten eindeutig identifiziert und unverwechselbar und dauerhaft den Studierenden zugeordnet werden können. Der störungsfreie Verlauf einer computergestützten Erfolgskontrolle ist durch entsprechende technische Betreuung zu gewährleisten, insbesondere ist die Erfolgskontrolle in Anwesenheit einer fachlich sachkundigen Person durchzuführen. Alle Prüfungsaufgaben müssen während der gesamten Bearbeitungszeit zur Bearbeitung zur Verfügung stehen.

(3) Im Übrigen gelten für die Durchführung von computergestützten Erfolgskontrollen die §§ 6 bzw. 6 a.

§ 7 Bewertung von Studien- und Prüfungsleistungen

(1) Das Ergebnis einer Prüfungsleistung wird von den jeweiligen Prüfenden in Form einer Note festgesetzt.

(2) Folgende Noten sollen verwendet werden:

sehr gut (very good)	:	hervorragende Leistung,
gut (good)	:	eine Leistung, die erheblich über den durchschnittlichen Anforderungen liegt,
befriedigend (satisfactory)	:	eine Leistung, die durchschnittlichen Anforderungen entspricht,
ausreichend (sufficient)	:	eine Leistung, die trotz ihrer Mängel noch den Anforderungen genügt,
nicht ausreichend (failed)	:	eine Leistung, die wegen erheblicher Mängel nicht den Anforderungen genügt.

Zur differenzierten Bewertung einzelner Prüfungsleistungen sind nur folgende Noten zugelassen:

1,0; 1,3	:	sehr gut
1,7; 2,0; 2,3	:	gut
2,7; 3,0; 3,3	:	befriedigend
3,7; 4,0	:	ausreichend
5,0	:	nicht ausreichend

(3) Studienleistungen werden mit „bestanden“ oder mit „nicht bestanden“ gewertet.

(4) Bei der Bildung der gewichteten Durchschnitte der Modulnoten, der Fachnoten und der Gesamtnote wird nur die erste Dezimalstelle hinter dem Komma berücksichtigt; alle weiteren Stellen werden ohne Rundung gestrichen.

(5) Jedes Modul und jede Erfolgskontrolle darf in demselben Studiengang nur einmal gewertet werden.

(6) Eine Prüfungsleistung ist bestanden, wenn die Note mindestens „ausreichend“ (4,0) ist.

(7) Die Modulprüfung ist bestanden, wenn alle erforderlichen Erfolgskontrollen bestanden sind. Die Modulprüfung und die Bildung der Modulnote sollen im Modulhandbuch geregelt werden. Sofern das Modulhandbuch keine Regelung über die Bildung der Modulnote enthält, errechnet sich die Modulnote aus einem nach den Leistungspunkten der einzelnen Teilmodule gewichteten Notendurchschnitt. Die differenzierten Noten (Absatz 2) sind bei der Berechnung der Modulnoten als Ausgangsdaten zu verwenden.

(8) Die Ergebnisse der Erfolgskontrollen sowie die erworbenen Leistungspunkte werden durch den Studierendenservice des KIT verwaltet.

(9) Die Noten der Module eines Faches gehen in die Fachnote mit einem Gewicht proportional zu den ausgewiesenen Leistungspunkten der Module ein.

(10) Die Gesamtnote der Masterprüfung, die Fachnoten und die Modulnoten lauten:

bis 1,5	=	sehr gut
von 1,6 bis 2,5	=	gut
von 2,6 bis 3,5	=	befriedigend
von 3,6 bis 4,0	=	ausreichend

§ 8 Wiederholung von Erfolgskontrollen, endgültiges Nichtbestehen

(1) Studierende können eine nicht bestandene schriftliche Prüfung (§ 4 Absatz 2 Nr. 1) einmal wiederholen. Wird eine schriftliche Wiederholungsprüfung mit „nicht ausreichend“ (5,0) bewertet, so findet eine mündliche Nachprüfung im zeitlichen Zusammenhang mit dem Termin der nicht bestandenen Prüfung statt. In diesem Falle kann die Note dieser Prüfung nicht besser als „ausreichend“ (4,0) sein.

(2) Studierende können eine nicht bestandene mündliche Prüfung (§ 4 Absatz 2 Nr. 2) einmal wiederholen.

(3) Wiederholungsprüfungen nach Absatz 1 und 2 müssen in Inhalt, Umfang und Form (mündlich oder schriftlich) der ersten entsprechen. Ausnahmen kann der zuständige Prüfungsausschuss auf Antrag zulassen.

(4) Prüfungsleistungen anderer Art (§ 4 Absatz 2 Nr. 3) können einmal wiederholt werden.

(5) Studienleistungen können mehrfach wiederholt werden.

(6) Die Prüfungsleistung ist endgültig nicht bestanden, wenn die mündliche Nachprüfung im Sinne des Absatzes 1 mit „nicht ausreichend“ (5,0) bewertet wurde. Die Prüfungsleistung ist ferner endgültig nicht bestanden, wenn die mündliche Prüfung im Sinne des Absatzes 2 oder die Prüfungsleistung anderer Art gemäß Absatz 4 zweimal mit „nicht bestanden“ bewertet wurde.

(7) Das Modul ist endgültig nicht bestanden, wenn eine für sein Bestehen erforderliche Prüfungsleistung endgültig nicht bestanden ist.

(8) Eine zweite Wiederholung derselben Prüfungsleistung gemäß § 4 Abs. 2 ist nur in Ausnahmefällen auf Antrag des/der Studierenden zulässig („Antrag auf Zweitwiederholung“). Der Antrag ist schriftlich beim Prüfungsausschuss in der Regel bis zwei Monate nach Bekanntgabe der Note zu stellen.

Über den ersten Antrag eines/einer Studierenden auf Zweitwiederholung entscheidet der Prüfungsausschuss, wenn er den Antrag genehmigt. Wenn der Prüfungsausschuss diesen Antrag ablehnt, entscheidet ein Mitglied des Präsidiums. Über weitere Anträge auf Zweitwiederholung entscheidet nach Stellungnahme des Prüfungsausschusses ein Mitglied des Präsidiums. Wird der Antrag genehmigt, hat die Zweitwiederholung spätestens zum übernächsten Prüfungstermin zu erfolgen. Absatz 1 Satz 2 und 3 gelten entsprechend.

(9) Die Wiederholung einer bestandenen Prüfungsleistung ist nicht zulässig.

(10) Die Masterarbeit kann bei einer Bewertung mit „nicht ausreichend“ (5,0) einmal wiederholt werden. Eine zweite Wiederholung der Masterarbeit ist ausgeschlossen.

§ 9 Verlust des Prüfungsanspruchs

Ist eine nach dieser Studien- und Prüfungsordnung erforderliche Studien- oder Prüfungsleistung endgültig nicht bestanden oder die Masterprüfung bis zum Ende des Prüfungszeitraums des siebten Fachsemesters einschließlich etwaiger Wiederholungen nicht vollständig abgelegt, so erlischt der Prüfungsanspruch im Masterstudiengang Wirtschaftsmathematik, es sei denn, dass die Fristüberschreitung nicht selbst zu vertreten ist. Die Entscheidung über eine Fristverlängerung und über Ausnahmen von der Fristregelung trifft der Prüfungsausschuss unter Beachtung der in § 32 Abs. 6 LHG genannten Tätigkeiten auf Antrag des/der Studierenden. Der Antrag ist schriftlich in der Regel bis sechs Wochen vor Ablauf der Frist zu stellen.

§ 10 Abmeldung; Versäumnis, Rücktritt

(1) Studierende können ihre Anmeldung zu *schriftlichen Prüfungen* ohne Angabe von Gründen bis zur Ausgabe der Prüfungsaufgaben widerrufen (Abmeldung). Eine Abmeldung kann online im Studierendenportal bis 24:00 Uhr des Vortages der Prüfung oder in begründeten Ausnahmefällen beim Studierendenservice innerhalb der Geschäftszeiten erfolgen. Erfolgt die Abmeldung gegenüber dem/der Prüfenden hat diese/r Sorge zu tragen, dass die Abmeldung im Campus Management System verbucht wird.

(2) Bei *mündlichen Prüfungen* muss die Abmeldung spätestens drei Werkstage vor dem betreffenden Prüfungstermin gegenüber dem/der Prüfenden erklärt werden. Der Rücktritt von einer mündlichen Prüfung weniger als drei Werkstage vor dem betreffenden Prüfungstermin ist nur unter den Voraussetzungen des Absatzes 5 möglich. Der Rücktritt von mündlichen Nachprüfungen im Sinne von § 8 Abs. 1 ist grundsätzlich nur unter den Voraussetzungen von Absatz 5 möglich.

(3) Die Abmeldung von *Prüfungsleistungen anderer Art* sowie von *Studienleistungen* ist im Modulhandbuch geregelt.

(4) Eine Erfolgskontrolle gilt als mit „nicht ausreichend“ (5,0) bewertet, wenn die Studierenden einen Prüfungstermin ohne triftigen Grund versäumen oder wenn sie nach Beginn der Erfolgskontrolle ohne triftigen Grund von dieser zurücktreten. Dasselbe gilt, wenn die Masterarbeit nicht innerhalb der vorgesehenen Bearbeitungszeit erbracht wird, es sei denn, der/die Studierende hat die Fristüberschreitung nicht zu vertreten.

(5) Der für den Rücktritt nach Beginn der Erfolgskontrolle oder das Versäumnis geltend gemachte Grund muss dem Prüfungsausschuss unverzüglich schriftlich angezeigt und glaubhaft gemacht werden. Bei Krankheit des/der Studierenden oder eines allein zu versorgenden Kindes oder pflegebedürftigen Angehörigen kann die Vorlage eines ärztlichen Attestes verlangt werden.

§ 11 Täuschung, Ordnungsverstoß

(1) Versuchen Studierende das Ergebnis ihrer Erfolgskontrolle durch Täuschung oder Benutzung nicht zugelassener Hilfsmittel zu beeinflussen, gilt die betreffende Erfolgskontrolle als mit „nicht ausreichend“ (5,0) bewertet.

(2) Studierende, die den ordnungsgemäßen Ablauf einer Erfolgskontrolle stören, können von der/dem Prüfenden oder der Aufsicht führenden Person von der Fortsetzung der Erfolgskontrolle ausgeschlossen werden. In diesem Fall gilt die betreffende Erfolgskontrolle als mit „nicht ausreichend“ (5,0) bewertet. In schwerwiegenden Fällen kann der Prüfungsausschuss diese Studierenden von der Erbringung weiterer Erfolgskontrollen ausschließen.

(3) Näheres regelt die Allgemeine Satzung des KIT zur Redlichkeit bei Prüfungen und Praktika in der jeweils gültigen Fassung.

§ 12 Mutterschutz, Elternzeit, Wahrnehmung von Familienpflichten

(1) Auf Antrag sind die Mutterschutzfristen, wie sie im jeweils gültigen Gesetz zum Schutz der erwerbstätigen Mutter (Mutterschutzgesetz - MuSchG) festgelegt sind, entsprechend zu berücksichtigen. Dem Antrag sind die erforderlichen Nachweise beizufügen. Die Mutterschutzfristen unterbrechen jede Frist nach dieser Prüfungsordnung. Die Dauer des Mutterschutzes wird nicht in die Frist eingerechnet.

(2) Gleichfalls sind die Fristen der Elternzeit nach Maßgabe des jeweils gültigen Gesetzes (Bundeselterngeld- und Elternzeitgesetz - BEEG) auf Antrag zu berücksichtigen. Der/die Studierende muss bis spätestens vier Wochen vor dem Zeitpunkt, von dem an die Elternzeit angetreten werden soll, dem Prüfungsausschuss, unter Beifügung der erforderlichen Nachweise schriftlich mitteilen, in welchem Zeitraum die Elternzeit in Anspruch genommen werden soll. Der Prüfungsausschuss hat zu prüfen, ob die gesetzlichen Voraussetzungen vorliegen, die bei einer Arbeitnehmerin bzw. einem Arbeitnehmer den Anspruch auf Elternzeit auslösen würden, und teilt dem/der Studierenden das Ergebnis sowie die neu festgesetzten Prüfungszeiten unverzüglich mit. Die Bearbeitungszeit der Masterarbeit kann nicht durch Elternzeit unterbrochen werden. Die gestellte Arbeit gilt als nicht vergeben. Nach Ablauf der Elternzeit erhält der/die Studierende ein neues Thema, das innerhalb der in § 14 festgelegten Bearbeitungszeit zu bearbeiten ist.

(3) Der Prüfungsausschuss entscheidet auf Antrag über die flexible Handhabung von Prüfungsfristen entsprechend den Bestimmungen des Landeshochschulgesetzes, wenn Studierende Familienpflichten wahrzunehmen haben. Absatz 2 Satz 4 bis 6 gelten entsprechend.

§ 13 Studierende mit Behinderung oder chronischer Erkrankung

(1) Bei der Gestaltung und Organisation des Studiums sowie der Prüfungen sind die Belange von Studierenden mit Behinderung oder chronischer Erkrankung zu berücksichtigen. Insbesondere ist Studierenden mit Behinderung oder chronischer Erkrankung bevorzugter Zugang zu teilnahmebegrenzten Lehrveranstaltungen zu gewähren und die Reihenfolge für das Absolvieren bestimmter Lehrveranstaltungen entsprechend ihrer Bedürfnisse anzupassen. Studierende sind gemäß Bundesgleichstellungsgesetz (BGG) und Sozialgesetzbuch Neentes Buch (SGB IX) behindert, wenn ihre körperliche Funktion, geistige Fähigkeit oder seelische Gesundheit mit hoher Wahrscheinlichkeit länger als sechs Monate von dem für das Lebensalter typischen Zustand abweichen und daher ihre Teilhabe am Leben in der Gesellschaft beeinträchtigt ist. Der Prüfungsausschuss entscheidet auf Antrag der/des Studierenden über das Vorliegen der Voraussetzungen nach Satz 2 und 3. Die/der Studierende hat die entsprechenden Nachweise vorzulegen.

(2) Weisen Studierende eine Behinderung oder chronische Erkrankung nach und folgt daraus, dass sie nicht in der Lage sind, Erfolgskontrollen ganz oder teilweise in der vorgeschriebenen Zeit oder Form abzulegen, kann der Prüfungsausschuss gestatten, die Erfolgskontrollen in einem anderen Zeitraum oder einer anderen Form zu erbringen. Insbesondere ist behinderten Studierenden zu gestatten, notwendige Hilfsmittel zu benutzen.

(3) Weisen Studierende eine Behinderung oder chronische Erkrankung nach und folgt daraus, dass sie nicht in der Lage sind, die Lehrveranstaltungen regelmäßig zu besuchen oder die gemäß § 19 erforderlichen Studien- und Prüfungsleistungen zu erbringen, kann der Prüfungsausschuss auf Antrag gestatten, dass einzelne Studien- und Prüfungsleistungen nach Ablauf der in dieser Studien- und Prüfungsordnung vorgesehenen Fristen absolviert werden können.

§ 14 Modul Masterarbeit

(1) Voraussetzung für die Zulassung zum Modul Masterarbeit ist, dass die/der Studierende Modulprüfungen im Umfang von 70 LP erfolgreich abgelegt hat. Über Ausnahmen entscheidet der Prüfungsausschuss auf Antrag der/des Studierenden.

(2) Die Masterarbeit kann von Hochschullehrer/innen, leitenden Wissenschaftler/innen gemäß § 14 Abs. 3 Ziff. 1 KITG oder einem habilitierten Mitglied vergeben werden. Darüber hinaus kann der Prüfungsausschuss weitere Prüfende gemäß § 17 Abs. 2 und 3 zur Vergabe des Themas berechtigen. Den Studierenden ist Gelegenheit zu geben, für das Thema Vorschläge zu machen. Soll die Masterarbeit außerhalb der KIT-Fakultät für Mathematik oder der KIT-Fakultät für Wirtschaftswissenschaften angefertigt werden, so bedarf dies der Genehmigung durch den Prüfungsausschuss. Die Masterarbeit kann auch in Form einer Gruppenarbeit zugelassen werden, wenn der als Prüfungsleistung zu bewertende Beitrag der einzelnen Studierenden aufgrund objektiver Kriterien, die eine eindeutige Abgrenzung ermöglichen, deutlich unterscheidbar ist und die Anforderung nach Absatz 4 erfüllt. In Ausnahmefällen sorgt die/der Vorsitzende des Prüfungsausschusses auf Antrag der oder des Studierenden dafür, dass die/der Studierende innerhalb von vier Wochen ein Thema für die Masterarbeit erhält. Die Ausgabe des Themas erfolgt in diesem Fall über die/den Vorsitzende/n des Prüfungsausschusses.

(3) Thema, Aufgabenstellung und Umfang der Masterarbeit sind von dem Betreuer bzw. der Betreuerin so zu begrenzen, dass sie mit dem in Absatz 4 festgelegten Arbeitsaufwand bearbeitet werden kann.

(4) Die Masterarbeit soll zeigen, dass die Studierenden in der Lage sind, ein Problem aus ihrem Studienfach selbstständig und in begrenzter Zeit nach wissenschaftlichen Methoden zu bearbeiten. Der Umfang der Masterarbeit entspricht 30 Leistungspunkten. Die maximale Bearbeitungszeit beträgt sechs Monate. Thema und Aufgabenstellung sind an den vorgesehenen Umfang anzupassen. Der Prüfungsausschuss legt fest, in welchen Sprachen die Masterarbeit geschrieben werden kann. Auf Antrag des Studierenden kann der/die Prüfende genehmigen, dass die Masterarbeit in einer anderen Sprache als Deutsch geschrieben wird.

(5) Bei der Abgabe der Masterarbeit haben die Studierenden schriftlich zu versichern, dass sie die Arbeit selbstständig verfasst und keine anderen als die angegebenen Quellen und Hilfsmittel benutzt haben, die wörtlich oder inhaltlich übernommenen Stellen als solche kenntlich gemacht und die Satzung des KIT zur Sicherung guter wissenschaftlicher Praxis in der jeweils gültigen Fassung beachtet haben. Wenn diese Erklärung nicht enthalten ist, wird die Arbeit nicht angenommen. Die Erklärung kann wie folgt lauten: „Ich versichere wahrheitsgemäß, die Arbeit selbstständig verfasst, alle benutzten Hilfsmittel vollständig und genau angegeben und alles kenntlich gemacht zu haben, was aus Arbeiten anderer unverändert oder mit Abänderungen entnommen wurde sowie die Satzung des KIT zur Sicherung guter wissenschaftlicher Praxis in der jeweils gültigen Fassung beachtet zu haben.“ Bei Abgabe einer unwahren Versicherung wird die Masterarbeit mit „nicht ausreichend“ (5,0) bewertet.

(6) Der Zeitpunkt der Ausgabe des Themas der Masterarbeit ist durch die Betreuerin/den Betreuer und die/den Studierenden festzuhalten und dies beim Prüfungsausschuss aktenkundig zu machen. Der Zeitpunkt der Abgabe der Masterarbeit ist durch den/die Prüfende/n beim Prüfungsausschuss aktenkundig zu machen. Das Thema kann nur einmal und nur innerhalb des ersten Monats der Bearbeitungszeit zurückgegeben werden. Macht der oder die Studierende einen triftigen Grund geltend, kann der Prüfungsausschuss die in Absatz 4 festgelegte Bearbeitungszeit auf Antrag der oder des Studierenden um höchstens drei Monate verlängern. Wird die Masterarbeit nicht fristgerecht abgeliefert, gilt sie als mit „nicht ausreichend“ (5,0) bewertet, es sei denn, dass die Studierenden dieses Versäumnis nicht zu vertreten haben.

(7) Die Masterarbeit wird von mindestens einem/einer Hochschullehrer/in, einem habilitierten Mitglied oder einem/einer leitenden Wissenschaftler/in gemäß § 14 abs. 3 Ziff. 1 KITG und einem/einer weiteren Prüfenden bewertet. In der Regel ist eine/r der Prüfenden die Person, die die Arbeit gemäß Absatz 2 vergeben hat. Bei nicht übereinstimmender Beurteilung dieser beiden Personen setzt der Prüfungsausschuss im Rahmen der Bewertung dieser beiden Personen die Note der Masterarbeit fest; er kann auch einen weiteren Gutachter bestellen. Die Bewertung hat innerhalb von acht Wochen nach Abgabe der Masterarbeit zu erfolgen.

§ 15 Zusatzleistungen

(1) Es können auch weitere Leistungspunkte (Zusatzleistungen) im Umfang von höchstens 30 LP aus dem Gesamtangebot des KIT erworben werden. § 3 und § 4 der Prüfungsordnung bleiben davon unberührt. Diese Zusatzleistungen gehen nicht in die Festsetzung der Gesamt- und Modulnoten ein. Die bei der Festlegung der Modulnote nicht berücksichtigten LP werden als Zusatzleistungen im Transcript of Records aufgeführt und als Zusatzleistungen gekennzeichnet. Auf Antrag der/des Studierenden werden die Zusatzleistungen in das Masterzeugnis aufgenommen und als Zusatzleistungen gekennzeichnet. Zusatzleistungen werden mit den nach § 7 vorgesehenen Noten gelistet.

(2) Die Studierenden haben bereits bei der Anmeldung zu einer Prüfung in einem Modul diese als Zusatzleistung zu deklarieren.

§ 16 Prüfungsausschuss

(1) Für den Masterstudiengang Wirtschaftsmathematik wird ein Prüfungsausschuss gebildet. Er besteht aus sechs stimmberechtigten Mitgliedern, die jeweils zur Hälfte von der Fakultät für Mathematik und der Fakultät für Wirtschaftswissenschaften bestellt werden: vier Hochschullehrer/innen / leitenden Wissenschaftler/innen gemäß § 14 Abs. 3 Ziff. 1 KITG / Privatdozentinnen bzw. -dozenten, zwei akademischen Mitarbeiterinnen und Mitarbeitern nach § 52 LHG / wissenschaftlichen Mitarbeiter/innen gemäß § 14 Abs. 3 Ziff. 2 KITG und einer bzw. einem Studierenden mit beratender Stimme. Die Amtszeit der nichtstudentischen Mitglieder beträgt zwei Jahre, die des studentischen Mitglieds ein Jahr.

(2) Die/der Vorsitzende, ihre/sein Stellvertreter/in, die weiteren Mitglieder des Prüfungsausschusses sowie deren Stellvertreter/innen werden von dem KIT-Fakultätsrat bestellt, die akademischen Mitarbeiter/innen nach § 52 LHG, die wissenschaftlichen Mitarbeiter gemäß § 14 Abs. 3 Ziff. 2 KITG und die Studierenden auf Vorschlag der Mitglieder der jeweiligen Gruppe; Wiederbestellung ist möglich. Die/der Vorsitzende und deren/dessen Stellvertreter/in müssen Hochschullehrer/innen oder leitende Wissenschaftler/innen § 14 Abs. 3 Ziff. 1 KITG sein. Die/der Vorsitzende des Prüfungsausschusses nimmt die laufenden Geschäfte wahr und wird durch das jeweilige Prüfungssekretariat unterstützt.

(3) Der Prüfungsausschuss achtet auf die Einhaltung der Bestimmungen dieser Studien- und Prüfungsordnung und fällt die Entscheidungen in Prüfungsangelegenheiten. Er entscheidet über die Anerkennung von Studienzeiten sowie Studien- und Prüfungsleistungen und trifft die Feststellung gemäß § 18 Absatz 1 Satz 1. Er berichtet der KIT-Fakultät regelmäßig über die Entwicklung der Prüfungs- und Studienzeiten, einschließlich der Bearbeitungszeiten für die Masterarbeiten und die Verteilung der Modul- und Gesamtnoten. Er ist zuständig für Anregungen zur Reform der Studien- und Prüfungsordnung und zu Modulbeschreibungen. Der Prüfungsausschuss entscheidet mit der Mehrheit seiner Stimmen. Bei Stimmengleichheit entscheidet der Vorsitzende des Prüfungsausschusses.

(4) Der Prüfungsausschuss kann die Erledigung seiner Aufgaben für alle Regelfälle auf die/den Vorsitzende/n des Prüfungsausschusses übertragen. In dringenden Angelegenheiten, deren Erledigung nicht bis zu der nächsten Sitzung des Prüfungsausschusses warten kann, entscheidet die/der Vorsitzende des Prüfungsausschusses.

(5) Die Mitglieder des Prüfungsausschusses haben das Recht, der Abnahme von Prüfungen beizuwollen. Die Mitglieder des Prüfungsausschusses, die Prüfenden und die Beisitzenden unterliegen der Verschwiegenheit. Sofern sie nicht im öffentlichen Dienst stehen, sind sie durch die/den Vorsitzende/n zur Verschwiegenheit zu verpflichten.

(6) In Angelegenheiten des Prüfungsausschusses, die eine an einer anderen KIT-Fakultät zu absolvierende Prüfungsleistung betreffen, ist auf Antrag eines Mitgliedes des Prüfungsausschusses eine fachlich zuständige und von der betroffenen KIT-Fakultät zu nennende prüfungsberechtigte Person hinzuzuziehen.

(7) Belastende Entscheidungen des Prüfungsausschusses sind schriftlich mitzuteilen. Sie sind zu begründen und mit einer Rechtsbeihilfsbelehrung zu versehen. Vor einer Entscheidung ist Gelegenheit zur Äußerung zu geben. Widersprüche gegen Entscheidungen des Prüfungsausschusses sind innerhalb eines Monats nach Zugang der Entscheidung schriftlich oder zur Niederschrift beim Präsidium des KIT einzulegen.

§ 17 Prüfende und Beisitzende

(1) Der Prüfungsausschuss bestellt die Prüfenden. Er kann die Bestellung der/dem Vorsitzenden übertragen.

(2) Prüfende sind Hochschullehrer/innen sowie leitende Wissenschaftler/innen gemäß § 14 Abs. 3 Ziff. 1 KITG, habilitierte Mitglieder und akademische Mitarbeiter/innen gemäß § 52 LHG, welche der KIT-Fakultät für Mathematik oder der KIT-Fakultät für Wirtschaftswissenschaften angehören und denen die Prüfungsbefugnis übertragen wurde; desgleichen kann wissenschaftlichen Mitarbeitern gemäß § 14 Abs. 3 Ziff. 2 KITG die Prüfungsbefugnis übertragen werden. Bestellt werden darf nur, wer mindestens die dem jeweiligen Prüfungsgegenstand entsprechende fachwissenschaftliche Qualifikation erworben hat.

(3) Soweit Lehrveranstaltungen von anderen als den unter Absatz 2 genannten Personen durchgeführt werden, sollen diese zu Prüfenden bestellt werden, sofern die KIT-Fakultät für Mathematik oder die KIT-Fakultät für Wirtschaftswissenschaften eine Prüfungsbefugnis erteilt hat und sie die gemäß Absatz 2 Satz 2 vorausgesetzte Qualifikation nachweisen können.

(4) Die Beisitzenden werden durch die Prüfenden benannt. Zu Beisitzenden darf nur bestellt werden, wer einen akademischen Abschluss in einem Masterstudiengang der Wirtschaftsmathematik oder einen gleichwertigen akademischen Abschluss erworben hat.

§ 18 Anerkennung von Studien- und Prüfungsleistungen, Studienzeiten

(1) Studien- und Prüfungsleistungen sowie Studienzeiten, die in Studiengängen an staatlichen oder staatlich anerkannten Hochschulen und Berufsakademien der Bundesrepublik Deutschland oder an ausländischen staatlichen oder staatlich anerkannten Hochschulen erbracht wurden, werden auf Antrag der Studierenden anerkannt, sofern hinsichtlich der erworbenen Kompetenzen kein wesentlicher Unterschied zu den Leistungen oder Abschlüssen besteht, die ersetzt werden sollen. Dabei ist kein schematischer Vergleich, sondern eine Gesamtbetrachtung vorzunehmen. Bezüglich des Umfangs einer zur Anerkennung vorgelegten Studienleistung (Anrechnung) werden die Grundsätze des ECTS herangezogen.

(2) Die Studierenden haben die für die Anerkennung erforderlichen Unterlagen vorzulegen. Studierende, die neu in den Masterstudiengang Wirtschaftsmathematik immatrikuliert wurden, haben den Antrag mit den für die Anerkennung erforderlichen Unterlagen innerhalb eines Semesters nach Immatrikulation zu stellen. Bei Unterlagen, die nicht in deutscher oder englischer Sprache vorliegen, kann eine amtlich beglaubigte Übersetzung verlangt werden. Die Beweislast dafür, dass der Antrag die Voraussetzungen für die Anerkennung nicht erfüllt, liegt beim Prüfungsausschuss.

(3) Werden Leistungen angerechnet, die nicht am KIT erbracht wurden, werden sie im Zeugnis als „anerkannt“ ausgewiesen. Liegen Noten vor, werden die Noten, soweit die Notensysteme vergleichbar sind, übernommen und in die Berechnung der Modulnoten und der Gesamtnote einbezogen. Sind die Notensysteme nicht vergleichbar, können die Noten umgerechnet werden. Liegen keine Noten vor, wird der Vermerk „bestanden“ aufgenommen.

(4) Bei der Anerkennung von Studien- und Prüfungsleistungen, die außerhalb der Bundesrepublik Deutschland erbracht wurden, sind die von der Kultusministerkonferenz und der Hochschulrektorenkonferenz gebilligten Äquivalenzvereinbarungen sowie Absprachen im Rahmen der Hochschulpartnerschaften zu beachten.

(5) Außerhalb des Hochschulsystems erworbene Kenntnisse und Fähigkeiten werden angerechnet, wenn sie nach Inhalt und Niveau den Studien- und Prüfungsleistungen gleichwertig sind, die

ersetzt werden sollen und die Institution, in der die Kenntnisse und Fähigkeiten erworben wurden, ein genormtes Qualitätssicherungssystem hat. Die Anrechnung kann in Teilen versagt werden, wenn mehr als 50 Prozent des Hochschulstudiums ersetzt werden soll.

(6) Zuständig für Anerkennung und Anrechnung ist der Prüfungsausschuss. Im Rahmen der Feststellung, ob ein wesentlicher Unterschied im Sinne des Absatz 1 vorliegt, sind die zuständigen Fachvertreter/innen zu hören. Der Prüfungsausschuss entscheidet in Abhängigkeit von Art und Umfang der anzurechnenden Studien- und Prüfungsleistungen über die Einstufung in ein höheres Fachsemester.

II. Masterprüfung

§ 19 Umfang und Art der Masterprüfung

(1) Die Masterprüfung besteht aus den Modulprüfungen nach Absatz 2 und 3 sowie dem Modul Masterarbeit (§ 14).

(2) Es sind Modulprüfungen in folgenden Pflichtfächern abzulegen:

1. Fach: "Mathematische Methoden": Modul(e) im Umfang von 36 LP, wovon mindestens 8 LP aus Modulen der Stochastik und weitere 8 LP aus Modulen der Analysis oder Angewandter und Numerischer Mathematik, Optimierung stammen müssen.
2. Fach: "Finance - Risk Management - Managerial Economics": Modul(e) im Umfang von 18 LP.
3. Fach: "Operations Management - Datenanalyse - Informatik": Modul(e) im Umfang von 18 LP.
4. Fach: „Wirtschaftswissenschaftliches Seminar“: Modul(e) im Umfang von 3 LP.
5. Fach: „Mathematisches Seminar“: Modul(e) im Umfang von 3 LP.

Die Festlegung der zur Auswahl stehenden Module und deren Fachzuordnung werden im Modulhandbuch getroffen.

(3) Im Wahlpflichtfach sind Modulprüfungen im Umfang von 12 LP abzulegen. Die Festlegung der zur Auswahl stehenden Module wird im Modulhandbuch getroffen.

§ 20 Bestehen der Masterprüfung, Bildung der Gesamtnote

(1) Die Masterprüfung ist bestanden, wenn alle in § 19 genannten Modulprüfungen mindestens mit „ausreichend“ bewertet wurden.

(2) Die Gesamtnote der Masterprüfung errechnet sich als ein mit Leistungspunkten gewichteter Notendurchschnitt der Fachnoten der Fächer 1 – 4 gemäß § 19 Abs. 2, dem Wahlpflichtfach gemäß § 19 Abs. 3 und dem Modul Masterarbeit.

(3) Haben Studierende die Masterarbeit mit der Note 1,0 und die Masterprüfung mit einem Durchschnitt von 1,2 oder besser abgeschlossen, so wird das Prädikat „mit Auszeichnung“ (with distinction) verliehen.

§ 21 Masterzeugnis, Masterurkunde, Diploma Supplement und Transcript of Records

(1) Über die Masterprüfung werden nach Bewertung der letzten Prüfungsleistung eine Masterurkunde und ein Zeugnis erstellt. Die Ausfertigung von Masterurkunde und Zeugnis soll nicht später als drei Monate nach Ablegen der letzten Prüfungsleistung erfolgen. Masterurkunde und Masterzeugnis werden in deutscher und englischer Sprache ausgestellt. Masterurkunde und Zeugnis tragen das Datum der erfolgreichen Erbringung der letzten Prüfungsleistung. Diese Dokumente werden den Studierenden zusammen ausgehändigt. In der Masterurkunde wird die

Verleihung des akademischen Mastergrades beurkundet. Die Masterurkunde wird von dem Präsidenten und den KIT-Dekaninnen/ den KIT-Dekanen der KIT-Fakultät für Mathematik und der KIT-Fakultät für Wirtschaftswissenschaften unterzeichnet und mit dem Siegel des KIT versehen.

(2) Das Zeugnis enthält die Fach- und Modulnoten sowie die den Modulen und Fächern zugeordnete Leistungspunkte und die Gesamtnote. Sofern gemäß § 7 Abs. 2 Satz 2 eine differenziertere Bewertung einzelner Prüfungsleistungen vorgenommen wurde, wird auf dem Zeugnis auch die entsprechende Dezimalnote ausgewiesen; § 7 Abs. 4 bleibt unberührt. Das Zeugnis ist von den KIT-Dekaninnen/ den KIT-Dekanen der KIT-Fakultät für Mathematik und der KIT-Fakultät für Wirtschaftswissenschaften und von der/dem Vorsitzenden des Prüfungsausschusses zu unterzeichnen.

(3) Mit dem Zeugnis erhalten die Studierenden ein Diploma Supplement in deutscher und englischer Sprache, das den Vorgaben des jeweils gültigen ECTS Users' Guide entspricht, sowie ein Transcript of Records in deutscher und englischer Sprache.

(4) Das Transcript of Records enthält in strukturierter Form alle erbrachten Studien- und Prüfungsleistungen. Dies beinhaltet alle Fächer und Fachnoten samt den zugeordneten Leistungspunkten, die dem jeweiligen Fach zugeordneten Module mit den Modulnoten und zugeordneten Leistungspunkten sowie die den Modulen zugeordneten Erfolgskontrollen samt Noten und zugeordneten Leistungspunkten. Absatz 2 Satz 2 gilt entsprechend. Aus dem Transcript of Records soll die Zugehörigkeit von Lehrveranstaltungen zu den einzelnen Modulen deutlich erkennbar sein. Angerechnete Studien- und Prüfungsleistungen sind im Transcript of Records aufzunehmen. Alle Zusatzleistungen werden im Transcript of Records aufgeführt.

(5) Die Masterurkunde, das Masterzeugnis und das Diploma Supplement einschließlich des Transcript of Records werden vom Studierendenservice des KIT ausgestellt.

III. Schlussbestimmungen

§ 22 Bescheinigung von Prüfungsleistungen

Haben Studierende die Masterprüfung endgültig nicht bestanden, wird ihnen auf Antrag und gegen Vorlage der Exmatrikulationsbescheinigung eine schriftliche Bescheinigung ausgestellt, die die erbrachten Studien- und Prüfungsleistungen und deren Noten enthält und erkennen lässt, dass die Prüfung insgesamt nicht bestanden ist. Dasselbe gilt, wenn der Prüfungsanspruch erloschen ist.

§ 23 Aberkennung des Mastergrades

(1) Haben Studierende bei einer Prüfungsleistung getäuscht und wird diese Tatsache nach der Aushändigung des Zeugnisses bekannt, so können die Noten der Modulprüfungen, bei denen getäuscht wurde, berichtigt werden. Gegebenenfalls kann die Modulprüfung für „nicht ausreichend“ (5,0) und die Masterprüfung für „nicht bestanden“ erklärt werden.

(2) Waren die Voraussetzungen für die Zulassung zu einer Prüfung nicht erfüllt, ohne dass die/der Studierende darüber täuschen wollte, und wird diese Tatsache erst nach Aushändigung des Zeugnisses bekannt, wird dieser Mangel durch das Bestehen der Prüfung geheilt. Hat die/der Studierende die Zulassung vorsätzlich zu Unrecht erwirkt, so kann die Modulprüfung für „nicht ausreichend“ (5,0) und die Masterprüfung für „nicht bestanden“ erklärt werden.

(3) Vor einer Entscheidung des Prüfungsausschusses ist Gelegenheit zur Äußerung zu geben.

(4) Das unrichtige Zeugnis ist zu entziehen und gegebenenfalls ein neues zu erteilen. Mit dem unrichtigen Zeugnis ist auch die Masterurkunde einzuziehen, wenn die Masterprüfung aufgrund einer Täuschung für „nicht bestanden“ erklärt wurde.

(5) Eine Entscheidung nach Absatz 1 und Absatz 2 Satz 2 ist nach einer Frist von fünf Jahren ab dem Datum des Zeugnisses ausgeschlossen.

(6) Die Aberkennung des akademischen Grades richtet sich nach § 36 Abs. 7 LHG.

§ 24 Einsicht in die Prüfungsakten

(1) Nach Abschluss der Masterprüfung wird den Studierenden auf Antrag innerhalb eines Jahres Einsicht in das Prüfungsexemplar ihrer Masterarbeit, die darauf bezogenen Gutachten und in die Prüfungsprotokolle gewährt.

(2) Für die Einsichtnahme in die schriftlichen Modulprüfungen, schriftlichen Modulteilprüfungen bzw. Prüfungsprotokolle gilt eine Frist von einem Monat nach Bekanntgabe des Prüfungsergebnisses.

(3) Der/die Prüfende bestimmt Ort und Zeit der Einsichtnahme.

(4) Prüfungsunterlagen sind mindestens fünf Jahre aufzubewahren.

§ 25 Inkrafttreten, Übergangsvorschriften

(1) Diese Studien- und Prüfungsordnung tritt am 01. April 2016 in Kraft und gilt
1. für Studierende, die ihr Studium im Masterstudiengang Wirtschaftsmathematik am KIT im ersten Fachsemester aufnehmen, sowie
2. für Studierende, die ihr Studium im Masterstudiengang Wirtschaftsmathematik am KIT in einem höheren Fachsemester aufnehmen, sofern dieses Fachsemester nicht über dem Fachsemester liegt, das der erste Jahrgang nach Ziff. 1 erreicht.

(2) Die Studien- und Prüfungsordnung des KIT für den Masterstudiengang Wirtschaftsmathematik vom 28. August 2009 (Amtliche Bekanntmachung des KIT Nr. 76 vom 28. August 2009), zuletzt geändert durch Satzung vom 27. März 2014 (Amtliche Bekanntmachung des KIT Nr. 19 vom 28. März 2014), behält Gültigkeit für

1. Studierende, die ihr Studium im Masterstudiengang Wirtschaftsmathematik am KIT zuletzt im Wintersemester 2015/16 aufgenommen haben, sowie
2. für Studierende, die ihr Studium im Masterstudiengang Wirtschaftsmathematik am KIT ab dem Sommersemester 2016 in einem höheren Fachsemester aufnehmen, sofern das Fachsemester über dem liegt, das der erste Jahrgang nach Absatz 1 Ziff. 1 erreicht hat. Im Übrigen tritt sie außer Kraft.

(3) Studierende, die auf Grundlage der Studien- und Prüfungsordnung für den Masterstudiengang Wirtschaftsmathematik vom 28. August 2009 (Amtliche Bekanntmachung des KIT Nr. 76 vom 28. August 2009), zuletzt geändert durch Satzung vom 27. März 2014 (Amtliche Bekanntmachung des KIT Nr. 19 vom 28. März 2014) ihr Studium am KIT aufgenommen haben, können Prüfungen auf Grundlage dieser Studien- und Prüfungsordnung letztmalig bis zum Ende des Prüfungszeitraum des Sommersemesters 2020 ablegen.

(4) Studierende, die auf Grundlage der Studien- und Prüfungsordnung für den Diplomstudiengang Wirtschaftsmathematik vom 15. November 2001 (Amtliche Bekanntmachung des KIT Nr. 30 vom 26. November 2001), zuletzt geändert durch Satzung vom 10. September 2003 (Amtliche Bekanntmachung des KIT Nr. 28 vom 20. Oktober 2003) ihr Studium am KIT aufgenommen haben, können Prüfungen auf Grundlage dieser Studien- und Prüfungsordnung letztmalig bis zum Ende des Prüfungszeitraums des Sommersemesters 2020 ablegen.

Karlsruhe, den 17. Dezember 2015

Master Thesis (M)	90		
Master Thesis (T)	327		

Mathematical Methods in Signal and Image Processing (M) 91	Numerical Methods in Mathematical Finance II (M)	108
Mathematical Methods in Signal and Image Processing (T) 328	Numerical Methods in Mathematical Finance II (T)	363
Mathematical Methods of Imaging (M)	Numerical Optimisation Methods (M)	109
Mathematical Methods of Imaging (T)	Numerical Optimisation Methods (T)	364
Mathematical Modelling and Simulation in Practise (M) 93	O	
Mathematical Modelling and Simulation in Practise (T) 330	Open Innovation - Concepts, Methods and Best Practices (T)	365
Mathematical Programming (M)	Operations Research in Health Care Management (T)	367
Mathematical Statistics (M)	Operations Research in Supply Chain Management (M) 173	
Mathematical Statistics (T)	Operations Research in Supply Chain Management (T) 368	
Maxwell's Equations (M)	Optimisation and Optimal Control for Differential Equations (M)	110
Maxwell's Equations (T)	Optimisation and Optimal Control for Differential Equations (T)	369
Medical Imaging (M)	Optimization in a Random Environment (T)	370
Medical Imaging (T)	Optimization in Banach Spaces (M)	111
Methodical Foundations of OR (M)	Optimization in Banach Spaces (T)	371
Microeconomic Theory (M)	Optimization under uncertainty (T)	372
Mixed Integer Programming I (T)	OR-Oriented Modeling and Analysis of Real Problems (Project) (T)	373
Mixed Integer Programming I and II (T)	P	
Mixed Integer Programming II (T)	P&C Insurance Simulation Game (T)	374
Modeling and OR-Software: Advanced Topics (T)	Panel Data (T)	375
Modeling and OR-Software: Introduction (T)	Parametric Optimization (T)	376
Modelling, Measuring and Managing of Extreme Risks (T) 341	Percolation (M)	112
Multivariate Statistical Methods (T)	Percolation (T)	377
N	Poisson Processes (M)	113
Nature-Inspired Optimisation Methods (T)	Poisson Processes (T)	378
Non- and Semiparametrics (T)	Portfolio and Asset Liability Management (T)	379
Nonlinear Maxwell Equations (M)	Potential Theory (M)	114
Nonlinear Maxwell Equations (T)	Potential Theory (T)	380
Nonlinear Optimization I (T)	Practical Seminar: Health Care Management (with Case Studies) (T)	381
Nonlinear Optimization I and II (T)	Predictive Mechanism and Market Design (T)	382
Nonlinear Optimization II (T)	Principles of Insurance Management (T)	383
Nonparametric Statistics (M)	Probability Theory and Combinatorial Optimization (M) 115	
Nonparametric Statistics (T)	Probability Theory and Combinatorial Optimization (T) 384	
Numerical Continuation Methods (M)	Product and Innovation Management (T)	385
Numerical Continuation Methods (T)	Project Centered Software-Lab (M)	116
Numerical Methods for Differential Equations (M)	Project Centered Software-Lab (T)	386
Numerical Methods for Differential Equations (T)	Public Management (T)	387
Numerical Methods for Hyperbolic Equations (M)	Q	
Numerical Methods for Hyperbolic Equations (T)	Quality Control I (T)	388
Numerical Methods for Integral Equations (M)	Quality Control II (T)	389
Numerical Methods for Integral Equations (T)	R	
Numerical Methods for Maxwell's Equations (M)	Random Graphs (M)	117
Numerical Methods for Maxwell's Equations (T)	Random Graphs (T)	390
Numerical Methods for Time-Dependent Partial Differential Equations (M)	Rational Homotopy Theory (M)	118
Numerical Methods for Time-Dependent Partial Differential Equations (T)	Rational Homotopy Theory (T)	391
Numerical Methods in Computational Electrodynamics (M) 105	Requirements Analysis and Requirements Management (T) 392	
Numerical Methods in Computational Electrodynamics (T) 360	Risk Communication (T)	393
Numerical Methods in Fluid Mechanics (M)		
Numerical Methods in Fluid Mechanics (T)		
Numerical Methods in Mathematical Finance (M)		
Numerical Methods in Mathematical Finance (T)		

S	
Semantic Web Technologies (T).....	394
Seminar (M).....	119, 175, 177f., 180
Seminar in Business Administration A (Master) (T)	396
Seminar in Business Administration B (Master) (T)	404
Seminar in Economics A (Master) (T).....	412
Seminar in Economics B (Master) (T).....	414
Seminar in Informatics A (Master) (T).....	416
Seminar in Informatics B (Master) (T).....	422
Seminar in Operations Research A (Master) (T)	427
Seminar in Operations Research B (Master) (T)	429
Seminar in Statistics A (Master) (T)	431
Seminar in Statistics B (Master) (T)	432
Seminar Mathematics (T).....	433
Service Operations (M).....	181
Service Oriented Computing (T).....	434
Simulation I (T).....	435
Simulation II (T).....	436
Simulation of Stochastic Systems (T)	437
Smart Energy Infrastructure (T).....	438
Smart Grid Applications (T).....	439
Sobolev Spaces (M).....	120
Sobolev Spaces (T).....	440
Social Choice Theory (T).....	441
Software Quality Management (T)	442
Spatial Economics (T).....	444
Spatial Stochastics (M).....	121
Spatial Stochastics (T)	445
Special Functions and Applications in Potential Theory (M) 122	
Special Functions and Applications in Potential Theory (T) 446	
Special Topics of Efficient Algorithms (T)	447
Special Topics of Enterprise Information Systems (T)	448
Special Topics of Knowledge Management (T)	449
Special Topics of Numerical Linear Algebra (M).....	123
Special Topics of Numerical Linear Algebra (T)	450
Special Topics of Software- and Systemsengineering (T).....	451
Spectral Theory (M).....	124
Spectral Theory - Exam (T)	452
Spin Manifolds, Alpha Invariant and Positive Scalar Curva- ture (M)	125
Spin Manifolds, Alpha Invariant and Positive Scalar Curva- ture (T)	189
Statistical Modeling of generalized regression models (T) 453	
Stein's Method (M)	126
Stein's Method (T).....	454
Stochastic Calculus and Finance (T)	455
Stochastic Control (M)	127
Stochastic Control (T)	457
Stochastic Differential Equations (M)	128
Stochastic Differential Equations (T)	458
Stochastic Evolution Equations (M)	129
Stochastic Evolution Equations (T)	459
Stochastic Geometry (M)	130
Stochastic Geometry (T)	460
Stochastic Methods and Simulation (M)	183
T	
Stochastic Modelling and Optimization (M).....	185
Stochastic Optimization (M).....	187
Strategic Brand Management (T)	461
Strategic Management of Information Technology (T)	462
Strategy and Management Theory: Developments and "Classics" (T)	463
Supply Chain Management in the Process Industry (T)	464
V	
Tactical and Operational Supply Chain Management (T).....	466
Technological Change in Energy Economics (T)	467
The Riemann Zeta Function (M)	39
The Riemann Zeta Function (T)	468
Theory of Endogenous Growth (T)	469
Time Series Analysis (M)	131
Time Series Analysis (T)	471
Topics in Experimental Economics (T)	472
Traveling Waves (M)	132
Traveling Waves (T)	473
W	
Wavelets (M)	133
Wavelets (T)	475
Web Science (T)	476
Workflow-Management (T)	477
Workshop Business Wargaming – Analyzing Strategic Inter- actions (T)	479
Workshop Current Topics in Strategy and Management (T) 480
