Student Assistant (m/f/d)

at ITAS, in the research group RESET (Research for Sustainable Energy Technologies), as soon as possible, flexible (20-80 h/month)

Karlsruhe, 03.11.2026

Project Description

We are seeking a motivated and enthusiastic student assistant to join our research group assisting our project work. The research group Research for Sustainable Energy Technologies - RESET consists of experts focusing on the environmental, economic, and social aspects of cutting-edge sustainable energy technologies.

Responsibilities

Data Visualization: Collaborate with our group for research data visualization. Create clear and informative charts, graphs and visual elements including creative design for posters, reports and postings.
Supporting Organization and Communication of research results: Assist in organizing workshops, seminars, and knowledge-sharing sessions. Coordinate logistics, invitations, and materials required for the events.
Literature Research (potentially): Conduct research to gather relevant scientific articles, reports, and studies. Summarize findings and provide critical input to our projects.

Qualifications

You have data visualization expertise and graphical design creativity, strong organizational abilities, and a collaborative mindset to contribute to our research activities, while being enthusiastic about sustainability and energy transition research. You are able to communicate in English, German language skills are appreciated.

What we offer

We provide a **learning opportunity** in sustainability assessment and energy technology research, with a **long-term perspective** for students interested in conducting graduation projects in the field of sustainability assessment under **our supervision.**
Enjoy **flexible hours** and be part of an interdisciplinary, **supportive environment** where you can make a positive impact. A **workplace at the Karlsruhe city center** directly at Europaplatz.
